New CompTIA 220-1201 Dumps Pdf & Reliable 220-1201 Dumps Questions

Our CompTIA 220-1201 practice exam simulator mirrors the CompTIA 220-1201 exam experience, so you know what to anticipate on CompTIA A+ Core 1 Exam (2026) day. Our CompTIA 220-1201 practice test software features various question styles and levels, so you can customize your CompTIA 220-1201 Exam Questions preparation to meet your needs.

CompTIA A+ Core 1 Exam (2026) Sample Questions (Q304-Q309):

NEW QUESTION # 304

Each time a user tries to print, the paper becomes stuck at the last stage of the print job and the user has to poll the paper out of the printer. Which of the following is the most likely cause?

- A. Printhead
- B. Tray assembly
- C. Rollers
- D. Toner

Answer: C

Explanation:

If paper gets stuck at the last stage of printing, the rollers responsible for moving the paper through the printer are likely worn out or dirty.

Why Not B (Tray assembly): The tray assembly manages paper loading, not feeding during the print process.

Why Not C (Toner): Toner is unrelated to paper jams.

Why Not D (Printhead): Printheads manage ink/toner distribution, not paper movement.

CompTIA A+ Exam Reference: Core 2 (220-1102), Section 4.6, printer troubleshooting.

NEW QUESTION # 305

Which of the following cables are the most likely to be implemented using a punch down block?

(Choose two.)

- A. Fiber
- B. Coaxial
- C. Telephone
- D. Ethernet
- E. HDMI
- F. USB

Answer: C,D

Explanation:

Punch-down blocks are commonly used to terminate and manage cabling for telephone systems and Ethernet networks (e.g., Cat 5, Cat 6). These blocks allow for efficient organization and connection of wires.

NEW QUESTION # 306

A small company wants the ability to print in full color but needs to pay a minimal initial purchase price for the printer.

Which of the following is the best option?

- A. Thermal printer
- B. Inkjet printer
- C. Laser printer
- D. Dot matrix printer

Answer: B

Explanation:

Inkjet printers are the best choice for a small company seeking full-color printing with a minimal initial cost. While they have higher operating costs (due to ink), they are affordable and capable of high-quality color output.

NEW QUESTION # 307

A user returns from a trip and discovers a computer that is connected to the LAN times out intermittently. Upon investigation, a technician finds the RJ45 pin is not properly terminated. Which of the following networking tools is most appropriate to fix the issue?

- A. Cable tester
- B. Crimper
- C. Toner probe
- D. Punchdown

Answer: B

Explanation:

A crimper is used to terminate an RJ45 cable properly by attaching the connector to the twisted-pair wires.

If the termination is not done correctly, the connection will be intermittent or fail entirely.

Incorrect Options:

A). Toner probe: Used to locate cables or trace their path, not for terminating RJ45 connectors.

B). Cable tester: Useful for testing connectivity but does not fix termination issues.

C). Punchdown: Used to connect wires to a patch panel or keystone jack, not for RJ45 connectors.

Key Takeaway: A crimper is the proper tool for fixing an improperly terminated RJ45 connection.

NEW QUESTION # 308

Which internet connection type will most likely experience interference from rain?

- A. DSL
- B. Cable
- C. Fiber
- **D. Satellite**

Answer: D

Explanation:

CompTIA A+ identifies satellite internet as the connection type most susceptible to weather-related interference, particularly rain, snow, and heavy cloud cover. This phenomenon is known as rain fade.

Satellite connections rely on high-frequency microwave signals transmitted between a dish antenna at the customer site and an orbiting satellite. Moisture in the atmosphere absorbs and scatters these signals, causing latency spikes, reduced bandwidth, or complete signal loss during storms.

Fiber (A) uses light signals through glass fiber and is immune to electromagnetic and weather interference.

Cable internet (B) uses shielded coaxial lines buried or run overhead, but rain does not affect signal quality in normal conditions.

DSL (D) uses telephone lines, which may degrade with physical line issues, but not directly due to rain in the same way satellite is affected.

Thus, satellite internet is most likely to experience signal degradation during rain conditions.

NEW QUESTION # 309

.....

How can you quickly change your present situation and be competent for the new life, for jobs, in particular? The answer is using our 220-1201 practice materials. From my perspective, our free demo of 220-1201 exam questions is possessed with high quality which is second to none. This is no exaggeration at all. Just as what have been reflected in the statistics, the pass rate for those who have chosen our 220-1201 Exam Guide is as high as 99%, which in turn serves as the proof for the high quality of our 220-1201 practice torrent.
