2026 Latest 100% Free SAFe-POPM – 100% Free Latest Test Camp | Pass SAFe Product Owner/Product Manager POPM (6.0) Guide

Holding a certification in a certain field definitely shows that one have a good command of the SAFe-POPM knowledge and professional skills in the related field. However, the majority of the candidates for the SAFe-POPM exam are those who do not have enough spare time. But our company can provide the anecdote for you--our SAFe-POPM Study Materials. Under the

guidance of our SAFe-POPM exam practice, you can definitely pass the exam as well as getting the related certification with the minimum time and efforts. Our SAFe-POPM exam questions will never let you down.

Scrum SAFe Product Owner/Product Manager POPM (6.0) Sample Questions (Q30-Q35):

NEW QUESTION # 30

What is one strategy for managing complex critical path challenges?

- A. Allocate work between teams based on forecasted capacity
- B. Sequence work to eliminate same Iteration dependencies
- C. Adjust work between teams or split Features and Stories
- D. Distribute work to other teams

Answer: C

Explanation:

Explanation

One strategy for managing complex critical path challenges is to adjust work between teams or split Features and Stories. Complex critical path challenges are situations where the delivery of value depends on the completion of multiple interdependent tasks by different teams¹. These challenges can cause delays, bottlenecks, and inefficiencies in the value stream. To overcome these challenges, one option is to adjust work between teams or split Features and Stories, so that the dependencies are minimized or eliminated². This can help improve the flow of work, reduce the risk of integration issues, and increase the flexibility and responsiveness of the teams³.

NEW QUESTION # 31

What is one benefit of capacity allocation?

- A. It prevents different types of backlog items from being compared against each other
- B. It ensures all Value Streams in the Portfolio are appropriately funded
- C. It enables effective time-tracking
- D. It allocates developers and testers to an initiative

Answer: A

Explanation:

Explanation

Capacity allocation is an allocation of work by work item type for an upcoming planning period¹. It helps the Agile Teams to balance their investments across different types of backlog items, such as new features, enablers, defects, and technical debt². One benefit of capacity allocation is that it prevents different types of backlog items from being compared against each other based on their relative value or priority, which can be misleading or subjective³. Instead, capacity allocation allows the teams to focus on delivering value and quality in each work item type, without compromising the other².

NEW QUESTION # 32

What is one tool that visualizes Features representing a workflow?

- A. Story Maps
- B. Continuous Delivery Pipeline
- C. Team Kanban
- D. User Experience Design

Answer: A

Explanation:

A story map is a tool that visualizes features representing a workflow. A story map is a two-dimensional arrangement of user stories that shows the relationship between the user activities and the features that support them¹. A story map helps the team to understand the user journey, prioritize the features based on value and dependencies, and plan the releases and iterations².

NEW QUESTION # 33

Which of the following statements is one of the five Lean Thinking principles?

- A. Deliver working software frequently
- B. Decentralize decision-making
- C. Customer collaboration over contract negotiation
- **D. Identify the Value Stream for each product**

Answer: D

Explanation:

Explanation

Identifying the Value Stream for each product is one of the five Lean Thinking principles proposed by Womack and Jones in 1996. A value stream is the sequence of activities that deliver value to the customer, from the initial request to the final delivery¹. Identifying the value stream for each product helps to eliminate waste, optimize flow, and increase customer satisfaction².

NEW QUESTION # 34

What is one characteristic of writing effective PI Objectives?

- **A. Describing the value**
- B. Listing out committed Features
- C. Including critical Stories
- D. Identifying significant risks

Answer: A

Explanation:

One characteristic of writing effective PI Objectives is describing the value that the objectives will deliver to the customers and stakeholders. PI Objectives are a summary of the business and technical goals that the Agile Release Train (ART) intends to achieve in the upcoming Program Increment (PI)¹. They are not just a list of features or stories, but rather a statement of the outcomes and benefits that the features or stories will provide². By describing the value, the PI Objectives help align the teams and stakeholders to a shared vision and mission, and provide a basis for measuring the progress and performance of the ART³.
