If you want to improve yourself and make progress, if you are not satisfied with your present job, if you are still staying up for the D-DS-FN-23 exam day and night, please use our D-DS-FN-23 study materials. For with the high pass rate as 98% to 100%, we are

confident to claim that our high quality and high efficiency of our D-DS-FN-23 Exam Torrent is unparalleled in the market. We provide the latest and exact D-DS-FN-23 exam quiz to our customers and you will be grateful if you choose our exam torrent and gain what you are expecting in the shortest time.

EMC Dell Data Science Foundations Sample Questions (Q308-Q313):

NEW QUESTION # 308

How is dimensionality defined in a "bag of words" document representation?

- A. Number of unique terms in the document
- B. Average number of words per sentence in the document
- C. Frequency of repeated words in the document
- D. Total number of words in the document

Answer: A

NEW QUESTION # 309

The average purchase size from your online sales site is \$17, 200. The customer experience team believes a certain adjustment of the website will increase sales.

A pilot study on a few hundred customers showed an increase in average purchase size of \$1.47, with a significance level of $p=0.1$. The team runs a larger study, of a few thousand customers.

The second study shows an increased average purchase size of \$0.74, with a significance level of 0.03.

What is your assessment of this study?

- A. The change in purchase size is small, but may aggregate up to a large increase in profits over the entire customer base.
- B. The change in purchase size is not practically important, and the good p-value of the second study is probably a result of the large study size.
- C. The p-value of the second study shows a statistically significant change in purchase size. The new website is an improvement.
- D. The difference in the change in purchase size between the two studies is troubling; The team should run another, larger study.

Answer: B

NEW QUESTION # 310

What would be considered "Big Data"?

- A. An OLAP Cube containing customer demographic information about 100, 000, 000 customers
- B. Daily Log files from a web server that receives 100, 000 hits per minute
- C. Aggregated statistical data stored in a relational database table
- D. Spreadsheets containing monthly sales data for a Global 100 corporation

Answer: B

NEW QUESTION # 311

In ANOVA, what is the null hypothesis for k population means?

- A. All population means are equal to each other
- B. At least two population means are equal
- C. At least two population means are not equal
- D. At most k-1 population means are equal

Answer: A

Explanation:

In ANOVA (Analysis of Variance), the null hypothesis is that all population means are equal to each other.

The goal is to test whether there is evidence to reject this hypothesis, indicating that at least one population mean differs from the
