## SAP C-ACDET-2506 Dumps Deutsch & C-ACDET-2506 Lernressourcen

Wollen Sie an SAP C-ACDET-2506 Zertifizierungsprüfung teilnehmen? Sorgen Sie sich um diese Prüfung? Wünschen Sie sich an der C-ACDET-2506 Prüfung melden aber Fürchten Sie Misserfolg an dieser Prüfung? Das macht nichts, melden Sie getrost an. Wenn Sie Zertpruefung Prüfungsunterlagen benutzen, sind keine Probleme in Ihrer Prüfung vorhanden. Obwohl Sie keine Zuversicht dieser Prüfung haben, können Sie einmal diese Prüfung bestehen, wenn Sie C-ACDET-2506 Dumps von Zertpruefung benutzen. Glauben Sie nicht? Kommen Sie bitte zu Zertpruefung und Informieren Sie sich. Außerdem können Sie einen Teil der SAP C-ACDET-2506 Dumps probieren. Damit können Sie finden, dass die Prüfungsunterlagen die Garantie für den Erfolg der SAP C-ACDET-2506 Prüfung sind.

## SAP C-ACDET-2506 Prüfungsplan:

Thema	Einzelheiten

Thema 1	<ul style="list-style-type: none"> <li>• <b>Field Configuration:</b> This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li> </ul>
Thema 2	<ul style="list-style-type: none"> <li>• <b>Project Overview, Roles and Responsibilities:</b> This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li> </ul>
Thema 3	<ul style="list-style-type: none"> <li>• <b>Deploy and Migration:</b> This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li> </ul>

## SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite C-ACDET-2506 Prüfungsfragen mit Lösungen (Q19-Q24):

### 19. Frage

What is the key role of the SAP Deployment Lead assigned to the project?

- A. To act as the liaison between the customer and SAP Support in resolving technical issues and manage customer escalations
- B. To perform configuration changes required to the SAP Ariba Strategic Sourcing suite solutions
- C. To advise the customer and partner in solution configurations
- D. To test and validate the solution prior to go-live

**Antwort: A**

Begründung:

The SAP Deployment Lead acts as the primary liaison between the customer and SAP Support, managing technical issues, escalations, and coordination during the deployment lifecycle. They oversee environment readiness, migration activities, and issue resolution. Advising on configurations is typically the Functional Lead's role, configuration changes are done by consultants, and testing is led by the customer or testing teams. The Deployment Lead focuses on technical project management and communication.

### 20. Frage

Which of the following is NOT mentioned as a configuration type migrated by the Intelligent Configuration Manager?

- A. AMLExtension - AML customizations such as custom fields
- B. DynamicForm - custom form templates (dForms)
- C. Template - project templates such as Contract templates
- D. SupplierContact - contacts for the suppliers

**Antwort: D**

Begründung:

The Intelligent Configuration Manager (ICM) migrates configuration types such as DynamicForms (dForms), AML Extensions (custom fields and enumerations), and Templates (contract or project templates). However, SupplierContact data, which is master or transactional data, is not migrated through ICM because ICM focuses on configuration migration, not operational or transactional data. Supplier contact information is managed separately and must be migrated using appropriate master data processes.

### 21. Frage

Which read-only files show the key and English translations for custom field labels and helptips?

- A. The customerResource files that can be exported through ICM
- **B. The JSON files that can be exported through AML & Translations Upload**
- C. The JSON files that can be exported through ICM
- D. The customerResource files that can be exported through AML & Translations Upload

**Antwort: B**

Begründung:

SAP Ariba stores translations for custom field labels and help tips in JSON files exported and imported via AML (Advanced Metadata List) & Translations Upload. These JSON files contain key-value pairs representing the translation keys and their English or localized strings. This mechanism supports language management and bulk updates of translated content.

ICM exports configuration bundles but does not handle translation files in JSON format. CustomerResource files are not the standard format for translation export/import.

Using AML & Translations Upload allows administrators to maintain and update translations across multiple languages efficiently, ensuring consistent user experience in multi-lingual deployments.

### 22. Frage

Which of the following can be used to define relation types and establish a custom relationship? (Select 2 correct answers)

- A. A custom Form Template such as vrealm\_1936.formDoc\_18697.LessonsLearned
- B. A custom Enumeration such as Contracts\_Contract\_Type
- **C. A standard class such as ariba.basic.core.CommodityCode**
- **D. A custom Flex Master Data Template such as vrealm\_1936.fmd\_58984.Hospital**

**Antwort: C,D**

Begründung:

In SAP Ariba, relation types can be defined using custom Flex Master Data (FMD) templates and standard classes such as ariba.basic.core.CommodityCode. These define valid relationships between fields, allowing dependent picklists or filtering logic in forms. Custom enumerations are static lists and are not used to establish dynamic relations, and custom form templates are for form layouts and do not define data relationships.

### 23. Frage

Which of the following considerations are important when creating custom fields? Note: There are 2 correct answers to this question.

- **A. When a field has been created and published, that field type has been consumed from the number of available fields on the class**
- **B. There's a limit to the number of fields, by data type, that can be added to a class**
- C. The data type of a field can be dynamically changed, depending on data type availability
- D. Published field changes can be reverted via Un-publish to free up memory

**Antwort: A,B**

### 24. Frage

.....

Was wissen Sie über die SAP C-ACDET-2506 Zertifizierungsprüfungen? Als eine sehr populäre SAP Zertifizierungsprüfung ist diese Prüfung sehr wichtig. Aber wenn Sie für die bessere Vorbereitung der SAP C-ACDET-2506 Prüfungen die Schulungsunterlagen finden, ist es nicht leicht für Sie eine sehr ausgezeichnetes Nachschlagebuch finden. Und Was können Sie machen? Es macht nichts. Wir Zertprüfung Ihre Wünsche kennen und Ihre Bedürfnisse erfüllen bei Angeboten der besten Prüfungsfragen und Antworten zur SAP C-ACDET-2506 Zertifizierung.
