## Sample PL-600 Test Online, Reliable PL-600 Cram Materials

We always adhere to the principle of “mutual development and benefit”, and we believe our PL-600 practice materials can give you a timely and effective helping hand whenever you need in the process of learning our PL-600 study braindumps. For we have been in this career over ten years and we are good at tracing the changes of the PL-600 guide prep in time and update our exam dumps fast and accurately.

### Microsoft Power Platform Solution Architect Sample Questions (Q112-Q117):

#### NEW QUESTION # 112

Hotspot Question

A company plans to use Microsoft Power Platform.

The company needs to understand how API requests are used so that its solution can be designed within the API limits granted by Microsoft. The company requires the following information:

- How API limits are allocated
- Which Microsoft Power Platform components count toward its API limits
- Which Power Automate flow steps count toward API limits

You need to describe the API allocation for each design consideration.

Which API allocations should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

**Answer:**

Explanation:

☐

#### NEW QUESTION # 113

You need to recommend solutions for the organization's technical challenges.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

**Answer:**

Explanation:

☐ Explanation:

☐

Box 1: Power Automate

Self-service purchase is available for Power Platform (Power BI, Power Apps, and Power Automate), Project, and Visio.

Box 2: Azure Active Directory B2B

Scenario: First Up Consulting recruits information technology (IT) workers for temporary or permanent positions at client companies.

Azure Active Directory (Azure AD) business-to-business (B2B) collaboration is a feature within External Identities that lets you invite guest users to collaborate with your organization. With B2B collaboration, you can securely share your company's applications and services with guest users from any other organization, while maintaining control over your own corporate data. Work safely and securely with external partners, large or small, even if they don't have Azure AD or an IT department. A simple invitation and redemption process lets partners use their own credentials to access your company's resources.

Note, Scenario:

\* Workers must be able to sign into a portal by using their own email address. Workers must be required to use a secure method of authentication to be able to view their data.

\* User security roles must be customized to ensure that users are able to interact only with the specific data in which they need access.

Box 3: Dynamics 365 Field Service

Dynamics 365 Field Service functionality include:

An interactive schedule board helps dispatchers assign work orders to the best resources based on location, availability, skill set, priority, and more. This is done via a manual drag-and-drop method, a semi-automated scheduling assistant, or fully automated with Resource Scheduling Optimization.

The schedule board displays each resource--whether an employee, contractor, or equipment--and their scheduled work orders.

Resources and their assigned jobs are also displayed on a map along with routes and traffic patterns in real time.

<https://docs.microsoft.com/en-us/dynamics365/field-service/overview>

#### NEW QUESTION # 114

You are designing a self-service portal for a company.

The portal must meet the following requirements:

Customers must be able to submit and review cases.

Customers must be able to chat with service representatives in near real time.

Allow service representatives to select cases from queues and use knowledge articles to resolve customer concerns.

You need to recommend solutions for the company that do not require custom development.

Which three apps or services should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Dynamics 365 Field Service
- B. Dynamics 365 Customer Service
- C. Customer self-service portal
- D. Customer Insights
- E. Omnichannel for Customer Service

**Answer: B,C,E**

Explanation:

Reference:

#### NEW QUESTION # 115

A local bank uses Microsoft Power Platform apps to store customer data.

The bank IT director discovers that all employees can see the social security numbers of their customers. The IT team does not understand how field-level security works and needs help with the design.

You need to recommend a solution to the bank that meets the following requirements:

\* The system must restrict access to customer social security numbers to the vice president of finance only.

\* The vice president of finance must be able to read and update customer social security numbers.

Which two actions should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point

- A. Set the values for the read permission and for the update permission for social security number to yet
- B. Enable field-level security for the social security number column.
- C. Create a held-level security profile.
- D. Enable field-level security for the member table.

**Answer: A,B,D**

Explanation:

Field-level security is managed by the security profiles. To implement field-level security, a system administrator performs the following tasks.

\* Enable field security on one or more fields for a given entity.

\* Associate one more existing security profiles, or create one or more new security profiles to grant the appropriate access to specific users or teams.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/field-level-security>

#### NEW QUESTION # 116

You need to ensure that the solution meets the data security and compliance requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

## Answer:

Explanation:

Topic 2, Relecloud

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

Relecloud provides regional air service in North America. The company uses a variety of systems, apps, and services to manage the business. You are hired to design a new solution to manage passenger information, reservations, and maintenance.

Current environment

The company uses Microsoft Office 365.

The company has a custom app for managing and tracking passenger luggage. The app uses Microsoft Dataverse.

For flights longer than four hours, passengers receive a meal. Customers can select a meal when they make a reservation and can save the meal choices as a customer preference.

The company offers two types of meals: standard and vegetarian. Meal types can be temporarily unavailable. The airline is considering offering other meal types, such as gluten-free and low-sodium options.

The company uses paper-based reservation checklists to help ensure that all the steps for a reservation are complete.

The company uses vendors to service aircraft.

Environment

Ensure that employees can sign in to all Microsoft apps by using one set of credentials per employee.

Minimize the use of third-party products and custom development.

Reduce customer support call volumes by having the system automatically resolve common issues.

The security rule for agents must contain the privileges in the default Customer Service Representative security role.

Log issues as cases. The case form must show variable sections based on the case type. Include a custom entity named Seats and grant agents access to the entity.

Application use layout should be role specific.

Agents

You must standardize the format used by agents to enter customer phone numbers.

Agents need a solution to replace paper reservation checklists.

Agents need dashboards to show a current count of all reservations on the entity.

Agents need a way to track reservation issues.

Agents need a visual indicator in the interface to determine the reservation step to provide a seamless customer experience.

Agents need different versions of cancellation policies to send customers. One version must be controllable within the system.

Agents need to view which pieces of luggage match to each passenger, and then need to add the total on the passenger record.

IT

IT staff needs a mobile solution to see IT cases at the top of the menu since this is their primary focus.

IT staff needs a system that is easy to navigate to active cases.

IT specialists want to design Power BI reports. They need to understand the underlying table relationships of the system.

IT specialists need a solution that is visual rather than text-based so they can quickly complete their tasks.

Management

Management requires paginated reports for stakeholders.

Management wants to provide frequent flyers with better service when the flyers call.

Managers need to see all customer dashboards at the top of their menu on their mobile device.

Maintenance

Maintenance supervisors must not have access to Dynamics 365 Customer Service. The supervisors must be able to communicate with the contracts team about contracts.

Aircraft maintenance vendors must have only view and upload privileges to their invoices and receipts.

Contracts with maintenance companies must be stored in Dynamics 365 Customer Service.

## NEW QUESTION # 117

.....

Passing an exam requires diligent practice, and using the right study Microsoft Certification Exams material is crucial for optimal
