## 2026 100% Free CPC-CDE-RECERT –Trustable 100% Free PDF Download | Test CPC-CDE-RECERT Vce Free

Prep4King CyberArk CDE-CPC Recertification (CPC-CDE-RECERT) exam dumps save your study and preparation time. Our experts have added hundreds of CyberArk CDE-CPC Recertification (CPC-CDE-RECERT) questions similar to the real exam. You can prepare for the CyberArk CDE-CPC Recertification (CPC-CDE-RECERT) exam dumps during your job. You don't need to visit the market or any store because Prep4King CyberArk CPC-CDE-RECERT exam questions are easily accessible from the website.

### CyberArk CDE-CPC Recertification Sample Questions (Q61-Q66):

#### NEW QUESTION # 61

When installing PSM on a Windows 2019 Server, under which circumstances should the PSMConnect and PSMAdminConnect users be moved to the domain? (Choose two.)

- A. When you want to load balance the PSM installation
- B. When RDS CAL Per User licenses are in use
- C. When the RDS session broker has a value > 1
- D. When you want to extend PSM sessions beyond one hour
- E. When you need to enable PSM for Web Support

Answer: B,D

Explanation:

CyberArk explicitly states that you must move PSM application users (PSMConnect/PSMAdminConnect) to domain users on Windows 2019/2022 when:

- \* you are using RDS CAL per-user licensing, and
- \* you want to extend PSM sessions beyond one hour.

### NEW QUESTION # 62

Which prerequisites are required for installing PSM for SSH (Unix Connector)? (Choose two.)

- A. Configure the root user to not authenticate to the Unix server remotely through SSH using a password.
- B. Create an administrative user on the Unix server for future maintenance tasks.
- C. Verify that outbound traffic from the Unix server is always routed through the same public-facing IP.
- D. Reset the default root account password before installing the PSM for SSH.
- E. Create the PSM for SSH parameters file on the Unix server with InstallCyberArkSSHD = Integrated.

Answer: C,E

Explanation:

CyberArk's "Before you install PSM for SSH (Standard)" prerequisites include:

\* Verify public access: "Verify that outbound traffic from the PSM for SSH server is always routed through the same public-facing IP." This directly supports C.

\* Create the PSM for SSH parameters file: The parameters file is required for the installation process

, and the documentation specifies InstallCyberArkSSHD = Integrated as a mandatory parameter value. This supports A (with the corrected value "Integrated").

Why the other options are not "installation prerequisites" as written:

\* B: CyberArk documents that after installation, the root user will not be able to authenticate remotely using a password (security behavior), not as a prerequisite step to perform before installation.

\* D: The docs mention you can use a different administrative/maintenance user, but it is not listed as a required prerequisite in the "Before you install" checklist.

\* E: Resetting the root password is not listed as a prerequisite in the Privilege Cloud "Before you install PSM for SSH (Standard)" documentation.

### NEW QUESTION # 63

How should you configure PSM for SSH to support load balancing?

- A. in PVWA > Options > PSM for SSH Proxy > Servers > VIP
- B. by using a network load balancer
- C. by editing sshd.config on the all the PSM for SSH servers
- D. in PVWA > Options > PSM for SSH Proxy > Servers

Answer: A

### NEW QUESTION # 64

In addition to the Vault Admins and Auditors, what are the default map roles in the Privilege Cloud LDAP Directory mapping function for the Privilege Cloud Standard Services Model? (Choose two.)

- A. Privileged Cloud Users
- B. Safe Owners
- C. Users
- D. Safe Managers

Answer: C,D

Explanation:

In the Privilege Cloud LDAP integration workflow, CyberArk lists the default maps (built-in directory maps) as:

- \* Vault Admins
- \* Safe managers
- \* Auditors

\* Users

Since the question asks for the default roles in addition to Vault Admins and Auditors, the remaining two default map roles are Safe managers and Users, which correspond to A and D.

### NEW QUESTION # 65

A CyberArk Privileged Cloud Shared Services customer asks you how to find recent failed login events for all users. Where can you do this without generating reports?

- A. Identity User Portal
- B. Privileged Cloud Portal
- C. Identity Administration Portal
- C both Identity Administration and Identity User Portals

**Answer: C**

### NEW QUESTION # 66

.....

We aim to provide our candidates with real CyberArk vce dumps and learning materials to help you pass real exam with less time and money. Our valid CPC-CDE-RECERT top questions are written by our IT experts who are specialized in CPC-CDE-RECERT Study Guide for many years and check the updating of CPC-CDE-RECERT vce files everyday to make sure the best preparation material for you.
