If you are boring for current jobs and want to jump out of bottleneck, an IT certification will be a good way out for you. ActualTestsQuiz offers the highest passing rate of FCSS\_LED\_AR-7.6 latest practice exam online to help you restart now. 3-5 years' experience in IT field and a professional certification will help you be qualified for some senior position or management positions. FCSS\_LED\_AR-7.6 latest practice exam online can be your first step for Fortinet certification and help you pass exam 100%.

In order to meet the demands of all customers, our company has a complete set of design, production and service quality guarantee system, the FCSS\_LED\_AR-7.6 study materials are perfect. We can promise that quality first, service upmost. If you buy the FCSS\_LED\_AR-7.6 study materials from our company, we are glad to provide you with the high quality FCSS\_LED\_AR-7.6 Study Materials and the best service. The philosophy of our company is "quality is life, customer is god." We can promise that our company will provide all customers with the perfect quality guarantee system and sound management system.

**FCSS\_LED\_AR-7.6 Valid Exam Materials & FCSS\_LED\_AR-7.6 Latest Exam Materials**

The FCSS\_LED\_AR-7.6 exam questions are the perfect form of a complete set of teaching material, teaching outline will outline all the knowledge points covered, comprehensive and no dead angle for the FCSS\_LED\_AR-7.6 candidates presents the proposition scope and trend of each year, truly enemy and know yourself, and fight. Only know the outline of the FCSS\_LED\_AR-7.6 Exam, can better comprehensive review, in the encounter with the new and novel examination questions will not be confused, interrupt the thinking of users.

## Fortinet FCSS\_LED\_AR-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Central Management: This section addresses managing FortiSwitch via FortiManager over FortiLink, implementing zero-touch provisioning, configuring VLANs, ports, and trunks, and setting up FortiExtender and FortiAP devices.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Authentication: This domain covers advanced user authentication using RADIUS and LDAP, two-factor authentication with digital certificates, and configuring syslog and RADIUS single sign-on on FortiAuthenticator.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Monitoring and Troubleshooting: This section covers configuring quarantine mechanisms, managing FortiAIops, troubleshooting FortiGate communication with FortiSwitch and FortiAP, and using monitoring tools for wireless connectivity.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Zero-Trust LAN Access: This domain covers machine authentication, MAC Authentication Bypass, NAC policies for wireless security, guest portal deployment, and advanced solutions like FortiLink NAC, dynamic VLAN, and VLAN pooling.</li> </ul>

## Fortinet FCSS - LAN Edge 7.6 Architect Sample Questions (Q21-Q26):

### NEW QUESTION # 21

Refer to the exhibits.

A company has multiple FortiGate devices deployed and wants to centralize user authentication and authorization. The administrator decides to use FortiAuthenticator to convert RSSO messages to FSSO, allowing all FortiGate devices to receive user authentication updates.

After configuring FortiAuthenticator to receive RADIUS accounting messages, users can authenticate, but FortiGate does not enforce the correct policies based on user groups. Upon investigation, the administrator discovers that FortiAuthenticator is receiving RADIUS accounting messages from the RADIUS server and successfully queries LDAP for user group information. But, FSSO updates are not being sent to FortiGate devices and FortiGate firewall policies based on FSSO user groups are not being applied. What is the most likely reason FortiGate is not receiving FSSO updates?

- A. The RADIUS Username and Client IPv4 attributes are not defined on FortiAuthenticator.
- B. The LDAP server is not configured to retrieve group memberships for RSSO users.
- C. The FortiAuthenticator interface is not enabled to receive RADIUS accounting messages.
- D. FortiAuthenticator is missing the FSSO user group attribute in the configuration.

**Answer: A**

Explanation:

In this design, FortiAuthenticator receives RADIUS accounting (RSSO) messages, looks up the user in LDAP to get group information, then injects FSSO logon events toward all FortiGate devices.

From the exhibits we know:

FortiAuthenticator is receiving RADIUS accounting from the RADIUS server.

LDAP queries are successful and return group membership.

But FortiGate does not receive FSSO logons, so identity-based policies are not applied.

For FortiAuthenticator to create an FSSO logon, the RADIUS accounting record must be correctly parsed into at least:

Username

Client IP address

These are mapped from the RADIUS attributes in the RADIUS Accounting SSO client configuration (for example, User-Name and Framed-IP-Address). If these are not defined or mapped incorrectly, FortiAuthenticator can see the accounting packet but cannot build a valid FSSO session, so no update is sent to FortiGate.

Thus the most likely root cause is:

#The RADIUS Username and Client IPv4 attributes are not correctly defined for that RADIUS Accounting SSO client (option A).

Other options conflict with the scenario:

B- LDAP is already successfully returning groups.

C- FSSO user group attribute is separate; even without it, FSSO logons would still be created (just without group mapping).

D- The interface is receiving RADIUS accounting, so it is clearly enabled.

#### NEW QUESTION # 22

Which policy components are essential in a FortiGate NAC policy for wireless networks?

(Choose three)

Response:

- A. Authentication rules
- B. IPsec VPN enforcement
- C. Role assignment
- D. VLAN assignment
- E. Posture check condition

Answer: A,C,D

#### NEW QUESTION # 23

Which authentication method is triggered when a device does not support 802.1X but needs to access the network using its MAC address?

Response:

- A. RADIUS EAP chaining
- B. LDAP-based login
- C. EAP-TLS
- D. MAC Authentication Bypass (MAB)

Answer: D

#### NEW QUESTION # 24

Which three FortiAuthenticator configuration elements are involved in RSSO processing?

(Choose three)

Response:

- A. DNS Filter
- B. Group Mapping
- C. RADIUS Client
- D. Syslog Server
- E. RSSO Attribute

Answer: B,C,E

#### NEW QUESTION # 25

Refer to the exhibits.

Examine the firewall policy configuration and SSID settings. Users trying to connect to the new Guest wireless network should be redirected to an external captive portal, however, these wireless users are not able to see the captive portal login page. The external captive portal URL has been verified as correct, yet the issue persists. Which configuration change should fix the problem?

- A. A firewall policy with the ID 11 is missing to enable the captive-portal-exempt option.
- B. Add FortiAuthenticator and WindowsAD as exempt sources.
- C. Security mode should be set to WPA2 Enterprise to authenticate through RADIUS.
- D. Include the user group guest.portal in the firewall policy.
