## Learning JN0-637 Materials - JN0-637 Certification Exam Infor

You only need 20-30 hours to learn our JN0-637 test braindumps and then you can attend the exam and you have a very high possibility to pass the JN0-637 exam. For many people whether they are the in-service staff or the students they are busy in their job, family lives and other things. But you buy our JN0-637 prep torrent you can mainly spend your time energy and time on your job, the learning or family lives and spare little time every day to learn our Security, Professional (JNCIP-SEC) exam torrent. And you will pass the JN0-637 exam as it is a piece of cake to you with our JN0-637 exam questions.

## Juniper Security, Professional (JNCIP-SEC) Sample Questions (Q14-Q19):

### NEW QUESTION # 14

You want to test how the device handles a theoretical session without generating traffic on the Junos security device.

Which command is used in this scenario?

- A. show security policies
- **B. request security policies check**
- C. show security match-policies
- D. show security flow session

**Answer: B**

Explanation:

The request security policies check command allows you to simulate a session through the SRX device, checking the security policy action that would apply without needing to send real traffic.

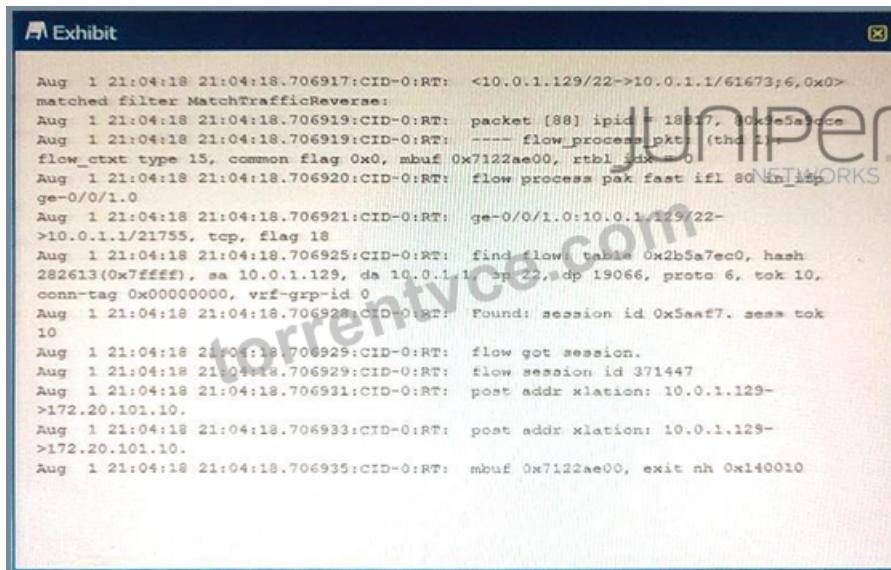

This helps in validating configurations before actual deployment.

The command request security policies check is used to test how a Junos security device handles a theoretical session without generating actual traffic. This command is useful for validating how security policies would be applied to a session based on various parameters like source and destination addresses, application type, and more.

This command allows you to simulate a session and verify which security policies would be applied to the session. It's a proactive method to test security policy configurations without the need to generate real traffic.

## NEW QUESTION # 15

Exhibit

```
Aug 1 21:04:18 21:04:18.706917:CID=0:RT: <10.0.1.129/22->10.0.1.1/61673;6,0x0>

```

You are using traceoptions to verify NAT session information on your SRX Series device Referring to the exhibit, which two statements are correct? (Choose two.)

- **A. The SRX device is changing the destination address on this packet 10.0.1.1 to 172.20.101.10.**
- B. The SRX device is changing the source address on this packet from
- **C. This is the first packet in the session**
- D. This packet is part of an existing session.

**Answer: A,C**

## NEW QUESTION # 16

Which two additional configuration actions are necessary for the third-party feed shown in the exhibit to work properly? (Choose two.)

- **A. You must apply the dynamic address entry in a security policy.**
- **B. You must create a dynamic address entry with the IP filter category and the ipfilter\_office365 value.**
- C. You must create a dynamic address entry with the C&C category and the cc\_office365 value.
- D. You must apply the dynamic address entry in a security intelligence policy.

**Answer: A,B**

### NEW QUESTION # 17

You are asked to look at a configuration that is designed to take all traffic with a specific source ip address and forward the traffic to a traffic analysis server for further evaluation. The configuration is no longer working as intended.

Referring to the exhibit which change must be made to correct the configuration?

- A. Apply the filter as in output filter on interface xe-0/1/0.0
- B. Apply the filter as in input filter on interface xe-0/2/1.0
- **C. Apply the filter as in input filter on interface xe-0/0/1.0**
- D. Create a routing instance named default

**Answer: C**

### NEW QUESTION # 18

Exhibit

```
server address: 192.168.30.188
  Authentication port: 1645
  Preauthentication port: 1810
  Accounting port: 1646
  Status: UNREACHABLE

profile: xyz-profile2
  Server address: 192.168.30.190
  Authentication port: 1812
  Preauthentication port: 1810
  Accounting port: 1813
  Status: DOWN ( 60 seconds )

profile: xyz-profile1
  Server address: 2001:DB8:0:f101::
  Authentication port: 1645
  Preauthentication port: 1810
  Accounting port: 1646
  Status: UP

profile: xyz-profile7
  Server address: 192.168.30.191
  Authentication port: 1812
  Preauthentication port: 1810
  Accounting port: 1813
```

The show network-access aaa radius-servers command has been issued to solve authentication issues.

Referring to the exhibit, to which two authentication servers will the SRX Series device continue to send requests? (Choose TWO)

- A. 2001:DB8:0:f101::2
- B. 192.168.30.190
- **C. 192.168.30.188**
- **D. 192.168.30.191**

**Answer: C,D**

### NEW QUESTION # 19

.....

It is not hard to know that Security, Professional (JNCIP-SEC) torrent prep is compiled by hundreds of industry experts based on the syllabus and development trends of industries that contain all the key points that may be involved in the examination. Therefore, with JN0-637 exam questions, you no longer need to purchase any other review materials, and you also don't need to spend a lot of money on tutoring classes. At the same time, JN0-637 Test Guide will provide you with very flexible learning time in order to help you pass the exam
