APMG-International - Latest ISO-IEC-27001-Foundation - Hot ISO/IEC 27001 (2022) Foundation Exam Spot Questions

Our ISO-IEC-27001-Foundation learning quiz can lead you the best and the fastest way to reach for the certification and achieve your desired higher salary by getting a more important position in the company. Because we hold the tenet that low quality ISO-IEC-27001-Foundation exam materials may bring discredit on the company. Our ISO-IEC-27001-Foundation learning questions are undeniable excellent products full of benefits, so our ISO-IEC-27001-Foundation exam materials can spruce up our own image and our exam questions are your best choice.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q34-Q39):

NEW QUESTION # 34
Who is required to ensure that staff are supported so that they can contribute to the information security management system?

- A. Top management of the organization
- B. Management responsible for each area of operation
- C. ISO/IEC 27001 practitioners within the organization
- D. Auditors who audit each area of operation

Answer: A

Explanation:
Clause 5.1 (Leadership and Commitment) requires that:

"Top management shall demonstrate leadership and commitment with respect to the information security management system by... ensuring that the resources needed for the ISMS are available... and supporting persons to contribute to the effectiveness of the ISMS." This makes it explicit that top management has the responsibility to ensure personnel are supported so they can contribute to the ISMS. Option B (line management) may provide local support, but ultimate accountability rests with top management. Auditors (C) only evaluate compliance, not provide support.

Practitioners (D) help implement, but they don't bear formal responsibility under the standard.

Thus, the verified answer is A: Top management of the organization.

NEW QUESTION # 35

To whom are the information security policies required to be communicated, according to the control in Annex A of ISO/IEC 27001?

- A. Only staff with accountability for ISMS operation
- B. Relevant personnel and relevant interested parties
- C. Top management
- D. Employees within the scope of the ISMS

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) clearly specifies:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties..." This means the communication obligation is not limited to top management (A) or only ISMS staff (B), nor does it stop at employees only (C). Instead, ISO/IEC 27001/27002 mandate a broader scope: all relevant personnel and relevant interested parties must be informed. This ensures both internal stakeholders (employees, contractors, temporary staff) and external interested parties (suppliers, partners, regulators, customers, etc.) receive the right policy communications where applicable. Therefore, the correct and verified answer is D.

NEW QUESTION # 36

Which audit activity related to ISO/IEC 27001 may be carried out by a practitioner?

- A. Conduct an audit of a Certification Body
- B. Conduct an audit of an Accredited Training Organization
- C. Conduct a surveillance audit of their own area of the organization
- D. Conduct an internal audit of the organization

Answer: D

Explanation:

ISO/IEC 27001 requires internal audits and sets out how they must be conducted: "The organization shall conduct internal audits at planned intervals..." (9.2.1) and "plan, establish, implement and maintain an audit programme(s)... [and] select auditors and conduct audits that ensure objectivity and the impartiality of the audit process" (9.2.2). These extracts confirm that practitioners (internal to the organization) can conduct internal audits provided objectivity and impartiality are ensured (e.g., they do not audit their own work). Surveillance audits (option A) and audits of Accredited Training Organizations or Certification Bodies (options C, D) are third-party activities outside the remit of an internal practitioner under ISO/IEC 27001; the standard's audit requirement is focused on the organization's own internal audit programme. Therefore, conducting an internal audit (B) is the correct practitioner activity per Clause 9.2.

NEW QUESTION # 37

When are the information security policies required to be reviewed, according to the Policies for information security control?

- A. According to a schedule defined by the Certification Body
- B. Annually
- C. Every six months
- D. At planned intervals and if significant changes occur

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) specifies:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties, and reviewed at planned intervals and if significant changes occur." This clearly identifies the review frequency requirement: planned intervals and whenever there are significant changes. Options A and B (six-monthly or annually) are not prescribed by ISO - timing is left to the organization. Option C is also wrong, since Certification Bodies do not dictate policy review schedules.

Therefore, the verified correct answer is D.

NEW QUESTION # 38

Which activity is an operational planning and control requirement?

- A. Scheduling of second party audits
- B. Document information security objectives
- C. Perform information security risk assessments at planned intervals
- D. Review the consequences of unintended changes

Answer: D

Explanation:

Clause 8.1 (Operational planning and control) requires organizations to:

"Ensure that changes are controlled. The organization shall review the consequences of unintended changes, taking action to mitigate any adverse effects, as necessary." This requirement ensures that operational processes are planned, controlled, and adjusted where unexpected changes occur. Risk assessments (B) are covered in Clause 6.1.2 (Planning), not operations. Scheduling second-party audits (C) is not an ISMS requirement but part of supplier/customer arrangements. Documenting objectives (D) belongs to Clause 6.2 (Planning).

Thus, the required operational planning and control activity is A: Review the consequences of unintended changes.

NEW QUESTION # 39

......

The test software used in our products is a perfect match for Windows' ISO-IEC-27001-Foundation learning material, which enables you to enjoy the best learning style on your computer. Our ISO-IEC-27001-Foundation study materials also use the latest science and technology to meet the new requirements of authoritative research material network learning. Unlike the traditional way of learning, the great benefit of our ISO-IEC-27001-Foundation Study Materials are that when the user finishes the exercise, he can get feedback in the fastest time.
