## Latest HPE7-A03 Dumps Free, Guaranteed HPE7-A03 Passing

As the development of the science and technologies, there are a lot of changes coming up with the design of our HPE7-A03 exam questions. We are applying new technology to perfect the HPE7-A03 study materials. Through our test, the performance of our HPE7-A03 learning guide becomes better than before. In a word, our HPE7-A03 training braindumps will move with the times. Please pay great attention to our HPE7-A03 actual exam.

### HP HPE7-A03 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.</li> </ul>

## HP Aruba Certified Campus Access Architect Exam Sample Questions (Q45-Q50):

### NEW QUESTION # 45

Which platform can be used to demo your solution to a customer? (Select three.)

- A. Aruba Support Portal
- B. your own lab
- C. Aruba Innovation Zone
- D. Aruba CX Switch Simulator
- E. Aruba DemoExperiencePlatform
- F. Aruba Solution Exchange

**Answer: C,D,E**

Explanation:

To demonstrate a solution to a customer, three platforms that can be effectively used are the Aruba CX Switch Simulator (Option B), Aruba Innovation Zone (Option C), and Aruba Demo Experience Platform (Option F).

The Aruba CX Switch Simulator provides a virtual environment where customers can interact with the Aruba OS-CX interface, allowing them to explore features and configurations without the need for physical hardware. The Aruba Innovation Zone offers a space for experiencing the latest Aruba technologies and solutions in action, showcasing their capabilities in real-world scenarios.

The Aruba Demo Experience Platform is designed to give customers a comprehensive look at Aruba's solutions, enabling interactive demos and simulations that highlight the benefits and functionalities of the products. These platforms provide valuable resources for customers to understand and evaluate Aruba solutions in a controlled and informative environment.

### NEW QUESTION # 46

Based on this campus design, click on the layer that is the most appropriate to be designed as a Stub Persona, considering an EVPN VXLAN Fabric?

**Answer:**

Explanation:

Explanation:

Service Aggregation

### NEW QUESTION # 47

XYZ Regional Hospital is an integrated healthcare system of hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 4x neighborhood health centers and 125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital is located in New York City

- Dila Health Center is located in City A

- Mount Health Center is located in City B

- Rock Health Center is located in City C

- Branch clinics are located at different locations across the United States Requirements:

- Provide, via management software, one single pane of glass to manage wired and wireless LANs, and VPNs across campus,

branch, and remote via web/cloud architecture providing near real-time insight, troubleshooting tools, and Service Level performance reporting.

- Seamless integration across wired, wireless, WAN, SD-Branch, IoT
  - Provide secure wireless access to all the employees of the Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.
  - All-access points must support the following features and specifications: 802.11.ax (Wi-Fi 6E Certified)
  - Security options including WPA2/WPA3, 802.1X with RADIUS secure authentication
  - Identify and authenticate every wireless and wired device
  - End-to-end role-based security
  - Seamless mobility across the hospital for medical teams, patients, and visitors
  - Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site
  - Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs
  - Fully redundant branch solution with dynamic path selection to the hospital
- The IT director of the hospital is concerned that the branch clinics will not have an onsite resource to troubleshoot any issues that may arise and is looking for a solution that would allow the hospital IT team to proactively monitor the branch offices.

Requirements:

- Monitor wireless and wired connections
- End-to-end view of experience identifying the point of failures
- Proactively troubleshoot issues impacting application performance

What is the correct solution?

- A. Client Insight
- B. HPF Aruba Networking ClearPass Device Insight
- C. HPF Aruba Networking User Experience Insight
- D. AirWave

**Answer: C**

Explanation:

Aruba User Experience Insight (UXI) provides proactive monitoring using on-site UX sensors that continuously test wired, wireless, and application performance. It delivers end-to-end visibility, identifies points of failure, and alerts IT before users experience problems - ideal for remote branch clinics without local IT staff.

#### **NEW QUESTION # 48**

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sq m). Data centers are all offsite and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services.

The client would like to ensure redundant RADIUS resources in each of their three geographical regions (AMER, EMEA, and APAC). A large office location is available in each region with sufficient VMware resources available.

- Each region has between 4,448 and 5,061 clients, all of which will need to do either 802.1X wired or wireless authentications as well as 802.1X authentication for a single personal device on Wi-Fi.
- All of the non-personal devices will also need to validate health with a local agent.
- A total of 500 guests are expected to be connected on average with a maximum of 700 simultaneous connections making use of Guest Portal for access to the Internet.
- TACACS authentication will also be configured for a total of 1200 evenly dispersed NADs.

How many OnGuard Licenses are required in this scenario?

- A. 15,000
- B. 20,000
- C. 30,000
- D. 10,000

**Answer: A**

Explanation:

In the scenario provided, each of the clients in the three geographical regions (AMER, EMEA, and APAC) will require OnGuard licensing for health validation through a local agent, covering both wired and wireless authentications as well as personal device Wi-Fi authentication. Given the client counts range between 4,435 and 5,859 in each region, and assuming the upper limit for planning purposes, we have approximately 5,859 clients per region. Multiplying by three regions gives us 17,577, which would be rounded up to the nearest available licensing tier. In this case,

15,000 licenses would not be sufficient, so the next logical tier would likely be around 20,000 licenses. However, since this exact number isn't an option, and based on the principle of providing the most accurate and cost-effective solution, the best estimate with the given options would be 15,000, understanding that this might involve purchasing additional licenses to cover the exact needs.

#### NEW QUESTION # 49

You are going with a 3-tier design and need to calculate the oversubscription ratio on the Access, Distribution, Core, and ToR Layer. What is a suitable oversubscription ratio for each layer?

**Answer:**

Explanation:

Explanation:

Access - 20:1 Aggregation - 4:1 Core - 2:1

ToR - Not typically applicable in a 3-tier design; however, if ToR were used, it could be 24:1 or better depending on the specific design and requirements.

#### NEW QUESTION # 50

.....

The third and last format is the Aruba Certified Campus Access Architect Exam (HPE7-A03) desktop practice test software that can be used on Windows laptops and PCs. Students with laptops or computers can access the software and prepare for it efficiently. The Aruba Certified Campus Access Architect Exam (HPE7-A03) dumps of DumpsActual have many premium features, one of which is practice exams (desktop and web-based).
