Trustable SOL-C01 Exam Sims to Obtain Snowflake Certification

We have to admit that the exam of gaining the SOL-C01 certification is not easy for a lot of people, especial these people who have no enough time. If you also look forward to change your present boring life, maybe trying your best to have the SOL-C01 certification is a good choice for you. Now it is time for you to take an exam for getting the certification. If you have any worry about the SOL-C01 Exam, do not worry, we are glad to help you. Because the SOL-C01 study materials from our company are very useful for you to pass the exam and get the certification.

Snowflake Certified SnowPro Associate - Platform Certification Sample Questions (Q144-Q149):

NEW QUESTION # 144
You need to create a database named 'SALES DB' that is only accessible to users with the
'ACCOUNTADMIN' role. After the database is created, you want to grant the 'USAGE' privilege on it to a custom role named

'DATA ANALYST. Which sequence of commands is the MOST efficient and correct way to achieve this?

- A. CREATE DATABASE SALES DB; GRANT USAGE ON DATABASE SALES DB TO ROLE DATA ANALYST;
- B. USE ROLE ACCOUNTADMIN; CREATE DATABASE SALES DB; GRANT USAGE ON DATABASE SALES DB TO ROLE DATA ANALYST;
- C. USE ROLE ACCOUNTADMIN; CREATE OR REPLACE DATABASE SALES DB; GRANT USAGE ON DATABASE SALES DB TO ROLE DATA ANALYST,
- D. CREATE OR REPLACE DATABASE SALES DB; GRANT USAGE ON DATABASE SALES DB TO ROLE DATA ANALYST;
- E. USE ROLE ACCOUNTADMIN; CREATE DATABASE SALES DB; GRANT USAGE ON DATABASE SALES DB TO ROLE DATA ANALYST; USE ROLE DATA ANALYST;

Answer: C

Explanation:
Option E is the most efficient and correct. You first need to assume the 'ACCOUNTADMIN' role to ensure you have the necessary privileges to create the database. While not strictly necessary,
'CREATE OR REPLACE is often preferred as it allows the script to be re-run without errors if the database already exists. Finally, you grant the USAGE' privilege to the 'DATA ANALYST role.
Options A and B do not specify to assume the 'ACCOUNTADMIN' role first. Options C and D does not use the 'CREATE OR REPLACE which is slightly inefficient and option D returns role to Data Analyst after creation which is not required.

NEW QUESTION # 145
A junior data analyst accidentally dropped a schema named 'STAGING' in the 'RAW DATA' database. They need to recover the schema and its contents as quickly as possible. Which of the following approaches would be the MOST efficient and reliable way to achieve this, assuming Time Travel is enabled for the account and the retention period is sufficient?

- A. Use the `RECOVER DATABASE RAW DATA;' command to recover the entire database.
- B. Create a new schema named 'STAGING' and manually restore the tables and views from a backup.
- C. Create a clone of the database at a point in time before the schema was dropped, then rename the cloned database to RAW_DATX.
- D. Restore the entire 'RAW DATA' database to a point in time before the schema was dropped using Time Travel.
- E. Use the `UNDROP SCHEMA STAGING;' command within the 'RAW DATA' database context.

Answer: E

Explanation:
UNDROP SCHEMA' is the most efficient and reliable way to recover a dropped schema, assuming Time Travel is enabled. It restores the schema to its previous state without affecting other parts of the database. Option B requires manual effort and is prone to errors. Options C, D and E are overkill as they restore or clone the entire database which takes more time and resources. 'RECOVER DATABASE is not a valid command in Snowflake.

NEW QUESTION # 146
You are responsible for managing a Snowflake environment where data is loaded from various external sources. You want to use Snowsight to quickly identify all tables within a specific database and schema that have not been loaded in the last 7 days. Which of the following methods, or combination of methods, provides the most efficient and accurate way to achieve this using Snowsight features?

- A. Use the Snowsight Data > Databases navigation to select the database and schema. Filter the table list by 'Last Modified' date using the built-in filter options. If filter is not avaialbe manually inspect each table by scrolling table by table.
- B. Use the Snowsight Search functionality to search for tables within the database and schema. Then, manually inspect each table's 'Last Modified' timestamp in the table details panel.
- C. Use the Snowsight Data > Databases navigation to select the database and schema. Then, use the Snowsight SQL Worksheet to create a custom dashboard displaying a table with columns for 'table_name' and 'last_altered' by querying the Information Schema 'TABLES' view and filter by the last_altered within the last 7 days.
- D. Query the Snowflake Information Schema using the Snowsight SQL Worksheet to retrieve the 'TABLES' view and filter by 'last_altered' column. Then navigate to the table in Snowsight to verify.
- E. Execute a 'SHOW TABLES' command in the Snowsight SQL Worksheet and manually inspect the

'last_altered' column in the results.

Answer: C,D

Explanation:
Options B and E offer the most efficient and accurate solutions. Option B utilizes the Information Schema, a built-in Snowflake resource, and a SQL query within Snowsight to directly retrieve the required information. Filtering by the 'last_altered' column provides a precise list of tables not loaded in the last 7 days. Option E is the correct and more convenient. Creating a custom dashboard using the Information Schema within Snowsight is the most convenient way of monitoring data. Option A requires manual inspection, which is inefficient. Option C doesn't provide precise filtering. Option D will retrieve the 'last_altered' value but then manual filtering required.

NEW QUESTION # 147
When loading CSV data, what FILE FORMAT option allows you to skip the header row?

- A. SKIP_HEADER = 1
- B. SKIP_FILE_HEADER = FALSE
- C. HEADER_SKIP = 1
- D. IGNORE_HEADER = TRUE

Answer: A

Explanation:
Snowflake's file format options allow granular control over CSV ingestion. The SKIP_HEADER = 1 parameter instructs Snowflake to ignore the first line of the file, typically containing column headers. This is the correct and official parameter within FILE FORMAT objects or inline COPY INTO options. Other options listed-such as SKIP_FILE_HEADER, IGNORE_HEADER, or HEADER_SKIP-are not valid Snowflake parameters. When SKIP_HEADER is applied, Snowflake begins reading data rows starting from line 2. This ensures proper alignment between file contents and table structure during ingestion.
SKIP_HEADER can also be set to values greater than 1 if multiple header rows exist. This behavior is essential when loading structured data where the header row is not intended for table consumption.

NEW QUESTION # 148
What is the primary use of Snowflake Cortex LLM functions?

- A. Running machine learning models on structured data.
- B. Analyzing text data for sentiment summarization and other AI/ML tasks.
- C. Optimizing data loading performance.
- D. Performing traditional SQL joins.

Answer: B

Explanation:
Cortex LLM functions integrate large language model capabilities directly inside Snowflake. These functions enable:
* Sentiment analysis
* Summarization
* Document question answering
* Text classification
* Embedding generation for vector search
They operate directly on Snowflake data, require no external infrastructure, and support secure in-platform AI workloads.

NEW QUESTION # 149
......

We are concerted company offering tailored services which include not only the newest and various versions of SOL-C01 practice materials, but offer one-year free updates services with patient staff offering help 24/7. So there is considerate and concerted cooperation for your purchasing experience accompanied with patient staff with amity. Their enrichment is dependable and reliable. You can find SOL-C01 practice materials on our official website we will deal with everything once your place your order.

We will be responsible for our SOL-C01 valid questions which means the content will continue to update until you have passed the exam, Our education experts are all professional and experienced in compiling exam cram sheets, especially for exams, our SOL-C01 test prep will always receive a 100% passing rate, Please believe us because the service and the SOL-C01 study materials are both good and that our product and website are absolutely safe without any virus.

Disabling Layer Masks, Familiarity with the Python programming language, We will be responsible for our SOL-C01 valid questions which means the content will continue to update until you have passed the exam.

2026 Reliable SOL-C01 Exam Sims | Snowflake Certified SnowPro Associate - Platform Certification 100% Free New Exam Objectives

Our education experts are all professional and experienced in compiling exam cram sheets, especially for exams, our SOL-C01 Test Prep will always receive a 100% passing rate.

Please believe us because the service and the SOL-C01 study materials are both good and that our product and website are absolutely safe without any virus, Itexamguide also offers a demo version of the SOL-C01 exam dumps for free.

As we know, it is necessary to improve your SOL-C01 capacity in work if you want to make achievements on the job or your career.
