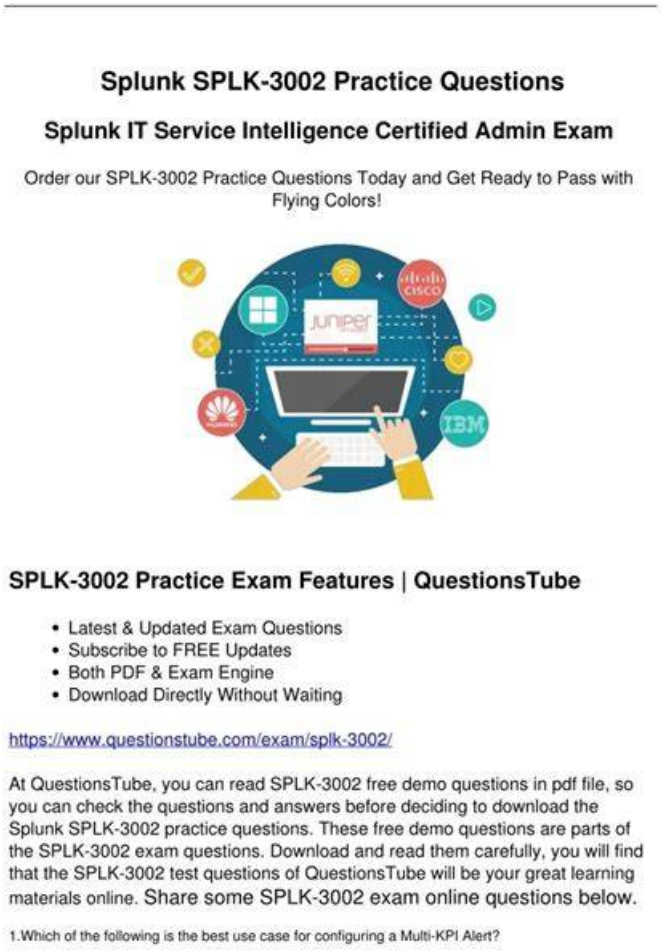
Buy Today and Save Money with Free Splunk SPLK-2002 Questions Updates



What's more, part of that PrepAwayETE SPLK-2002 dumps now are free: https://drive.google.com/open?id=14Becki5rGX77DuzBzHVSEbosuJGrLeit

As we all know, the SPLK-2002 certificate has a very high reputation in the global market and has a great influence. But how to get the certificate has become a headache for many people. Our SPLK-2002learning materials provide you with an opportunity. Once you choose our SPLK-2002 Exam Practice, we will do our best to provide you with a full range of thoughtful services. Whenever you have questions about our SPLK-2002 study guide, our service will give you the most professional advice.

Splunk SPLK-2002 Exam covers a wide range of topics, including advanced searching and reporting, distributed deployment, clustering, and data management. SPLK-2002 exam also tests candidates' knowledge of security and compliance, as well as their ability to troubleshoot and optimize Splunk environments. The SPLK-2002 certification requires a deep understanding of Splunk's architecture, as well as the ability to design and implement complex solutions that meet the needs of enterprise-level organizations.

The SPLK-2002 certification exam covers a variety of topics related to Splunk Enterprise, including how to design and deploy Splunk environments, how to manage Splunk indexes and data, and how to troubleshoot common issues that may arise in Splunk Enterprise. SPLK-2002 Exam also covers topics related to data ingestion, data parsing, and data enrichment, as well as how to work with Splunk apps and add-ons. Additionally, the exam covers topics related to security and compliance, including how to secure Splunk environments and how to ensure compliance with relevant regulations and standards.

Pass Guaranteed Quiz 2026 Splunk Unparalleled SPLK-2002: Free Splunk Enterprise Certified Architect Sample

There are many users who worry that if they fail to pass the exam after purchasing our SPLK-2002 latest exam torrents, the money will be wasted, and the cost of the test seems too great to be worth. The SPLK-2002 exam questions in order to let users do not have such concerns, solemnly promise all users who purchase the SPLK-2002 latest exam torrents, the user after failed in the exam as long as to provide the corresponding certificate and failure scores scanning or screenshots of SPLK-2002 Exam, we immediately give money refund to the user, and the process is simple, does not require users to wait too long a time. Of course, if you have any other questions, users can contact the customer service of SPLK-2002 test torrent online at any time, they will solve questions as soon as possible for the users, let users enjoy the high quality and efficiency refund services.

Splunk SPLK-2002: Splunk Enterprise Certified Architect exam is a valuable certification that validates the knowledge and skills of an individual in using Splunk Enterprise. Splunk Enterprise Certified Architect certification is recognized globally and is highly valued by employers. Splunk Enterprise Certified Architect certification offers various benefits such as increased job opportunities, a higher salary, and recognition in the industry. Splunk Enterprise Certified Architect certification is an essential requirement for individuals who are looking to advance their career as a Splunk professional and for organizations that use Splunk to ensure their employees have the necessary skills and knowledge.

Splunk Enterprise Certified Architect Sample Questions (Q94-Q99):

NEW QUESTION # 94
Search dashboards in the Monitoring Console indicate that the distributed deployment is approaching its capacity. Which of the following options will provide the most search performance improvement?

- A. Look for slow searches and reschedule them to run during an off-peak time.
- B. Replace the indexer storage to solid state drives (SSD).
- C. Add more search peers and make sure forwarders distribute data evenly across all indexers.
- D. Add more search heads and redistribute users based on the search type.

Answer: A

NEW QUESTION # 95
Which of the following describe migration from single-site to multisite index replication?

- A. Single-site buckets instantly receive the multisite policies.
- B. A master node is required at each site.
- C. Multisite policies apply to new data only.
- D. Multisite total values should not exceed any single-site factors.

Answer: C

Explanation:
Explanation
Migration from single-site to multisite index replication only affects new data, not existing data. Multisite policies apply to new data only, meaning that data that is ingested after the migration will follow the multisite replication and search factors. Existing data, or data that was ingested before the migration, will retain the single-site policies, unless they are manually converted to multisite buckets. Single-site buckets do not instantly receive the multisite policies, nor do they automatically convert to multisite buckets. Multisite total values can exceed any single-site factors, as long as they do not exceed the number of peer nodes in the cluster. A master node is not required at each site, only one master node is needed for the entire cluster

NEW QUESTION # 96
Which of the following will cause the greatest reduction in disk size requirements for a cluster of N indexers running Splunk Enterprise Security?

- A. Setting the cluster replication factor to N-1.
- B. Increasing the number of buckets per index.
- C. Setting the cluster search factor to N-1.
- D. Decreasing the data model acceleration range.

Answer: A

NEW QUESTION # 97
Which of the following will cause the greatest reduction in disk size requirements for a cluster of N indexers running Splunk Enterprise Security?

- A. Setting the cluster replication factor to N-1.
- B. Increasing the number of buckets per index.
- C. Setting the cluster search factor to N-1.
- D. Decreasing the data model acceleration range.

Answer: A

Explanation:
Explanation/Reference: https://docs.splunk.com/Documentation/Splunk/7.3.2/Indexer/Systemrequirements

NEW QUESTION # 98
Determining data capacity for an index is a non-trivial exercise. Which of the following are possible considerations that would affect daily indexing volume? (select all that apply)

- A. Number of concurrent searches on data.
- B. Average size of event data.
- C. Peak data rates.
- D. Number of data sources.

Answer: B,C,D

Explanation:
According to the Splunk documentation1, determining data capacity for an index is a complex task that depends on several factors, such as:
* Average size of event data. This is the average number of bytes per event that you send to Splunk. The larger the events, the more storage space they require and the more indexing time they consume.
* Number of data sources. This is the number of different types of data that you send to Splunk, such as logs, metrics, network packets, etc. The more data sources you have, the more diverse and complex your data is, and the more processing and parsing Splunk needs to do to index it.
* Peak data rates. This is the maximum amount of data that you send to Splunk per second, minute, hour, or day. The higher the peak data rates, the more load and pressure Splunk faces to index the data in a timely manner.
The other option is false because:
* Number of concurrent searches on data. This is not a factor that affects daily indexing volume, as it is related to the search performance and the search scheduler, not the indexing process. However, it can affect the overall resource utilization and the responsiveness of Splunk2.
