

# Valid Microsoft DP-100 Mock Test & DP-100 Latest Test Experience

BTW, DOWNLOAD part of Exam4Tests DP-100 dumps from Cloud Storage: <https://drive.google.com/open?id=1j4MyeIVVFnBied2t0gXkSWhST3N8CVBY>

The Designing and Implementing a Data Science Solution on Azure (DP-100) Desktop-based practice Exam is ideal for applicants who don't have access to the internet all the time. You can use this DP-100 simulation software without an active internet connection. This DP-100 software runs only on Windows computers. Both practice tests of Exam4Tests i.e. web-based and desktop are customizable, mimic Microsoft DP-100 Real Exam scenarios, provide results instantly, and help to overcome mistakes.

## Microsoft DP-100 Practice Test Questions, Microsoft DP-100 Exam Practice Test Questions

The Microsoft DP-100: Designing & Implementing a Data Science Solution on Azure exam evaluates the skills and knowledge of the professionals in a range of technical tasks. These include training models and running experiments, setting up an Azure ML workspace, consuming and deploying models, and managing & optimizing models. This test is the only qualifying exam that leads to the Microsoft Certified: Azure Data Scientist Associate certification.

Microsoft DP-100 Certification Exam is designed for data scientists who want to validate their skills in designing and implementing data science solutions on the Azure platform. DP-100 exam is ideal for professionals who have experience in programming languages such as Python and R, and are familiar with Azure Machine Learning, Azure Databricks, and other Azure services. The DP-100 exam is a great way to showcase your expertise in the field of data science and gain recognition as a certified data scientist.

## Microsoft DP-100 Latest Test Experience & DP-100 Practice Exam Pdf

Perhaps you still feel confused about our Designing and Implementing a Data Science Solution on Azure test questions when you browse our webpage. There must be many details about our products you would like to know. Do not hesitate and send us an email. Gradually, the report will be better as you spend more time on our DP-100 Exam Questions. As you can see, our system is so powerful and intelligent. What most important it that all knowledge has been simplified by our experts to meet all people's demands. All of our assistance is free of charge. We are happy that our small assistance can change you a lot. You don't need to feel burdened. Remember to contact us!

## Microsoft Designing and Implementing a Data Science Solution on Azure Sample Questions (Q90-Q95):

### NEW QUESTION # 90

You plan to use a Data Science Virtual Machine (DSVM) with the open source deep learning frameworks Caffe2 and Theano. You need to select a pre configured DSVM to support the framework. What should you create?

- A. Data Science Virtual Machine for Linux (Ubuntu)
- B. Data Science Virtual Machine for Windows 2016
- C. Data Science Virtual Machine for Linux (CentOS)
- D. Data Science Virtual Machine for Windows 2012
- E. Geo AI Data Science Virtual Machine with ArcGIS

**Answer: A**

Explanation:

Caffe2 and PyTorch is supported by Data Science Virtual Machine for Linux.

Microsoft offers Linux editions of the DSVM on Ubuntu 16.04 LTS and CentOS 7.4.

Only the DSVM on Ubuntu is preconfigured for Caffe2 and PyTorch.

<https://docs.microsoft.com/en-us/azure/machine-learning/data-science-virtual-machine/overview>

### NEW QUESTION # 91

You manage an Azure Machine Learning workspace named workspace1 by using the Python SDK v2.

The default datastore of workspace1 contains a folder named sample\_data. The folder structure contains the following content:

You write Python SDK v2 code to materialize the data from the files in the sample\_data folder into a Pandas data frame. You need to complete the Python SDK v2 code to use the MLTaWe folder as the materialization blueprint. How should you complete the code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

### NEW QUESTION # 92

You manage an Azure Machine Learning workspace. You have an environment for training jobs which uses an existing Docker image. A new version of the Docker image is available.

You need to use the latest version of the Docker image for the environment configuration by using the Azure Machine Learning SDK v2-What should you do?

- A. Use the create.or.update method to change the tag of the image.
- B. Use the Environment class to create a new version of the environment.
- C. Change the description parameter of the environment configuration.
- D. Modify the conda.file to specify the new version of the Docker image.

**Answer: B**

### NEW QUESTION # 93

You create a binary classification model to predict whether a person has a disease.

You need to detect possible classification errors.

Which error type should you choose for each description? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

Box 1: True Positive

A true positive is an outcome where the model correctly predicts the positive class Box 2: True Negative A true negative is an outcome where the model correctly predicts the negative class.

Box 3: False Positive

A false positive is an outcome where the model incorrectly predicts the positive class.

#### Box 4: False Negative

A false negative is an outcome where the model incorrectly predicts the negative class.

Note: Let's make the following definitions:

"Wolf" is a positive class.

"No wolf" is a negative class.

We can summarize our "wolf-prediction" model using a 2x2 confusion matrix that depicts all four possible outcomes:

Reference:

<https://developers.google.com/machine-learning/crash-course/classification/true-false-positive-negative>

#### NEW QUESTION # 94

You manage an Azure Machine Learning workspace named workspaces

You K v2 code to attach an Azure Synapse Spark pool as a compute target in workspaces The code must invoke the constructor of the SynapseSparkCompute class.

You need to invoke the constructor.

What should you use?

- A. pool URL of the Synapse Spark pool and a system-assigned name
- B. Synapse workspace web URL and Spark pool name
- C. Synapse workspace name and workspace web URL
- D. resource ID of the Synapse Spark pool and a user-defined name

**Answer: D**

#### NEW QUESTION # 95

.....

Preparing for the Designing and Implementing a Data Science Solution on Azure (DP-100) certification test can be a difficult task for candidates. They often face several challenges during their preparation for the Designing and Implementing a Data Science Solution on Azure (DP-100) exam, including fear, lack of updated DP-100 Exam Dumps, and time constraints. Fortunately, there is a solution to these challenges. Exam4Tests is a reliable website that provides genuine and updated DP-100 Practice Test.
