**AYT TARAMA TESTİ-20**  
**MATEMATİK**

AYT TARAMA TESTİ-20 MATEMATİK

**1.** Aşağıdaki koordinat düzleminde  $f$  fonksiyonunun birinci türevinin grafiği verilmiştir.

Buna göre  $y = f(x)$  fonksiyonu ile ilgili aşağıdaki ifadelerden hangisi doğrudur?

A)  $[-3, 2]$ 'de artandır.  
B)  $[2, 4]$ 'de azalır.  
C) Her iki minimum noktasının apseli toplamı 4'dür.  
D) Ekstremler noktasının apseli toplamı -42'dir.  
E) Her iki maksimum noktasının apseli toplamı 0'dır.

**1.** İkinci koordinat düzleminde  $2, 4$ 'ün  $1$  ve  $g$  fonksiyonlarının grafiği verilmiştir.

Buna göre

I.  $f'(x) = g(x)$   
II.  $\frac{f(x)}{g(x)}$   
III.  $f(x) = g(x)$

fonksiyonlarından hangileri aynı anlama da gelir?

A) I ve II    B) II ve III    C) I ve III  
D) I ve III    E) I, II ve III

**1.**  $f(x) = x^2 - 2x + 2$  olduğuna göre,  $f'(x)$  fonksiyonunun azalan olduğu en geniş aralık aşağıdakilerden hangisidir?

A)  $[-1, 1]$     B)  $[-1, 1] \cup [3, 4]$   
C)  $[-1, 2] \cup [3]$     D)  $[1, 4]$   
E)  $[-1, 4]$

**2.** Gerçek sayılar kümesinde bir aralığında tanımlı fonksiyonu  $f(x) = \frac{2x-4}{3x+4}$  biçiminde tanımlanıyor.  $f$  fonksiyonu dağınık artan olduğuna göre,  $k$ 'nin en geniş değer aralığı aşağıdakilerden hangisidir?

A)  $[-1, 6]$     B)  $[-4, -1]$     C)  $[1, 2]$   
D)  $[k, -1]$     E)  $[12, -1]$

**4.**  $f(x) = x^2 - 6x - 7$  biçiminde bir  $f$  fonksiyonu tanımlanıyor.

Buna göre,  $f$  fonksiyonunun ekstremler noktasının apseli toplamı kaçtır?

A) 3    B) 6    C) 7    D) 9    E) 12

**1.**  $f(x) = x^2 - 2x + 2$  olduğuna göre,  $f'(x)$  fonksiyonunun azalan olduğu en geniş aralık aşağıdakilerden hangisidir?

A)  $[-1, 1]$     B)  $[-1, 1] \cup [3, 4]$   
C)  $[-1, 2] \cup [3]$     D)  $[1, 4]$   
E)  $[-1, 4]$

**2.** Gerçek sayılar kümesinde bir aralığında tanımlı fonksiyonunun birinci türevinin grafiği aşağıda verilmiştir.

$f(x)$  fonksiyonunun mutlak maksimum değeri  $2$ ,  $f(x) = f(x) + 2$  ve  $f(x) = f(x) + 1$  olduğuna göre,  $a, b, c, d$  gerçel sayılarının sıralanışı aşağıdakilerden hangisi olabilir?

A)  $a < b < c < d$     B)  $a < c < b < d$     C)  $a < c < d < b$   
D)  $d < a < b < c$     E)  $a < c < b < d$

Our Mule-Dev-202 cram materials will help you gain the success in your career. You can be respected and enjoy the great fame among the industry. When applying for the jobs your resumes will be browsed for many times and paid high attention to. The odds to succeed in the job interview will increase. So you could see the detailed information of our Mule-Dev-202 Exam Questions before you decide to buy them.

Before you really attend the Mule-Dev-202 exam and choose your materials, we want to remind you of the importance of holding a certificate like this one. Obtaining a Mule-Dev-202 certificate like this one can help you master a lot of agreeable outcomes in the future, like higher salary, the opportunities to promotion and being trusted by the superiors and colleagues. Our Mule-Dev-202 Exam Questions can help you achieve all of your dreams.

## Test Salesforce Mule-Dev-202 Sample Online | Mule-Dev-202 Latest Learning Materials

Our Mule-Dev-202 simulating exam is perfect for they come a long way on their quality. On one hand, we have engaged in this career for over ten years and have become the leader in this market. On the other hand, we never stop developing our Mule-Dev-202 study guide. And our Mule-Dev-202 Training Materials have the function to remember and correct your errors. If you commit

any errors, Our Mule-Dev-202 learning questions can correct your errors with accuracy rate more than 98 percent.

## Salesforce Certified MuleSoft Hyperautomation Developer Sample Questions (Q17-Q22):

### NEW QUESTION # 17

AnyAirlines is developing an RPA process and is implementing testing best practices. They want to take the RPA process through rigorous testing.

During these tests, where do RPA process test plans execute?

- **A. On a configured RPA Bot**
- B. In an RPA process runtime
- C. In RPA Builder
- D. In RPA Manager

**Answer: A**

Explanation:

During testing of an RPA process, test plans are executed on a configured RPA Bot. This allows you to simulate real-world scenarios and ensure the RPA process works correctly under various conditions:

On a Configured RPA Bot:

RPA Bots are configured to execute the automated tasks defined in the RPA process. By running test plans on these bots, you can verify the functionality and performance of the RPA process.

This approach ensures that the RPA process is thoroughly tested in an environment that closely mirrors production conditions.

MuleSoft RPA Documentation

### NEW QUESTION # 18

AnyAirlines needs to automatically sync Salesforce accounts with NetSuite customers using a MuleSoft Composer flow. The Address field in the Salesforce Account object is a compound field consisting of the simple fields: Street, City, State, Zip, and Country.

However, the Address field in the NetSuite Customer entity is a list consisting of the simple fields: Street, City, State, Zip, and Country.

Which task must be performed to map fields of the Salesforce Address compound field to the corresponding fields of the NetSuite Address list in the flow?

- A. Combine the Salesforce address-related fields into a list using the Get records action in Composer.
- B. Combine the Salesforce address-related fields into a list using a custom formula field in Salesforce.
- C. Break up the NetSuite Address list into fields that match Salesforce address-related fields using a custom formula field in NetSuite.
- **D. Combine the Salesforce address-related fields into a list using a custom expression in Composer.**

**Answer: D**

Explanation:

To map fields of the Salesforce Address compound field to the corresponding fields of the NetSuite Address list in MuleSoft Composer, you need to perform the following task:

Custom Expression in Composer:

Use a custom expression in MuleSoft Composer to combine the individual address-related fields from Salesforce (Street, City, State, Zip, Country) into a format that matches the NetSuite Address list.

This custom expression will concatenate the individual simple fields from Salesforce into a structured format that can be mapped directly to the NetSuite Address list.

Mapping the Fields:

Once the custom expression is created, map the resulting list to the corresponding fields in the NetSuite Customer entity within the Composer flow.

This ensures that each simple field in the Salesforce compound Address field is correctly mapped to the respective field in the NetSuite Address list.

### NEW QUESTION # 19

Northern Trail Outfitters (NTO) uses Flow Orchestration to automate quote development. The "Review Quote" work item is performed by their team of technical writers but can be fulfilled by any technical writer on the team. How can NTO ensure the "Review Quote" work item is assigned to the correct Salesforce user?

- A. Create a Group for the team of Salesforce Users and assign the work item to the group.
- B. Use backend steps to automate work item assignment to the next available technical writer.
- C. Create a user collection variable and assign the work item to the user collection.
- D. Use MuleSoft RPA to review the document and submit it for approval if no issues are found.

**Answer: A**

Explanation:

To ensure the "Review Quote" work item is assigned to the correct Salesforce user within the team of technical writers, the following approach can be used:

Creating a Group:

Create a Group in Salesforce that includes all the technical writers who are eligible to perform the "Review Quote" work item. This group acts as a collective resource pool.

Assigning the Work Item to the Group:

When the "Review Quote" work item is created in Flow Orchestration, assign it to the group rather than an individual user.

Salesforce will then allow any available technical writer within the group to pick up and complete the task.

Ensuring Flexibility and Availability:

This method ensures that the work item can be completed by any technical writer in the team, providing flexibility and improving the chances of timely completion by utilizing the group's collective availability.

Salesforce Flow Orchestration Documentation

### NEW QUESTION # 20

Northern Trail Outfitters needs to update multiple systems outside of Salesforce based on record updates within Salesforce. A hyperautomation practitioner needs to configure Salesforce to call several APIs created by the MuleSoft development team from within a Salesforce flow.

What specifications must be imported into Salesforce to make external services available to a Salesforce flow that enables external invocable actions?

- A. External API specifications
- B. Open API specifications
- C. RAML API specifications
- D. Anypoint API specifications

**Answer: B**

Explanation:

To enable Salesforce to call external services within a flow, the appropriate specifications must be imported to make these external services available as invocable actions. The correct specification is Open API specifications. OpenAPI Specification (formerly known as Swagger) is a standard for defining APIs which can be easily imported into Salesforce to facilitate the integration and invocation of external services.

Import OpenAPI Specifications: Salesforce allows the import of OpenAPI specifications, which define the available endpoints and operations of an API, making them accessible as invocable actions in a Salesforce flow.

Creating External Services: By importing an OpenAPI definition into Salesforce, it creates an External Service, which you can then use within Flow to interact with the defined APIs.

Flow Integration: Once imported, these services can be integrated into Salesforce Flows to automate processes that require interaction with external systems.

Salesforce External Services and API Integrations

### NEW QUESTION # 21

Northern Trail Outfitters developed an integration between its two Salesforce orgs using MuleSoft Composer.

Which two actions should be taken before testing the Composer flow? (Choose two.)

- A. Ensure action steps are connected to a sandbox instance of Salesforce.
- B. Ensure the flow trigger is connected to a sandbox instance of Salesforce.
- C. Ensure the credentials to the target production org are still valid.
- D. Ensure MuleSoft Composer is installed on both the source and target orgs.

**Answer: A,B**

Explanation:

**Flow Trigger Connection:** Before testing any Composer flow, it is crucial to connect the flow trigger to a sandbox instance of Salesforce. This ensures that testing does not impact the production environment. The sandbox provides a safe space to simulate real-world conditions without the risk of data corruption or unintended actions in the live system.

Reference: Salesforce Sandbox Documentation

**Action Steps Connection:** Similar to the flow trigger, action steps within the Composer flow should also be connected to a sandbox instance. This allows comprehensive testing of the flow's functionality, ensuring that each step performs as expected without affecting the production data.

Reference: MuleSoft Composer Guide

**Ensuring Validity of Credentials:** While it is important to ensure that credentials to the production org are valid when moving to production, for testing purposes, the emphasis is on sandbox connections. The credentials should be verified to avoid disruptions during testing.

Reference: MuleSoft Composer Flow Setup

**Installation of MuleSoft Composer:** MuleSoft Composer does not need to be installed on both the source and target orgs as it operates independently and connects to these orgs through provided credentials.

Reference: MuleSoft Composer Installation

## NEW QUESTION # 22

.....

The Exam4Labs is one of the top-rated and reliable platforms that has been helping the Salesforce Certified MuleSoft Hyperautomation Developer (Mule-Dev-202) exam candidates for many years. Over this long time period, these Mule-Dev-202 questions have helped countless Mule-Dev-202 exam candidates. They all got help from the top-rated Mule-Dev-202 Practice Test questions and easily passed their dream Salesforce Mule-Dev-202 certification exam and now they have become certified Mule-Dev-202 professionals and doing jobs in top world brands.

**Test Mule-Dev-202 Sample Online:** <https://www.exam4labs.com/Mule-Dev-202-practice-torrent.html>

If you still cannot wipe out doubts, you can try our free demo of the Mule-Dev-202 valid pdf to experience, Not only our Mule-Dev-202 exam prep is accurate and valid to help you pass exam but also we have good customer service, With the advantage of simulating the real exam environment, you can get a wonderful study experience with our Mule-Dev-202 exam prep as well as gain the best pass percentage, Those who successfully crack the Salesforce Certified MuleSoft Hyperautomation Developer (Mule-Dev-202) test prove to their employers that they are skilled enough to get well-paying jobs and promotions.

For example, a spear phishing email can target Mule-Dev-202 Bank of America by sending an email to as many Bank of America employees as possible, The biggest problems with newsletters Test Mule-Dev-202 Sample Online seem to be lack of alignment, lack of contrast, and too much Helvetica.
