NEW QUESTION # 62

Your company is piloting the use of Microsoft 365 Copilot and has purchased 100 Microsoft 365 Copilot licenses. You need to view detailed reports about Copilot usage in Microsoft Teams, such as meeting hours summarized by Copilot and meeting actions taken by using Copilot. What should you use?

- A. the Microsoft 365 Apps usage report in the Microsoft 365 admin center
- **B. the Microsoft 365 Copilot dashboard in Microsoft Viva Insights**
- C. the Microsoft 365 Copilot usage report in the Microsoft 365 admin center
- D. the Microsoft 365 Copilot readiness report in the Microsoft 365 admin center

Answer: B

Explanation:

The correct answer is C. the Microsoft 365 Copilot dashboard in Microsoft Viva Insights . Microsoft documents that the Microsoft Copilot Dashboard in Viva Insights provides detailed organizational reporting for Copilot usage and impact, including meeting-related metrics such as total meeting hours summarized or recapped , intelligent recap actions taken using Copilot , and summarize meeting actions taken using Copilot in Teams . Those metrics directly match the scenario in the question.

The other options are less suitable. The Microsoft 365 Apps usage report focuses on app usage generally, not detailed Copilot-in-Teams behavior. The Copilot readiness report is for readiness and deployment planning, not deep Teams usage metrics. The Microsoft 365 Copilot usage report in the admin center provides adoption information, but Microsoft's detailed meeting-action and meeting-hours metrics are documented in the Viva Insights Copilot Dashboard . Therefore, for detailed Teams-specific Copilot reporting during a pilot, the best answer is the Microsoft 365 Copilot dashboard in Microsoft Viva Insights .

NEW QUESTION # 64

Select the answer that correctly completes the sentence.

□

Answer:

Explanation:

□

Explanation:

From the SharePoint admin center, you can create a site .

The correct answer is site . Microsoft documents that in the SharePoint admin center , administrators can go to Active sites and select Create to create a new SharePoint site, such as a team site or communication site .

Microsoft also describes site creation as one of the key tasks available to users with the SharePoint Administrator role.

The other options do not fit this sentence. A server is not something you create from the SharePoint admin center in Microsoft 365, because SharePoint Online is a Microsoft-managed cloud service. A user is typically created in the Microsoft 365 admin center or Microsoft Entra admin center, not in the SharePoint admin center. A role is also assigned through Microsoft 365 or Microsoft Entra administrative experiences, not created from the SharePoint admin center as the primary task described here.

So the sentence is correctly completed as: From the SharePoint admin center, you can create a site.
