

Reliable 1Z0-771 Exam Papers - 1Z0-771 Valid Test Topics

ORACLE APEX DEVELOPER PROFESSIONAL CERTIFICATION DUMP (1Z0-771)

Exam has 50 Questions; it can't be out of this:

1. Which statement is true about creating and using an interactive grid?

A. For both editable and noneditable interactive grids, end users can change the report layout and create private reports.

B) An interactive grid supports Pivot View and Group By View features.

C) End users cannot rearrange columns by dragging and dropping.

2. What happens when you regenerate credentials for Push Notifications?

A) Existing Push Subscriptions for the application will be valid.

B) Queued Push Notifications for the application will be sent.

C. Existing Push Subscriptions for the application will be invalidated.

3. Which APEX API can be used to send push notifications immediately from the notification queue?

A) APEX_PWA.PUSH_QUEUE

B) APEX_PWA.HAS_PUSH_SUBSCRIPTION

C) APEX_PWA.PURGE_QUEUE

4. At what level does a Developer enable push notifications so that end users can receive them on their devices from an APEX application?

A) Region

B) Application

C) Page

D) Instance

5. Which two tasks can be performed by using the Generate Text with AI Dynamic Action?

A) Invoke a Workflow

B) Draft an email

C) Summarize or translate text

D) Update the underlying database tables

The real and updated ActualtestPDF 1Z0-771 exam dumps file, desktop practice test software, and web-based practice test software are ready for download. Take the best decision of your professional career and enroll in the Oracle APEX Cloud Developer Professional (1Z0-771) certification exam and download ActualtestPDF Oracle APEX Cloud Developer Professional (1Z0-771) exam questions and starts preparing today.

Oracle 1Z0-771 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.
Topic 2	<ul style="list-style-type: none">Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.

Topic 3	<ul style="list-style-type: none"> • Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.
Topic 4	<ul style="list-style-type: none"> • Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.
Topic 5	<ul style="list-style-type: none"> • Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.
Topic 6	<ul style="list-style-type: none"> • Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Topic 7	<ul style="list-style-type: none"> • Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
Topic 8	<ul style="list-style-type: none"> • Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.
Topic 9	<ul style="list-style-type: none"> • Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.
Topic 10	<ul style="list-style-type: none"> • Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.
Topic 11	<ul style="list-style-type: none"> • Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.

1Z0-771 Valid Test Topics | 1Z0-771 Test Quiz

You can alter the duration and quantity of Oracle 1Z0-771 questions in these Oracle 1Z0-771 practice exams as per your training needs. For offline practice, our 1Z0-771 desktop practice test software is ideal. This 1Z0-771 software runs on Windows computers. The 1Z0-771 web-based practice exam is compatible with all browsers and operating systems.

Oracle APEX Cloud Developer Professional Sample Questions (Q14-Q19):

NEW QUESTION # 14

Which two SQL format options does the APEX Assistant provide when using the "Create Data Model using AI" feature?

- A. Oracle PL/SQL
- B. MySQL
- C. Oracle SQL
- D. Quick SQL

Answer: C,D

Explanation:

The "Create Data Model using AI" feature in APEX Assistant leverages AI to generate data models based on natural language input.

The supported SQL format options are:

Quick SQL: A shorthand syntax for defining database objects, which APEX can convert into full DDL.

Oracle SQL: Standard SQL syntax compatible with Oracle Database for creating tables and other objects.

MySQL is not supported as it's specific to a different database system, and Oracle PL/SQL is a procedural language, not a format for defining data models in this context.

NEW QUESTION # 15

Which two approaches can be used to create custom stored procedures in SQL Workshop?

- A. Using SQL Scripts
- B. Using Quick SQL
- C. Using Object Browser
- D. Using Data Workshop

Answer: A,C

Explanation:

In SQL Workshop, custom stored procedures can be created using:

SQL Scripts: Allows developers to write and execute PL/SQL code directly to define stored procedures.

Object Browser: Provides a GUI to create and edit database objects, including stored procedures, by defining their specifications and bodies.

Quick SQL is for generating table DDL, not stored procedures, and Data Workshop is for loading/unloading data, not creating procedures.

NEW QUESTION # 16

What happens when you regenerate credentials for Push Notifications in Oracle APEX?

- A. Push Notifications will be disabled for the application.
- B. A new notification server must be created.
- C. Existing Push Subscriptions for the application will be invalidated.

Answer: C

Explanation:

Regenerating Push Notification credentials updates the VAPID keys (public/private pair) in the PWA settings:

A . Existing Push Subscriptions invalidated: Subscriptions (in APEX_APPL_PUSH_SUBSCRIPTIONS) are tied to the old keys. New keys break this link, requiring users to re-subscribe (e.g., via browser prompts), as the push service (e.g., Firebase) can't authenticate old subscriptions.

B . New notification server: False; the server configuration remains; only credentials change.

C . Disabled for the app: False; notifications remain enabled but won't work for old subscriptions until re-established.

Technical Insight: Regeneration updates APEX_PWA_VAPID_PUBLIC_KEY and APEX_PWA_VAPID_PRIVATE_KEY, triggering a subscription refresh cycle.

Use Case: Security breach requires key rotation.

Pitfall: Users must re-opt-in, potentially losing some subscribers.

NEW QUESTION # 17

An application includes a form on the EMPLOYEES table. You must limit the P1_MANAGER page item so users can select a single employee name and ID from the corresponding manager ID in the same table. Which item type can be used to display P1_MANAGER?

- A. Checkbox
- B. Popup LOV
- C. Switch

Answer: B

Explanation:

The requirement is to allow users to pick a single employee (name and ID) from a list tied to the `MANAGER_ID` column in the `EMPLOYEES` table, implying a dynamic, searchable selection:

A . Popup LOV: This item type displays a popup window with a searchable list of values, sourced from a SQL query (e.g., `SELECT ename, empno FROM employees WHERE empno IN (SELECT DISTINCT manager_id FROM employees)`). It returns a single value (e.g., `EMPNO`) while displaying the name, perfectly meeting the need for a single selection from a related dataset.

B . Switch: A toggle (Yes/No), unsuitable for selecting from a list of employees.

C . Checkbox: Allows multiple selections, conflicting with the "single employee" requirement.

Practical note: Popup LOVs enhance usability with filtering and pagination, ideal for large employee lists, and support returning the ID while showing the name.

NEW QUESTION # 18

Which is a valid method of logging messages to the execution log in APEX applications?

- A. `apex_debug.info ('SAL for :ENAME || ' increased by 19.');`
- B. `apex_error.add_error ('SAL for ' || :ENAME || ' increased by 19.');`
- C. `apex_automation.log_info ('SAL for ' || :ENAME || ' increased by 19.');`

Answer: C

Explanation:

Logging in APEX tracks runtime activity:

A . `apex_automation.log_info`: Correctly logs an informational message to the execution log for automation tasks (e.g., workflows). The syntax `|| :ENAME ||` concatenates the item value (e.g., "JOHN") into "SAL for JOHN increased by 19." It's stored in `APEX_AUTOMATION_LOG`, viewable in Monitoring.

B . `apex_debug.info`: Logs to debug output, but the syntax is flawed (`:ENAME ||` isn't concatenated properly; should be `'SAL for ' || :ENAME || ...`). It's valid only when debugging is enabled (e.g., `APEX_DEBUG.ENABLE`).

C . `apex_error.add_error`: Adds an error to the error stack for user display, not a log message.

Technical Insight: `log_info` is non-intrusive, unlike `apex_debug`, which requires debug mode, or `apex_error`, which signals failure.

Use Case: Logging salary updates in a scheduled job without debug overhead.

Pitfall: Ensure `:ENAME` is in scope (e.g., page item).

NEW QUESTION # 19

.....

After you visit the pages of our product on the websites, you will know the version, price, the quantity of the answers of our product, the update time, 3 versions for you to choose. You can click and see the forms of the answers and the titles and the contents of our Oracle APEX Cloud Developer Professional guide torrent. If you feel that it is worthy for you to buy our 1Z0-771 Test Torrent you can choose a version which you favor, fill in our mail and choose the most appropriate purchase method and finally pay for our 1Z0-771 study tool after you enter in the pay pages on the website. We will send the product to the client by the forms of mails within 10 minutes.
