

Network Appliance NS0-005 Practice Tests - Latest NS0-005 Test Guide

[Pass Network Appliance NS0-005 Exam | Latest NS0-005 Dumps & Practice Exams - Cert007](#)

communication with the clients using NFS or SMB protocols. ONTAP software also provides features such as data protection, efficiency, security, and performance for NAS workloads.
References = NetApp ONTAP, Provision NAS storage for both Windows and Linux using both NFS and SMB

6. Which two NetApp products offer hardware encryption? (Choose two.)

- A. NetApp Storage Encryption (NSE)
- B. NVMe self-encrypting drives (SED)
- C. NetApp Aggregate Encryption (NAE)
- D. NetApp Volume Encryption (NVE)

Answer: A

Explanation:

NetApp Storage Encryption (NSE) and NVMe self-encrypting drives (SED) are two NetApp products that offer hardware encryption. Hardware encryption is a method of encrypting data at the disk level using a hardware-accelerated mechanism. NSE requires all drives in an HA pair to be purpose-built, self-encrypting drives. These drives perform the data encryption themselves through a hardware-accelerated mechanism. Because of the hardware acceleration, NSE systems usually outperform NVE systems when encrypting data¹. NVMe self-encrypting drives (SED) are a type of NSE drives that use the NVMe protocol to provide high performance and low latency. NVMe SEDs are supported on select NetApp AFF systems².

7. Which NetApp BlueXP product enables a customer to provide read and write access to remote Windows servers from a centralized datastore?

- A. BlueXP copy and sync
- B. BlueXP edge caching
- C. BlueXP tiering
- D. Cloud Volumes ONTAP

Answer: B

Explanation:

BlueXP edge caching is a NetApp BlueXP product that enables a customer to provide read and write access to remote Windows servers from a centralized datastore. BlueXP edge caching allows you to cache data from a BlueXP volume or a Cloud Volume ONTAP system on a local Windows server, which improves the performance and availability of your applications. You can also sync the cached data back to the source volume, ensuring data consistency and protection.

References = BlueXP edge caching overview, BlueXP edge caching documentation, BlueXP edge caching: Accelerate access to your data

8. A customer wants to use cloud storage as part of their data strategy. Their existing storage is a mixture of NFS and SMB workloads. The customer wants a managed service to help provision these resources. Which solution should the customer choose?

4 / 5

What's more, part of that TestPDF NS0-005 dumps now are free: https://drive.google.com/open?id=1rT5mEeeV_HIWqg3G8kb8EZvg6-JSbXXH

This format is for candidates who do not have the time or energy to use a computer or laptop for preparation. The NS0-005 PDF file includes real NS0-005 questions, and they can be easily printed and studied at any time. TestPDF regularly updates its PDF file to ensure that its readers have access to the updated questions.

One of the best features of TestPDF exam questions is free updates for up to 1 year. The TestPDF has hired a team of experienced and qualified Network Appliance NS0-005 exam trainers. They update the NS0-005 exam questions as per the latest NS0-005 Exam Syllabus. So rest assured that with the TestPDF you will get the updated NS0-005 exam practice questions all the time. Try a free demo if you to evaluate the features of our product. Best of luck!

The Best Network Appliance NS0-005 Practice Tests & Perfect TestPDF - Leading Offer in Qualification Exams

We are committed to designing a kind of scientific NS0-005 study material to balance your business and study schedule. With our NS0-005 exam guide, all your learning process includes 20-30 hours. As long as you spare one or two hours a day to study with

our laTest NS0-005 Quiz prep, we assure that you will have a good command of the relevant knowledge before taking the NS0-005 exam. What you need to do is to follow the NS0-005 exam guide system at the pace you prefer as well as keep learning step by step.

Network Appliance NS0-005 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Data Storage Software: This domain focuses on NetApp's core software platforms including SANtricity, ONTAP, and StorageGRID, along with the data management tools used to operate these systems.
Topic 2	<ul style="list-style-type: none">• Intelligent Data Infrastructure: This domain addresses advanced solutions including cyber resiliency, data mobility, hybrid cloud protection, storage architectures, and flexible consumption models for NetApp.
Topic 3	<ul style="list-style-type: none">• Infrastructure: This domain covers foundational concepts including basic infrastructure components, data management principles, virtualization technologies, and AI fundamentals relevant to storage environments.

Network Appliance NetApp Technology Solutions Professional Exam Sample Questions (Q177-Q182):

NEW QUESTION # 177

Which two data protection features are built into NetApp Element software? (Choose two.)

- A. volume snapshots
- B. SnapLock software
- C. RAID DP
- D. real-time replication between clusters

Answer: A,D

NEW QUESTION # 178

Which NetApp service protects Microsoft Exchange Online, Microsoft SharePoint Online, Microsoft OneDrive, and Microsoft Teams workloads?

- A. NetApp SaaS Backup
- B. NetApp Cloud Backup Service
- C. NetApp Snapshot
- D. NetApp SnapMirror

Answer: A

NEW QUESTION # 179

A customer wants to modernize the SAN environment and transition iSCSI-based workloads to NVMe-over-TCP. Which NetApp storage systems should be used to meet these requirements?

- A. Element software
- B. SANtricity OS
- C. ONTAP software
- D. StorageGRID

Answer: C

NEW QUESTION # 180

A company has a large data set that is used at many branch offices worldwide. An administrator needs a solution to save frequently used data locally and centrally lock files for real-time collaboration.

Which two NetApp solutions can be used to meet these requirements? (Choose two.)

- A. SnapLock Enterprise
- B. Cloud Volumes Service
- C. BlueXP copy and sync
- **D. BlueXP edge caching**
- E. FlexCache

Answer: D

NEW QUESTION # 181

What owns the file system while provisioning NAS?

- A. LUN
- B. host
- **C. volume**
- D. ONTAP software

Answer: C

Explanation:

A). Volume: The correct answer is 'Volume'. In a NAS environment, file systems are typically managed within volumes. A volume is a logical container in a storage system that owns the file system. It provides the environment in which files and directories are created and managed. When you provision NAS storage, you create volumes that manage the file systems and provide network access to them, typically using protocols like NFS or CIFS/SMB.

Let's break down why the other options are not correct:

B). LUN (Logical Unit Number): LUNs are more relevant in a SAN (Storage Area Network) environment where block storage is used. LUNs represent a logical unit of storage and are not directly associated with file systems in the context of NAS.

C). ONTAP software: While the ONTAP software by NetApp provides the overall management and functionality of the storage system, it does not directly "own" the file system. It facilitates the creation and management of volumes, but the file system is specifically owned by the volume itself within the ONTAP architecture.

D). Host: In NAS configurations, the host typically refers to the client or server accessing the storage. The host does not own the file system; it simply accesses the NAS volumes over the network.

Therefore, the answer is A. Volume.

NEW QUESTION # 182

.....

You will feel convenient if you buy our product not only because our NS0-005 exam prep is of high pass rate but also our service is also perfect. What's more, our update can provide the latest and most useful NS0-005 exam guide to you, in order to help you learn more and master more. We provide great customer service before and after the sale and different versions for you to choose, you can download our free demo to check the quality of our NS0-005 Guide Torrent before you make your purchase. You will never be disappointed for buying our NS0-005 exam questions.
