Experience-Cloud-Consultant Exam Assessment - Valid Experience-Cloud-Consultant Exam Questions

We learned that a majority of the candidates for the exam are office workers or students who are occupied with a lot of things, and do not have plenty of time to prepare for the Experience-Cloud-Consultant exam. Taking this into consideration, we have tried to improve the quality of our Experience-Cloud-Consultant training materials for all our worth. Now, I am proud to tell you that our Experience-Cloud-Consultant Exam Questions are definitely the best choice for those who have been yearning for success but without enough time to put into it. Just buy them and you will pass the exam by your first attempt!

To be eligible for the Salesforce Experience-Cloud-Consultant Certification Exam, candidates must have a minimum of six months of hands-on experience with Experience Cloud. Experience-Cloud-Consultant exam consists of 60 multiple-choice questions, and candidates have 105 minutes to complete it. The passing score for the exam is 69%, and the certification is valid for two years. Salesforce recommends that candidates have a strong understanding of Salesforce fundamentals, including data modeling, security, and workflow automation, before attempting the Experience-Cloud-Consultant Certification Exam. Upon passing the exam, candidates earn the Salesforce Certified Experience Cloud Consultant credential, which demonstrates their proficiency in implementing Experience Cloud solutions for their clients.

Salesforce Certified Experience Cloud Consultant Sample Questions (Q98-Q103):

NEW QUESTION # 98

Ursa Major Solar would like to make an external user an Experience Site Moderator.

What are two of the several moderation permissions available to assign an external user in order for them to be an effective Experience Site Moderator?

Choose 2 answers

- **A. Manage Experiences**
- B. Access Sharing Sets
- C. Manage Setup
- **D. Access Experience Management**

Answer: A,D

NEW QUESTION # 99

Northern Trail Outfitters wants to add a background image to a record list of products in its digital experience.

How should an administrator accomplish this?

- **A. Build a custom Lightning component.**
- B. Use a Flexible page layout.
- C. Create CMS items.
- D. Use an HTML component

Answer: A

Explanation:

To add a background image to a record list of products in its digital experience, an administrator should build a custom Lightning component. A Lightning component is a reusable unit of user interface that you can create and customize using code. A custom Lightning component allows you to add your own functionality and design to your Experience Cloud site. To add a background image to a record list of products, an administrator should build a custom Lightning component that uses the SLDS Background Image utility class and the lightning-record-list base component.

NEW QUESTION # 100

Ursa Major Solar (UMS) would like authenticated Experience Site users to see cases, quotes, contracts, and Knowledge articles appear in search results, but the Search Results component is only returning Knowledge articles.

How should UMS configure its search results to yield the desired results?

- A. In Salesforce Setup, under the Experience Site users' profile, adjust the system permissions to allow for multiple objects in search results.
- **B. On the Search page, switch the Search Results component with Global Search Results and select the appropriate objects in the property editor.**
- C. On the Search page, select the appropriate objects in the property editor for the Search Results component.
- D. On the Home page, in the property editor for the Hero component, adjust the Hero Type to "Call to Action" instead of "Search".

Answer: B

Explanation:

This option allows UMS to configure its search results to include cases, quotes, contracts, and Knowledge articles. The Global Search Results component is a new component that supports multiple objects and facets in the search results. UMS can add this component to the Search page and select the objects that they want to display in the property editor.

NEW QUESTION # 101

A consultant is in the process of designing the sharing and visibility model for Cloud (CK) new hiking site built on experience Cloud. The consultant knows that CK plans to use the Customer Community License type.

What limitations should the consultant consider related to sharing and visibility for this license type?

- A. All site users that require access to certain records for certain objects have the proper Sharing set.
- B. All site users have the appropriate role assigned.
- **C. All site users that require access to all records across all objects have the proper Sharing Set.**
- D. Any site users that require access to specific records have the proper Sharing Rule.

Answer: C

NEW QUESTION # 102

Which step does the system administrator have to take to create a partner user?

- A. Assign the Gold Partner permission to the user.
- B. Create a partner queue, and add users to it.
- C. Select **Enable Partner User** from the **Contact Detail** page.
- D. Add the user to the All Partner Portal Users public group.

Answer: C

NEW QUESTION # 103
