Latest H12-811_V1.0 Exam Answers - Latest H12-811_V1.0 Brindumps

The Huawei H12-811_V1.0 exam questions are being offered in three different formats. These formats are HCIA-Datacom V1.0 (H12-811_V1.0) PDF dumps files, desktop practice test software, and web-based practice test software. All these three HCIA-Datacom V1.0 (H12-811_V1.0) exam dumps formats contain the real HCIA-Datacom V1.0 (H12-811_V1.0) exam questions that assist you in your HCIA-Datacom V1.0 (H12-811_V1.0) practice exam preparation and finally, you will be confident to pass the final H12-811_V1.0 exam easily.

Huawei H12-811_V1.0 (HCIA-Datacom V1.0) certification exam is designed to validate the knowledge and skills of professionals in the field of data communication. HCIA-Datacom V1.0 certification is aimed at individuals who are responsible for planning, designing, implementing, and maintaining data communication networks. H12-811_V1.0 Exam covers a range of topics, including network architecture, network protocols, network security, and network troubleshooting.

Huawei HCIA-Datacom V1.0 Sample Questions (Q278-Q283):

NEW QUESTION # 278

Neither the A1 terminate interface nor the Backup port in RSTP can forward user traffic, nor can they receive, process, and forward BPDUs ()

- A. True
- B. False

Answer: B

NEW QUESTION # 279

The function of telnet.read_very_eager in Telnet lib is to read data non-blockingly. Usually need to be used with the time module.

- A. False
- **B. True**

Answer: B

NEW QUESTION # 280

Making a call on a landline telephone is a type of network communication.

- **A. TRUE**
- B. FALSE

Answer: A

Explanation:

Detailed Explanation: Making a call on a landline telephone involves network communication. Though it uses a traditional telephone network (Public Switched Telephone Network, PSTN), the process of sending and receiving voice data through a wired system qualifies as network communication. The voice signals are converted into electrical signals, transmitted over the network, and then converted back into voice signals on the receiving end .

NEW QUESTION # 281

Loops may cause broadcast storms on a Layer 2 network.

- **A. TRUE**
- B. FALSE

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

In a Layer 2 (switching) network, loops occur when there are multiple paths between switches without a loop prevention mechanism (e.g., STP - Spanning Tree Protocol). This causes:

- * Broadcast Storms (infinite loops of broadcast frames)
- * MAC Table Instability (conflicting learning of MAC addresses)
- * High CPU Usage (due to excessive traffic processing)

Spanning Tree Protocol (STP) prevents these loops by blocking redundant links while keeping one active path.
