## AD0-E725 Zertifizierungsfragen, Adobe AD0-E725 PrüfungFragen

Viele der ITZert AD0-E725 Adobe Commerce Developer Expert Prüfungsvorbereitung Antworten sind in Vielfache-Wahl-Fragen (MCQs) FormatQualität geprüften Adobe Commerce Developer Expert Produkte viele Male vor der VeröffentlichungKostenlose Demo der Prüfung ITZert AD0-E725 an ITZert. Um Ihre Zertifizierungsprüfungen reibungslos erfolgreich zu meistern brauchen Sie nur unsere Prüfungsfragen und Antworten zu Adobe AD0-E725 (Adobe Commerce Developer Expert) auswendigzulernen.

## Adobe Commerce Developer Expert AD0-E725 Prüfungsfragen mit Lösungen

## (Q28-Q33):

### 28. Frage

A Developer is working on an Adobe Commerce store, and the security team has flagged certain inline scripts in the store as vulnerable to potential attacks. The Developer decides to implement Content Security Policies (CSP) to secure the store's environment.

What will the Developer achieve by taking this action?

- A. Restrict which resources (scripts, styles, images) are allowed to load on the website.
- B. Ensure that all user input is sanitized before being processed by the application.
- C. Prevent users from accessing certain areas of the website based on their IP address.

**Antwort: A**

### 29. Frage

A client uses a straightforward custom payment method which allows a pre-generated code to be used as payment. The code is provided directly to customers through email and other communications. The client reports a problem with someone fraudulently guessing the codes correctly. They want to implement an API check that ensures the code exists in their system when the code is applied.

Where should the Developer add this change?

- A. Create a before plugin on the canCapture method and implement the API check there.
- B. Create a custom validator that will check for this code at the time the order is placed.
- C. Create an after plugin on the canAuthorize method and implement the API check there.

**Antwort: B**

Begründung:

The correct approach is to implement a custom payment validator. Validators ensure that the payment method data is validated at the checkout process, before the order is placed.

A (canCapture) is used for payment capture operations, not code validation.

C (canAuthorize) is used for authorization checks, but not the correct place for validating custom input codes.

B is correct because validators run at checkout, ensuring only valid codes are accepted.

Adobe Commerce DevDocs - Custom payment method validators

### 30. Frage

A Developer needs to set up a message queue topic in Adobe Commerce to asynchronously handle order processing. Which XML file should the Developer use to configure this?

- A. communication.xml
- B. queue\_consumer.xml
- C. queue\_topology.xml

**Antwort: C**

### 31. Frage

A client recently started using the new Adobe Live Search functionality. They report an issue with content from the website, such as CMS blocks, not returning with the search result.

A Developer is asked to investigate because the client wants this content to be part of the data pool of Live Search.

How should the Developer respond to the client?

- A. Extend the class `Magento\LiveSearchAdapter\Model\Attribute\Metadata`.
- B. Advise the client to enable content for Live Search from the admin panel.
- C. Share documentation regarding the limitations of Live Search.

**Antwort: C**
