Free PDF 1z0-1104-25 Reliable Test Pattern–The Best Related Certifications for your Oracle 1z0-1104-25

Continuous improvement is a good thing. If you keep making progress and transcending yourself, you will harvest happiness and growth. The goal of our 1z0-1104-25 latest exam guide is prompting you to challenge your limitations. People always complain that they do nothing perfectly. As long as you submit your email address and apply for our free trials, we will soon send the free demo of the 1z0-1104-25 training practice to your mailbox. If you are uncertain which one suit you best, you can ask for different kinds free trials of 1z0-1104-25 latest exam guide in the meantime. After deliberate consideration, you can pick one kind of study materials from our websites and prepare the exam.

Oracle 1z0-1104-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Protecting Data: This section of the exam measures the skills of Cloud Security Professionals and highlights data security practices in OCI. It tests knowledge of using the Key Management Service for encryption keys, managing secrets in the OCI Vault, and applying features of OCI Data Safe to ensure sensitive data remains protected.
Topic 2	• Implementing OS and Workload Protection: This section of the exam measures the skills of OCI Administrators and looks at securing workloads and operating systems. It includes the use of OCI Bastion for time-limited access, vulnerability scanning of hosts and containers, and the use of OS management for automated updates. The goal is to ensure that workloads remain resilient and well-protected.
Topic 3	• OCI Security Introduction: This section of the exam measures the skills of Cloud Security Professionals and covers the basics of security in Oracle Cloud Infrastructure. It introduces the shared security responsibility model, the core principles of security design, and the use of foundational security services to secure deployments on OCI.

Topic 4	• Protecting Infrastructure - Network and Applications: This section of the exam measures the skills of Cloud Security Professionals and covers methods for securing networks and applications on OCI. Topics include network security groups, firewalls, and security lists, while also focusing on the use of load balancers for availability. The section further addresses the configuration of OCI certificates and web application firewalls to strengthen infrastructure security.
Topic 5	• Implementing Identity and Access Management (IAM): This section of the exam measures skills of OCI Administrators and focuses on identity and access controls. It covers IAM domains, users, groups, and compartments, as well as the use of IAM policies to manage access to resources. Candidates are also tested on configuring dynamic groups, network sources, and tag-based access control, along with managing MFA, sign-on policies, and activity monitoring.

Expert Validation Use Up-to-Date Q&As to Pass the Oracle 1z0-1104-25 Exam

As the rapid development of the world economy and intense competition in the international, the leading status of knowledge-based economy is established progressively. A lot of people are in pursuit of a good job, a 1z0-1104-25 certification, and a higher standard of life. It is very important for us to keep pace with the changeable world and update our knowledge if we want to get a good job, a higher standard of life and so on. First, we need to get a good 1z0-1104-25 Quiz prep. Because we only pass 1z0-1104-25 exam and get a certificate, we can have the chance to get a decent job and make more money.

Oracle Cloud Infrastructure 2025 Security Professional Sample Questions (Q37-Q42):

NEW QUESTION # 37
You're managing an Oracle Cloud Infrastructure (OCI) environment where a public website hosts downloadable assets stored in Object Storage buckets. These buckets need to be publicly accessible for website visitors, but Cloud Guard keeps flagging them as security risks.
How can Cloud Guard be configured to ignore problems specific to public buckets while still ensuring security checks are applied to other resources that require them?

- A. Fix the baseline by configuring the Conditional groups for the detector.
- B. Dismiss problems associated with those resources.
- C. Resolve or remediate the problems by making the buckets private.
- D. A public bucket is a security risk, so Cloud Guard will keep detecting it.

Answer: A

NEW QUESTION # 38
"A company, ABC, is planning to launch a new web application on OCI. Based on past experiences, they expect a significant surge in traffic after the launch. You are responsible for ensuring that the application is highly available.
Which step would you perform to achieve this goal?

- A. Use a Virtual Cloud Network (VCN) with subnets, security lists, and routing rules to isolate the web application from the Internet and other resources.
- B. Configure Cloud Guard to prevent large amounts of traffic from reaching the web application.
- C. Use a load balancer to distribute incoming traffic evenly across multiple instances of the web application."
- D. Implement security controls, such as web application firewalls, to protect against common attack vectors.

Answer: C

NEW QUESTION # 39

An OCI administrator notices that a compute instance running in the production compartment is unable to create Object Storage buckets using the OCI CLI command:

oci os bucket create --name mybucket --compartment-id <compartment_OCID> --auth instance_principal The error message returned states:

"NotAuthorizedOrNotFound: You are not authorized to perform this action." The administrator verifies that the instance has Internet access and can reach OCI endpoints.

What then could be causing the issue?

- A. The instance is not part of any Dynamic Group or the matching rule is incorrect.
- B. The bucket name is already in use, causing a conflict.
- C. The instance is using the wrong OCI CLI authentication method.
- D. The policy is written at the root compartment instead of the production compartment.

Answer: A

NEW QUESTION # 40

According to the Oracle Cloud Infrastructure (OCI) Shared Responsibility Model, which statement accurately reflects OCI's responsibility for security?

- A. Customers are responsible for securing both infrastructure and data.
- B. OCI is responsible for securing the underlying infrastructure but not customer data.
- C. OCI provides security only for free-tier services; customers secure everything else.
- D. OCI has no security responsibilities; customers need to secure their resources.

Answer: B

NEW QUESTION # 41

Challenge 2 - Task 1

In deploying a new application, a cloud customer needs to reflect different security postures. If a security zone is enabled with the Maximum Security Zone recipe, the customer will be unable to create or update a resource in the security zone if the action violates the attached Maximum Security Zone policy.

As an application requirement, the customer requires a compute instance in the public subnet. You therefore, need to configure Custom Security Zones that allow the creation of compute instances in the public subnet.

Review the architecture diagram, which outlines the resoures you'll need to address the requirement:
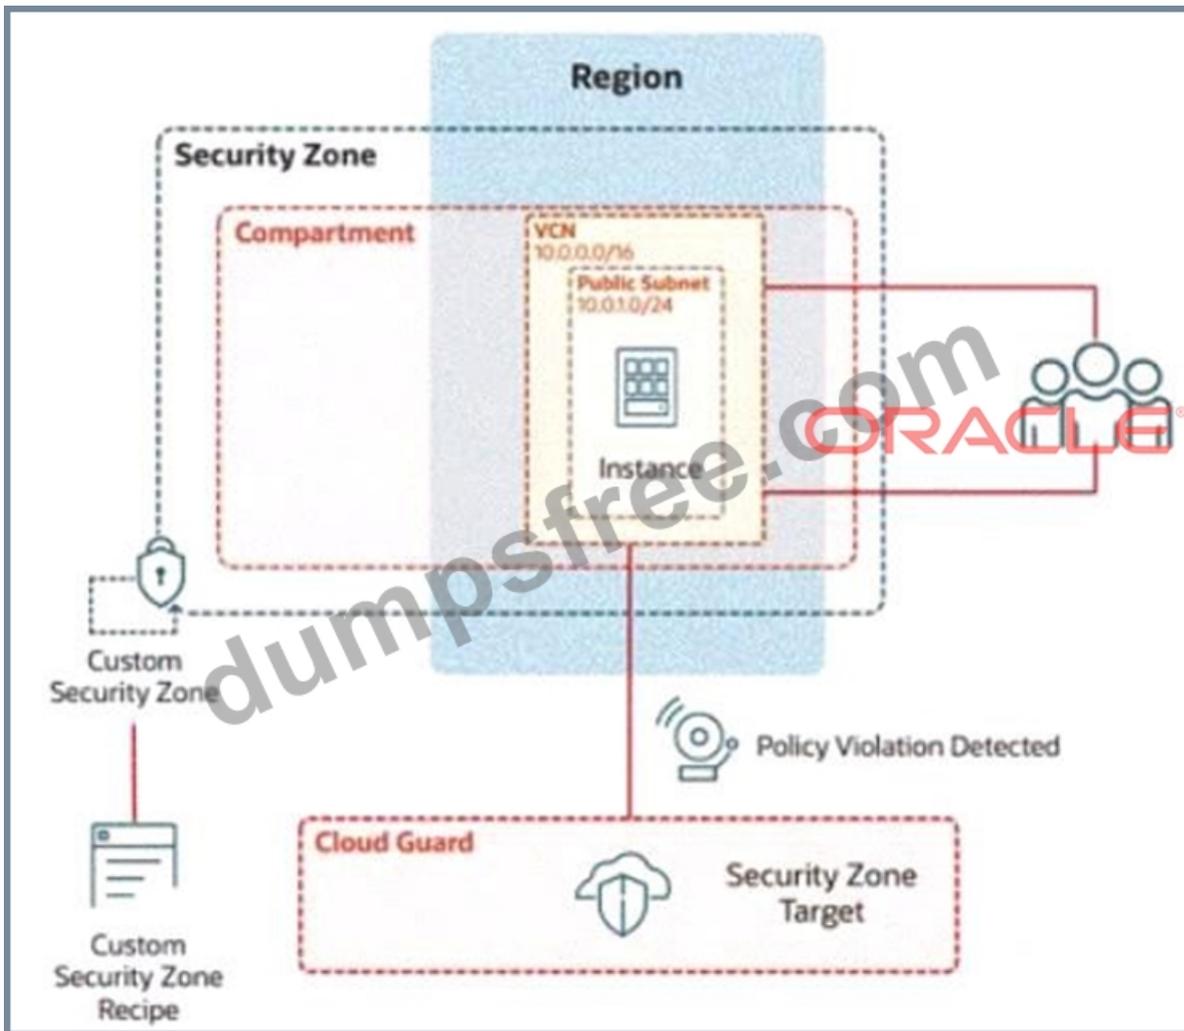

Preconfigured

To complete this requirement, you are provided with the following:

Access to an OCI tenancy, an assigned compartment, and OCI credentials

Required IAM policies

Task 4: Create a Public Subnet

Create a public subnet named IAD-SP-PBT-PUBSNET-01, within the VCN IAD-SP-PBT-VCN-01 use a CIDR block of 10.0.1.0/24 and configure the subnet to use the internet Gateway See the solution below in Explanation.

Answer:

Explanation:

To create a public subnet named IAD-SP-PBT-PUBSNET-01 within the VCN IAD-SP-PBT-VCN-01 using a CIDR block of 10.0.1.0/24 and configure it to use the Internet Gateway, follow these steps based on the Oracle Cloud Infrastructure (OCI) Networking documentation.

Step-by-Step Solution for Task 4: Create a Public Subnet

* Log in to the OCI Console:

* Use your OCI credentials to log in to the OCI Console (https://console.us-ashburn-1.oraclecloud. com).

* Ensure you have access to the assigned compartment.

* Navigate to Virtual Cloud Networks:

* From the OCI Console, click the navigation menu (hamburger icon) on the top left.

* Under Networking, select Virtual Cloud Networks.

* Select the VCN:

* Locate and click on the VCN named IAD-SP-PBT-VCN-01 created in Task 3.

* Under Resources, select Subnets.

* Create a New Subnet:

* Click the Create Subnet button.

* Configure the Subnet Details:

* Name: Enter IAD-SP-PBT-PUBSNET-01.

* Compartment:Ensure it is set to the assigned compartment.
* Subnet Type:SelectPublic Subnet.
* CIDR Block:Enter 10.0.1.0/24.
* Route Table:Select the default route table associated with the VCN (ensure it includes a route to the Internet Gateway with destination 0.0.0.0/0).
* Subnet Access:SelectPublic Subnetand ensure the Internet Gateway is associated.
* DHCP Options:Leave as default or customize if required.
* Security List:Use the default security list or create a new one with appropriate ingress/egress rules (e.g., allow TCP port 22 for SSH and all egress traffic).
* Associate the Internet Gateway:
* Verify that the subnet is configured to route traffic through the Internet Gateway. This is automatically handled if you selected the public subnet option and the VCN's route table is correctly set (as configured in Task 3).
* If needed, edit the route table for the subnet to ensure a rule exists:
* Destination CIDR Block:0.0.0.0/0
* Target Type:Internet Gateway
* Target:Select the Internet Gateway associated with IAD-SP-PBT-VCN-01.
* Create the Subnet:
* ClickCreateto provision the subnet.
* Once created, the subnet will be listed under the VCN's subnets.
* Verify the Configuration:
* Go to the subnet details page for IAD-SP-PBT-PUBSNET-01.
* Confirm the CIDR block is 10.0.1.0/24 and that it is a public subnet with Internet Gateway access.
Notes
* Ensure the CIDR block 10.0.1.0/24 does not overlap with existing subnets in the VCN (10.0.0.0/16, including 10.0.10.0/24 from Task 3).
* The Internet Gateway association relies on the route table configuration from Task 3. If it's missing, update the route table as described in Step 6.

NEW QUESTION # 42
......

Are you still worried about the exam? Don't worry! Our 1z0-1104-25 exam torrent can help you overcome this stumbling block during your working or learning process. Under the instruction of our 1z0-1104-25 test prep, you are able to finish your task in a very short time and pass the exam without mistakes to obtain the Oracle certificate. We will tailor services to different individuals and help them take part in their aimed exams after only 20-30 hours practice and training. Moreover for all your personal information, we will offer protection acts to avoid leakage and virus intrusion so as to guarantee the security of your privacy. What is most important is that when you make a payment for our 1z0-1104-25 Quiz torrent, you will possess this product in 5-10 minutes and enjoy the pleasure and satisfaction of your study time.
