### 問題 #34

Which of the following networking schemes does Huawei's intelligent computing network offer to support ultra-broadband 400G for the networking requirements of AI models? (Select all that Apply)

- A. Two-layer Clos networking of modular and fixed switches
- B. Three-layer networking of modular switches
- C. Two-layer Clos networking of fixed switches
- D. Two-layer Clos networking of modular switches

答案: A,D

### 解題說明:

Huawei's intelligent computing network, used to support large-scale AI model training, uses ultra-broadband 400G and is primarily based on Clos networking for high-speed, non-blocking traffic:

A: Two-layer Clos networking of modular switches: Enables high-density east-west traffic.

C: Two-layer Clos networking of modular and fixed switches: Offers cost-effective scaling and flexibility.

B: Fixed-only Clos and D. Three-layer modular topologies are not typically used in Huawei's AI-ready designs due to limited scalability or inefficiency in AI workload patterns.

### 問題 #35

Which of the following options cannot be queried on the Product Details tab of the SCT?

- A. View of the key features of products
- B. View of the pictures of products
- C. View the integration service of products
- D. View the lifecycle of products

答案: C

解題說明:

On the Product Details tab in SCT, users can typically:

View key features of the product

See product images

Check lifecycle status (e.g., GA, EOM, EOS)

However, integration services (such as installation support or bundled services) are not visible on the Product Details tab. These are accessed in solution or service configuration sections of SCT.

### 問題 #36

Which of the following are core capabilities of Huawei's data center network solution? (Select all that apply)

- A. One network for diverse computing: zero service interruptions
- B. One map for intelligent O&M: zero management concerns
- C. Ultra-stable reliability: all-scenario assurance, sustainable computing power
- D. One platform for simplified deployment: zero configuration errors

答案: A,B,C,D

解題說明:

Huawei's Data Center Network Solution, part of the CloudFabric architecture, highlights four core capabilities:

A: Ultra-stable reliability - Ensures 99.999% availability, delivering sustainable computing and fault-tolerant network infrastructure across various failure scenarios.

B: One network for diverse computing - Seamlessly supports diverse workloads (e.g., HPC, AI, traditional computing) with non-blocking fabric and intelligent forwarding, ensuring zero interruptions.

C: One map for intelligent O&M - Uses Huawei's iMaster NCE to provide full-network visibility, proactive alarms, and AI-driven assurance, addressing O&M concerns.

D: One platform for simplified deployment - Enables centralized automation with zero-touch provisioning, minimizing configuration errors.

### 問題 #37

Which of the following is not a technical field of campus networks?

- A. WAN
- B. Wireless LAN (WLAN)

- C. Wired LAN (switching network)
- D. SD-WAN

答案： A

解題說明：

Huawei defines the core technical fields of campus networks as:

WLAN (Wireless LAN)

Wired LAN (Switching Network)

SD-WAN, when used for branch interconnection within enterprise campuses

WAN, on the other hand, is a broader carrier-class infrastructure and not specifically categorized as a campus network technology. It refers to long-distance, backbone, or ISP-level connectivity beyond the scope of typical enterprise campus deployments.

### 問題 #38

Which of the following lifecycles can be viewed in the SCP? (Select all that Apply)

- A. Components or part numbers
- B. Products
- C. Solutions
- D. BOQs

答案： A,B

解題說明：

In the SCP (Solution Configuration Platform), you can view the lifecycle statuses of:

A: Components/part numbers: You can see information like General Availability (GA), End of Sale (EOS), End of Maintenance (EOM), and End of Support (EOS).

C: Products: Product lifecycle status, including planned phase-out timelines, is also available.

B: Solutions and D. BOQs (Bill of Quantities) are not associated directly with lifecycle management. BOQs are outcome documents generated after configuration, and solutions are broader design packages.
