Salesforce Salesforce-AI-Specialist 인증시험은 최근 가장 핫한 시험입니다. 인기가 높은 만큼Salesforce Salesforce-AI-Specialist시험을 패스하여 취득하게 되는 자격증의 가치가 높습니다. 이렇게 좋은 자격증을 취득하는데 있어서의 필수과목인Salesforce Salesforce-AI-Specialist시험을 어떻게 하면 한번에 패스할수 있을가요? 그 비결은 바로 ExamPassdump의 Salesforce Salesforce-AI-Specialist덤프를 주문하여 가장 빠른 시일내에 덤프를 마스터하여 시험을 패스하는것입니다.

Salesforce Salesforce-AI-Specialist 시험요강:

주제	소개
주제 1	• Model Builder: This portion of the exam focuses on Salesforce AI specialists' expertise in working with AI models within Salesforce environments. Candidates will need to demonstrate knowledge of when to use the Model Builder and how to configure standard, custom, or Bring Your Own Large Language Model (BYOLLM) generative models to meet business needs.
주제 2	• Agentforce Tools: In this topic, AI specialists get knowledge using agents when it is appropriate. Moreover, the topic explains the working of agents and reasoning engine powers Agentforce. Lastly, the topic focuses on managing and monitoring agent adoption.
주제 3	• Generative AI in CRM Applications: This part of the exam assesses AI specialists' knowledge of generative AI within CRM systems. It covers the use of generative AI features in Einstein for Sales and Einstein for Service.
주제 4	• Prompt Builder: This section evaluates the expertise of AI specialists working with Salesforce's AI tools. It focuses on the Prompt Builder feature, requiring candidates to understand its usage based on business needs.
주제 5	• Einstein Trust Layer: This section evaluates the skills of Salesforce AI specialists responsible for implementing security protocols and safeguarding data privacy. It emphasizes the security, privacy, and foundational features of the Einstein Trust Layer.

AI-Specialist최신시험후기

ExamPassdump의 Salesforce인증 Salesforce-AI-Specialist덤프의 무료샘플을 이미 체험해보셨죠? ExamPassdump의 Salesforce인증 Salesforce-AI-Specialist덤프에 단번에 신뢰가 생겨 남은 문제도 공부해보고 싶지 않나요? ExamPassdump는 고객님들의 시험부담을 덜어드리기 위해 가벼운 가격으로 덤프를 제공해드립니다. ExamPassdump의 Salesforce인증 Salesforce-AI-Specialist로 시험패스하다 더욱 넓고 좋은곳으로 고고싱 하세요.

최신 AI Associate Salesforce-AI-Specialist 무료샘플문제 (Q93-Q98):

질문 # 93
Universal Containers (UC) wants to assess Salesforce's generative features but has concerns over its company data being exposed to third- party large language models (LLMs). Specifically, UC wants the following capabilities to be part of Einstein's generative AI service.
No data is used for LLM training or product improvements by third- party LLMs.
No data is retained outside of UC's Salesforce org.
The data sent cannot be accessed by the LLM provider.
Which property of the Einstein Trust Layer should the AI Specialist highlight to UC that addresses these requirements?

- A. Zero-Data Retention Policy
- B. Data Masking
- C. Prompt Defense

정답：A

설명：
Universal Containers (UC) has concerns about data privacy when using Salesforce's generative AI features, particularly around preventing third-party LLMs from accessing or retaining their data. The Zero-Data Retention Policy in the Einstein Trust Layer is designed to address these concerns by ensuring that:
No data is used for training or product improvements by third-party LLMs.
No data is retained outside of the customer's Salesforce organization.
The LLM provider cannot access any customer data.
This policy aligns perfectly with UC's requirements for keeping their data safe while leveraging generative AI capabilities.
Prompt Defense and Data Masking are also security features, but they do not directly address the concerns related to third-party data access and retention.

Salesforce Einstein Trust Layer Documentation: https://help.salesforce.com/s/articleView?id=sf.einstein_trust_layer.htm

질문 # 94
Universal Containers (UC) wants to enable its sales team to use AI to suggest recommended products from its catalog.
Which type of prompt template should UC use?

- A. Record summary prompt template
- B. Flex prompt template
- C. Email generation prompt template

정답：B

설명：
Universal Containers (UC) wants to enable its sales team to leverage AI to recommend products from its catalog. The best option for this use case is a Flex prompt template.
A Flex prompt template is designed to provide flexible, customizable AI-driven recommendations or responses based on specific data points, such as product information, customer needs, or sales history. This template type allows the AI to consider various inputs and parameters, making it ideal for generating product recommendations dynamically.
In contrast:
A Record summary prompt template (Option A) is used to summarize data related to a specific record, such as generating a quick summary of a sales opportunity or account, but not for recommending products.
An Email generation prompt template (Option B) is tailored for crafting email content and is not suitable for suggesting products based on a catalog.
Given the need for dynamic recommendations that pull from a product catalog and potentially other sales data, the Flex prompt template is the correct approach.

Salesforce Reference:
Salesforce Prompt Templates Overview: https://help.salesforce.com/s/articleView?id=000391407&type=1 Flex Prompt Template Usage: https://developer.salesforce.com/docs/atlas.en-us.salesforce_ai.meta/salesforce_ai/prompt_flex_template

질문 # 95
An AI Specialist needs to enable the use of Sales Email prompt templates for the sales team. The AI Specialist has already created the templates in Prompt Builder.
According to best practices, which steps should the AI Specialist take to ensure the sales team can use these templates?

- A. Assign the Data Cloud Admin permission set and enable Sales Emails in Setup.
- B. Assign the Prompt Template User permission set and enable Sales Emails in Setup.
- C. Assign the Prompt Template Manager permission set and enable Sales Emails in setup.

정답：B

설명：
To enable Sales Email prompt templates:
* Permission Set: Assign the Prompt Template User permission set to the sales team to grant access to use pre-built templates.
* Feature Activation: Enable Sales Emails in Salesforce Setup to activate the integration between prompt templates and email workflows.
* Option B (Manager permission set): Required for creating/modifying templates, not for usage.
* Option C (Data Cloud Admin): Unrelated to prompt template access.
References:
* Salesforce Help: Prompt Template Permissions
* Specifies that "Prompt Template User" is required to leverage templates in workflows.
* Sales Email Setup outlines enabling the feature in Setup.

질문 # 96
A sales rep at Universal Containers is extremely busy and sometimes will have very long sales calls on voice and video calls and might miss key details. They are just starting to adopt new generative AI features.
Which Einstein Generative AI feature should an AI Specialist recommend to help the rep get the details they might have missed during a conversation?

- A. Sales Summary
- B. Call Explorer
- C. Call Summary

정답：C

설명：
For a sales rep who may miss key details during long sales calls, the AI Specialist should recommend theCall Summaryfeature.Call SummaryusesEinstein Generative AIto automatically generate a concise summary of important points discussed during the call, helping the rep quickly review the key information they might have missed.
* Call Exploreris designed for manually searching through call data but doesn't summarize.
* Sales Summaryis focused more on summarizing overall sales activity, not call-specific content.
For more details, refer toSalesforce's Call Summary documentationon how AI-generated summaries can improve sales rep productivity.

질문 # 97
Leadership needs to populate a dynamic form field with a summary or description created by a large language model (LLM) to facilitate more productive conversations with customers. Leadership also wants to keep a human in the loop to be considered in their AI strategy.
Which prompt template type should the AI Specialist recommend?

- A. Field Generation
- B. Record Summary
- C. Sales Email

정답：**A**

설명：

The correct answer is Field Generation because this template type is designed to dynamically populate form fields with content generated by a large language model (LLM). In this scenario, leadership wants a dynamic form field that contains a summary or description generated by AI to aid customer interactions. Additionally, they want to keep a human in the loop, meaning the generated content will likely be reviewed or edited by a person before it's finalized, which aligns with the Field Generation prompt template.

Field Generation: This prompt type allows you to generate content for specific fields in Salesforce, leveraging large language models to create dynamic and contextual information. It ensures that AI content is available within the record where needed, but it allows human oversight or review, supporting the "human-in-the-loop" strategy.

Sales Email: This prompt type is mainly used for generating email content for outreach or responses, which doesn't align directly with populating fields in a form.

Record Summary: While this option might seem close, it is typically used to summarize entire records for high-level insights rather than filling specific fields with dynamic content based on AI generation.

Salesforce AI Specialist Reference:

You can explore more about these prompt templates and AI capabilities through Salesforce documentation and official resources on Prompt Builder: https://help.salesforce.com/s/articleView?id=sf.prompt_builder_templates_overview.htm
