

JN0-105 Complete Exam Dumps, JN0-105 Valid Test Online

What's more, part of that ValidTorrent JN0-105 dumps now are free: <https://drive.google.com/open?id=1qrs6kRWKq3e-92ft7mYAxnasbcx8fYAk>

There are lots of benefits of obtaining a certificate, it can help you enter a better company, have a high position in the company, improve your wages etc. Our JN0-105 test materials will help you get the certificate successfully. We have a channel to obtain the latest information about the exam, and we ensure you that you can get the latest information about the JN0-105 Exam Dumps timely. Furthermore, you can get the downloading link and password for JN0-105 test materials within ten minutes after purchasing.

Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Junos OS Fundamentals: It covers concepts, benefits, and functionality of the core elements of the Junos OS.
Topic 2	<ul style="list-style-type: none">User Interfaces: This topic delves into identifying the concepts, operation, or functionality of the Junos user interface.
Topic 3	<ul style="list-style-type: none">Operational Monitoring and Maintenance: Different methods of monitoring or maintaining Junos devices are identified in this topic. Lastly, it discusses monitoring or maintenance procedures for a Junos device.
Topic 4	<ul style="list-style-type: none">Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.

JN0-105 Valid Test Online, Latest Braindumps JN0-105 Book

ValidTorrent's Juniper JN0-105 practice exam software tracks your performance and provides results on the spot about your attempt. In this way, our Juniper JN0-105 simulation software encourages self-analysis and self-improvement. Questions in the Juniper JN0-105 Practice Test software bear a striking resemblance to those of the real test. This Juniper JN0-105 practice exam software is easily accessible on all Windows laptops and computers.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q63-Q68):

NEW QUESTION # 63

What are two functions of the Routing Engine? (Choose two.)

- A. It processes all management traffic.
- B. It runs the Junos operating system.
- C. It processes transit traffic.
- D. It evaluates firewall filters for transit traffic.

Answer: A,B

Explanation:

The Routing Engine (RE) in Junos OS has several critical functions, including processing all management traffic (A) and running the Junos operating system (B). The RE handles system management tasks, user interfaces, system services, and routing protocol processes. It does not directly process transit traffic or evaluate firewall filters for transit traffic, as these tasks are handled by the Packet Forwarding Engine (PFE).

NEW QUESTION # 64

Click the Exhibit button.

Referring to the exhibit, OSPF has three export policies that match different static route prefixes. The 10.10.10.0/24 static route does not match any terms in the policy1 routing policy.

What happens next in this scenario?

- A. The static route is rejected by the policy1 routing policy.
- B. The static route is rejected by the default routing policy.
- C. The static route is evaluated by the policy3 routing policy.
- D. The static route is evaluated by the policy2 routing policy.

Answer: D

Explanation:

In Junos, when multiple policies are applied to a routing protocol for route export, the routes are evaluated in the order in which the policies are listed. In the exhibit, the OSPF configuration has three export policies listed: policy1, policy2, and policy3. The static route 10.10.10.0/24 does not match any terms in policy1; therefore, it is not rejected by policy1 but is instead passed on to the next policy in the sequence, which is policy2.

If the static route matches a term in policy2 that permits the route, it will be exported into OSPF. If it does not match in policy2, it will then be evaluated by policy3. If there is no match in policy3 as well, and assuming there are no more policies listed, the route would then be subject to the default routing policy behavior, which typically rejects the route unless an explicit accept statement is present in the policies.

NEW QUESTION # 65

Exhibit

Exhibit

[edit]

root# set system host-name TEST_DEVICE [edit]

root# commit

[edit]

'system'

Missing mandatory statement: 'root-authentication' error: commit failed: (missing mandatory statements)

[edit] root#

You are configuring a new device.

Which action solves the error shown in the exhibit?

- A. loading the factory-default configuration
- B. reinstalling Junos
- C. configuring a password for the root account
- D. configuring a non-root username and password

Answer: C

Explanation:

The error message in the exhibit indicates that the root-authentication statement is missing, which is mandatory for committing the configuration. In Junos OS, it is required to set a password for the root account to commit any configuration changes. This is a

security measure to ensure that unauthorized users cannot access the device's configuration mode. To solve the error shown in the exhibit, configuring a password for the root account is necessary. This can be done by using the `set system root-authentication plain-text-password` command, after which the user will be prompted to enter a new password for the root account.

NEW QUESTION # 66

When considering routing tables and forwarding tables, which two statements are correct? (Choose two.)

- A. The routing table is used by the RE to select the best route.
- B. The forwarding table stores all routes and prefixes from all protocols.
- C. The forwarding table is used by the RE to select the best route.
- D. The routing table stores all routes and prefixes from all protocols.

Answer: A,D

Explanation:

The routing table and forwarding table play distinct roles in a Junos OS device. The correct answers are A and D: The routing table (A) is used by the Routing Engine (RE) to select the best route among all the learned routes, while the routing table (D) stores all routes and prefixes learned from all routing protocols. The forwarding table, in contrast, contains only the active routes chosen by the RE and is used by the Packet Forwarding Engine for actual packet forwarding.

NEW QUESTION # 67

Click the Exhibit button.

Referring the exhibit, what does the highlighted number indicate?

- A. route preference is 5
- B. cost is 5
- C. hop count is 5
- D. metric is 5

Answer: A

Explanation:

In the exhibit shown, the highlighted number next to the route type (Static) within the square brackets indicates the route preference, also known as the administrative distance. In Junos, the route preference is a value that determines the priority of the route source. Lower numbers indicate a higher priority when the routing table is being calculated. The route preference is used to select the best route when multiple paths to the same destination exist from different routing sources. The number 5 is unusually low for a static route by default, suggesting it has been manually configured to override other route types.

NEW QUESTION # 68

.....

If you want to practice the JN0-105 exam questions with different electronic devices. We believe our APP version of JN0-105 training braindump will be very convenient for you. In addition, the online version of our JN0-105 training materials can work in an offline state. If you buy our JN0-105 Study Guide, you have the chance to use our JN0-105 study materials for preparing your exam when you are in an offline state. We believe that you will like the online version of our JN0-105 exam questions.
