## 300-430 Valid Test Forum & New 300-430 Test Notes

In accordance with the actual exam, we provide the latest 300-430 exam dumps for your practices. With the latest 300-430 test questions, you can have a good experience in practicing the test. Moreover, you have no need to worry about the price, we provide free updating for one year and half price for further partnerships, which is really a big sale in this field. After your payment, we will send the updated 300-430 Exam to you immediately and if you have any question about updating, please leave us a message.

## Cisco Implementing Cisco Enterprise Wireless Networks Sample Questions (Q148-Q153):

### NEW QUESTION # 148

An engineer is deploying a Cisco wireless network to support branch offices. All APs are in FlexConnect mode, and the SSIDs switch traffic locally. The customer requires that all QoS for the VoWLAN service be based on Layer 2 markings. Which configuration is required on the switch ports that connect to the APs?

- A. MLSAWID1P
- B. MLSAWID UP
- C. MLS Trust DSCP
- D. MLS Trust COS

**Answer: D**

#### NEW QUESTION # 149

An engineer has configured passive fallback mode for RADIUS with default timer settings. What will occur when the primary RADIUS fails then recovers?

- A. The controller will immediately revert back after it receives a RADIUS probe from the primary server.
- **B. After the inactive time expires the controller will send RADIUS to the primary.**
- C. Once RADIUS probe messages determine the primary controller is active the controller will revert back to the primary RADIUS.
- D. RADIUS requests will be sent to the secondary RADIUS server until the secondary fails to respond.

**Answer: B**

Explanation:

In passive fallback mode for RADIUS, when the primary RADIUS server fails, the controller will start using the secondary RADIUS server. The default timer settings include an inactive timer, which, upon expiration, prompts the controller to attempt to send RADIUS requests back to the primary server. If the primary server is responsive, the controller will resume sending requests to it.

#### NEW QUESTION # 150

More people are working from home, so an engineer must configure OEAPs to support the users. The security team already configured NAT with a public IP address that points to the internal WLC IP address. The APs also have been configured with the public WLC IP address, but APs cannot join the controller yet. Which action resolves this issue?

- A. Create an ACL in WLC to accept the OEAPs.
- B. Configure the public WLC IP address on the home router.
- **C. Enable NAT on the WLC to configure the public IP address.**
- D. Configure the internal WLC IP address on the OEAPs.

**Answer: C**

Explanation:

You need to select the management interface on the WLC and click the NAT checkbox. Then enter the public NAT IP. In this case it would be the public NAT IP that the security team created.

#### NEW QUESTION # 151

What is the maximum time range that can be viewed on the Cisco DNA Center issues and alarms page?

- A. 3 hours
- **B. 7 days**
- C. 24 hours
- D. 3 days

**Answer: B**

Explanation:

□  
(7 Days is the max, you can select)

#### NEW QUESTION # 152

Refer to the exhibit.

An engineer deployed a Cisco WLC using local EAP. Users who are configured for EAP-PEAP cannot connect to the network. Based on the local EAP debug controller provided, why is the client unable to connect?

- A. The Cisco WLC is configured for the incorrect date.
- **B. The client is failing to accept certificate.**
- C. The user is using invalid credentials.
- D. The Cisco WLC local EAP profile is misconfigured

**Answer: B**
