## 2026 Arch-303 – 100% Free Latest Exam Duration | Valid Arch-303 Online Exam

In this era of the latest technology, we should incorporate interesting facts, figures, visual graphics, and other tools that can help people read the Salesforce Certified B2C Commerce Architect (Arch-303) exam questions with interest. BraindumpsPass uses pictures that are related to the Salesforce Certified B2C Commerce Architect (Arch-303) certification exam and can even add some charts, and graphs that show the numerical values. It will not let the reader feel bored with the Salesforce Certified B2C Commerce Architect (Arch-303) practice test. They can engage their attention in the Salesforce Arch-303 exam visual effects and pictures that present a lot of.

## Salesforce Certified B2C Commerce Architect Sample Questions (Q15-Q20):

### NEW QUESTION # 15

The client provided these business requirements:

- \* The B2C Commerce platform will integrate with the Client's Order Management System (OMS).
- \* The OMS supports Integration using REST services.
- \* The OMS is hosted on the Client's infrastructure.

What configurations are needed for this integration with the OMS?

- A. A service configuration, a service profile configuration, and a user credential configuration.
- **B. A service configuration, a service profile configuration, and a service credential configuration.**
- C. A service profile configuration, a WAF configuration, and a service credential configuration.
- D. A service configuration, a hostname alias configuration, and a user credential configuration.

**Answer: B**

Explanation:

For integrating the B2C Commerce platform with the client's OMS using REST services, the required configurations include:

- \* Service Configuration: This specifies the service endpoints, HTTP methods, and any other service-specific settings necessary for the integration.
  - \* Service Profile Configuration: This defines the behavior of the service such as timeout settings, retry logic, and cache settings.
  - \* Service Credential Configuration: This involves setting up the credentials that will be used to authenticate the requests to the client's OMS. These credentials are often managed securely through encrypted storage and retrieval mechanisms.
- These configurations ensure secure, efficient, and reliable communication between the B2C Commerce platform and the client's OMS, adhering to best practices in web service integration.

#### NEW QUESTION # 16

The Client has requested an Architect's help in documenting the architectural approach to a new home page.

The requirements provided by the business are:

- \* Multiple areas of static image content, some may need text shown at well
- \* The content page must be Realizable
- \* A carousel of featured products must be shown below a banner 101191
- \* Recommended categories will be featured based on the time of year

Which two solutions would fulfil these requirements?

Choose 2 answers

- A. Leverage B2C Commerce locales in Business Manager
- B. Leverage B2C Commerce content slots and assets
- C. Leverage B2C Commerce Page Designer with a dynamic layout.
- D. Leverage B2C Commerce ContentManagement Service

**Answer: B,C**

Explanation:

To fulfill the requirements of having multiple static image content areas, a carousel of featured products, and dynamic content adjustments based on the time of year:

\* Option C (Leverage B2C Commerce content slots and assets): This solution allows for dynamic content management where different assets and slots can be used to manage and display static images, text overlays, and other content variations effectively.

\* Option D (Leverage B2C Commerce Page Designer with a dynamic layout): Using the Page Designer with a dynamic layout enables the easy assembly of complex page designs, including carousels and responsive elements that adjust based on viewing device or other criteria like time of year. This tool provides the flexibility required for real-time customization and resizability of page elements.

These solutions provide robust and flexible management of site content that meets the business's needs for a visually engaging and adaptable homepage.

#### NEW QUESTION # 17

During a review of the most recent release notes, the Architect finds that Salesforce has deprecated an API that is used throughout the site. After reviewing the deprecated API usage in Business Manager, the Architect narrows down the usage of that API to a particular LINK integration cartridge. The cartridge was integrated when the site was first launched and is heavily customized for the Client.

What is the recommended way for the Architect to remove the deprecated API so the LINK integration continues to work without interruptions, and lowest level of effort?

- A. The Architect should contact the company that created the LINK cartridge to fix the issue and provide the client with updated code.
- B. The Architect does not need to do anything at this time, the API will continue to work with no issues for the foreseeable future.
- C. The Architect should check to see if the LINK cartridge has been updated already, integrate it, apply the customisations, and test thoroughly.
- D. The Architect should update all the deprecated API calls in the already integrated LINK cartridge and test thoroughly.

**Answer: C**

Explanation:

When facing a deprecated API that is used in a LINK integration cartridge, the recommended approach is to check for an updated version of the cartridge that may have replaced the deprecated API with a supported one.

If an update is available:

- \* Integrate the updated cartridge into the site, ensuring compatibility with the current site configuration.
- \* Re-apply customizations that were made to the original cartridge to maintain functional consistency.
- \* Thorough testing should be conducted to ensure that the integration works seamlessly without causing disruptions in the site's functionality.

This approach minimizes effort by leveraging updates provided by the cartridge vendor while ensuring the site remains functional and compliant with current API standards.

#### NEW QUESTION # 18

During load testing, a third party service is constantly failing to respond in a timely manner on the Product Listing Page. The page is not affected as it is collecting data with the server side call, however the loading time is increasing.

Which two recommendations should the developer take in order to minimize the risk and improve the loading time?

Choose 2 answers

- A. Remove the service.
- B. Decrease the service timeout.
- C. **Enable the Circuit Breaker.**
- D. Ask the third party to improve the reliability of the service.
- E. **Load the data asynchronously after the page is loaded**

**Answer: C,E**

Explanation:

In scenarios where a third-party service impacts page performance, implementing a Circuit Breaker pattern (Option C) can prevent the service from becoming a bottleneck. This pattern helps manage failing service calls by temporarily disabling the service interaction when failures reach a certain threshold, allowing it to recover. Asynchronously loading the data (Option E) ensures the page's primary content loads without delay, while data from the third-party service is fetched in the background, improving the user's perceived performance and page load times.

#### NEW QUESTION # 19

There is an issue with the site when the domain is opened from Google search results. After researching the problem, it turns out that the site returns a 404 page error when accessed with a parameter in the URL.

What should the Architect recommend to fix that issue?

- A. **Add dynamic catch-all rule to redirect to home page.**
- B. Add this snippet to the aliases configuration for the domain
- C. Add dynamic redirect if the URL contains parameter to Home Show. Add this snippet to the aliases configuration for the domain
- D. Add this snippet to the aliases configuration for the domain:

**Answer: A**

Explanation:

To address the issue of the site returning a 404 error when accessed with a parameter from Google search results, a dynamic catch-all rule to redirect such requests to the homepage is an effective solution (Answer A).

This approach ensures that users landing from external links with appended parameters, which might not match any configured route or alias, are redirected to a valid page instead of seeing an error page. This improves the user experience and minimizes potential bounce rates caused by broken links or outdated URLs.

#### NEW QUESTION # 20

.....

The Salesforce Arch-303 questions formats are PDF dumps files, desktop practice test software, and web-based practice test software. All these Salesforce Arch-303 questions formats hold some common and unique features. Such as Salesforce PDF dumps file is the PDF version of Arch-303 dumps that works on all operating systems and devices. Whereas the other two BraindumpsPass practice test questions formats are concerned, both are the mock Salesforce Arch-303. Both will give you a real-time Salesforce Arch-303 exam preparation environment and you get experience to attempt the Arch-303 preparation experience before the final
