Option C ("Tailored measurement services") is correct because custom metrics tailored to specific needs can also be included, configured in SPRO: SCM Extended Warehouse Management > Monitoring > Warehouse Cockpit. Option B ("Alerts") is managed separately in alert management, and option D ("Calculated measurement services") is not a standard cockpit object type.

NEW QUESTION # 22

In decentralized SAP EWM with QM integration, the process of setting up quality inspections can be streamlined as follows:

* D. Create the inspection setup in the material master and distribute it to create the quality inspection rule:
