H19-401\_V1.0 questions and answers in the first attempt.

<https://www.passquestion.com/>

---

One of the key factors for passing the exam is practice. Candidates must use H19-401\_V2.0 practice test material to be able to perform at their best on the real exam. This is why Test4Engine has developed three formats to assist candidates in their H19-401\_V2.0 Preparation. These formats include desktop-based H19-401\_V2.0 practice test software, web-based practice test, and a PDF format.

## Huawei H19-401\_V2.0 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Key Technical Principles and Applications in Industrial Scenarios: Covers the development, key technologies, and sector-specific applications of high-performance industrial campus networks.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Technical Fundamentals and Applications of Multi-Branch WAN Interconnection: Addresses enterprise WAN technologies including private lines, VPN, and SD-WAN for connecting distributed branch offices.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Huawei Xinghe Intelligent Large- and Medium-Sized Campus Network Design Guide (VLAN Networking): Covers VLAN-based design for large and medium campuses including wired, wireless, access control, O&amp;M, and multi-campus interconnection.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• Huawei Xinghe Intelligent Campus Solution: Details the Xinghe solution's core capabilities including automation, ultra-broadband, network simplification, access authentication, intelligent policy, O&amp;M, and security.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Huawei Xinghe Intelligent Campus Solution Overview: Introduces campus network fundamentals, evolving trends, challenges, and Huawei's Xinghe Intelligent Campus Solution as a response to modern enterprise needs.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Huawei iMaster NCE-Campus: Campus Network Management System: Introduces the iMaster NCE-Campus platform covering automated network planning, construction, O&amp;M, and its various deployment modes.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Huawei iMaster NCE-CampusInsight: Campus Network Analyzer: Presents Huawei's intelligent O&amp;M analytics platform offering network health, user experience, application experience views, and a campus digital map.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• Technical Fundamentals and Applications of Office Campus Networks: Explores the full spectrum of office campus network design including routing, switching, security, reliability, virtualization, IPv6, and energy efficiency.</li> </ul>

## Certification H19-401\_V2.0 Book Torrent & Free H19-401\_V2.0 Test Questions

If you want to pass the Huawei H19-401\_V2.0 exam on the first attempt then we suggest you start this journey with Huawei H19-401\_V2.0 exam dumps. The Huawei H19-401\_V2.0 PDF dumps file, practice test software, and web-based practice test software, all three Huawei H19-401\_V2.0 Exam Questions formats are ready for download.

## Huawei HCSP-Presales-Campus Network Planning and Design V2.0 Sample Questions (Q34-Q39):

### NEW QUESTION # 34

iStack virtualizes multiple devices into one device, greatly simplifying network configuration and device management.

- A. True
- B. False

**Answer: A**

Explanation:

iStack (Intelligent Stack) is a horizontal virtualization technology used primarily at the access and aggregation layers of the campus network. It allows multiple physical switches to be connected via stack cables and managed as a single logical device with a unified management IP and configuration file. This eliminates the need for complex protocols like STP (Spanning Tree Protocol) to prevent loops, as the links between the stack and the upstream devices are treated as a single inter-device Eth-Trunk.

### NEW QUESTION # 35

Which of the following are slicing technology implementation solutions?

- A. Channelized sub-interface
- B. Flex-channel
- C. Slice ID
- D. FlexE

**Answer: A,B,D**

Explanation:

In the Xinghe Intelligent Campus solution, "Network Slicing" is used to provide hard or soft isolation for different services (e.g., separating video conferencing from guest Wi-Fi). The three primary implementation solutions (resource isolation methods) defined in the HCSP V2.0 curriculum are:

\* FlexE (Flexible Ethernet) (A): Provides physical-layer hard isolation by dividing the MAC/PHY interface into slots.

\* Flex-channel (Flexible Channel) (C): A Huawei-patented technology that provides dedicated bandwidth with nearly zero interference.

\* Channelized sub-interface (D): Uses sub-interfaces with reserved bandwidth to provide logical isolation.

Slice ID (B) is an identifier carried in the packet header (such as the IPv6/SRv6 extension header) used to map traffic to a specific slice; it is a label/identifier, not the underlying resource isolation technology implementation itself.

### NEW QUESTION # 36

Which of the following statements are true about the wireless traffic forwarding modes on a fabric wireless network?

- A. Direct forwarding is not suitable for scenarios that have high requirements on roaming performance. This is because roaming performance deteriorates slightly when a STA roams across edges.
- B. Direct forwarding is more efficient.
- C. Tunnel forwarding has the disadvantage of traffic detour, which increases the forwarding performance pressure on the WAC.
- D. Tunnel forwarding facilitates centralized management and control of wireless traffic.

**Answer: A,B,C,D**

Explanation:

Huawei supports two main forwarding modes in its wireless architecture:

\* Tunnel Forwarding (A, C): All data traffic is encapsulated in CAPWAP and sent to the WAC. This simplifies security policy enforcement but causes "traffic detour" and places a heavy processing load on the WAC.

\* Direct Forwarding (B, D): APs switch traffic locally. This is highly efficient and reduces core congestion. However, because traffic is released at the edge, maintaining session continuity (roaming) across different Layer 3 boundaries can be more complex, potentially leading to slight performance dips during inter-edge handovers compared to centralized tunneling.

### NEW QUESTION # 37

Global radio calibration adopts a "the more, the better" approach. It needs to be performed immediately if poor wireless experience is detected.

- A. False
- B. True

**Answer: A**

Explanation:

Global radio calibration is a process where the WAC or iMaster NCE calculates the optimal channel and power levels for all APs. It is not a "the more, the better" task. Frequent or immediate calibration during peak hours can cause "flapping," where APs constantly change channels, leading to service interruptions and client disconnections. Huawei recommends performing global calibration during off-peak hours (e.g., at night) or using AI-based calibration (CampusInsight) which makes gradual, intelligent adjustments rather than disruptive immediate changes.

### NEW QUESTION # 38

On a fabric network of a large or midsize campus network, there are 20 edge devices. Which of the following OSPF route orchestration modes should be used in this case?

- A. Multi-OSPF-area orchestration
- B. Single-OSPF-area orchestration
- C. Triple-OSPF-area orchestration
- D. Dual-OSPF-area orchestration

**Answer: D**

#### Explanation:

For mid-to-large campus fabrics (typically those with more than 10-15 edge devices), Huawei recommends Dual-OSPF-area orchestration (C) for the underlay network. In this design, Area 0 is usually established between the Core (Border) and Aggregation nodes, while Area 1 (or other non-zero areas) is used between the Aggregation and Edge nodes. This hierarchy limits the scope of Link State Advertisements (LSAs), preventing a single link flap at the edge from causing a full SPF recalculation across the entire network backbone, thus enhancing stability.

#### NEW QUESTION # 39

.....

Why we give a promise that once you fail the exam with our dump, we guarantee a 100% full refund of the dump cost to you, as all those who have pass the exam successfully with our H19-401\_V2.0 exam dumps give us more confidence to make the promise of "No help, full refund". H19-401\_V2.0 exam is difficult to pass, but it is an important reflection of ability for IT workers in IT industry. So our IT technicians of Test4Engine take more efforts to study H19-401\_V2.0 Exam Materials. All exam software from Test4Engine is the achievements of more IT elite.
