ISQI ISAQB Certified Professional for Software Architecture - Foundation Level Sample Questions (Q30-Q35):

NEW QUESTION # 30

Decide if the following statements are true or false. The performance of a system (response time or throughput) often competes with its ... K-Question. Assign all answers

Answer:

Explanation:

NEW QUESTION # 31

Concerning external interfaces, Postel's law suggests: "Be conservative in what you do, be liberal in what you accept from others." Assume that Postel's law has been consistently applied in your system. (Assign all answers.)

Answer:

Explanation:

NEW QUESTION # 32

Which statements with regard to project objectives and architectural objectives are true and which are false? (Assign all answers.)

Answer:

Explanation:

Explanation:

A) False B) True C) True D) False

A) Architectural objectives and project objectives need to be identical.

* This is false. Architectural objectives are concerned with the technical goals and quality attributes of the system, while project objectives are broader and include timelines, budgets, and overall project deliverables^{1,2}.

B) Most of the time, architectural objectives are of a more long-term nature than project objectives.

* This is true. Architectural objectives often focus on the sustainability and maintainability of the system, which are long-term considerations, whereas project objectives may be more immediate and focused on the project's completion^{1,2}.

C) Architectural objectives and project objectives need to be negotiated between the concerned parties.

* True. Both sets of objectives should align with the stakeholders' needs and the project's overall goals, and thus require negotiation to ensure that all parties' interests are addressed³.

D) Architectural objectives are a subset of project objectives.
