## 100% Pass 2026 Fantastic ISO-IEC-27001-Lead-Implementer: High PECB Certified ISO/IEC 27001 Lead Implementer Exam Quality

Good news comes that our company has successfully launched the new version of the ISO-IEC-27001-Lead-Implementer guide tests. Perhaps you are deeply bothered by preparing the exam, perhaps you have wanted to give it up. Now, you can totally feel relaxed with the assistance of our ISO-IEC-27001-Lead-Implementer actual test. Our products are definitely more reliable and excellent than other exam tool. What is more, the passing rate of our study materials is the highest in the market. There are thousands of customers have passed their exam and get the related certification. After that, all of their ISO-IEC-27001-Lead-Implementer Exam torrents were purchase on our website.

## PECB Certified ISO/IEC 27001 Lead Implementer Exam Sample Questions (Q229-Q234):

### NEW QUESTION # 229

How can SkyFleet demonstrate its ongoing commitment to continual improvement in information security?

- A. By outsourcing its information security responsibilities to a third-party vendor
- B. By letting employees take independent action ensures swift problem resolution
- **C. By publishing an annual report on information security performance**

**Answer: C**

### NEW QUESTION # 230

Scenario:

Jane is a developer deploying an application using a language supported by her cloud provider. She doesn't manage the underlying infrastructure but needs control over the application and its environment.

Question:

Which cloud service model does Jane need?

- **A. Platform as a Service**
- B. Software as a Service
- C. Infrastructure as a Service

**Answer: A**

Explanation:

ISO/IEC 17788:2014 (Cloud Computing Overview and Vocabulary) defines:

\* Platform as a Service (PaaS):

"The capability provided to the consumer is to deploy onto the cloud infrastructure consumer-created or acquired applications... The consumer does not manage or control the underlying infrastructure." Jane's requirements precisely match the PaaS model, where she controls the app and environment (runtime, storage) but not the infrastructure (servers, OS).

### NEW QUESTION # 231

Scenario 7: InfoSec is a multinational corporation headquartered in Boston, MA, which provides professional electronics, gaming, and entertainment services. After facing numerous information security incidents, InfoSec has decided to establish teams and implement measures to prevent potential incidents in the future. Emma, Bob, and Anna were hired as the new members of InfoSec's information security team, which consists of a security architecture team, an incident response team (IRT) and a forensics team. Emma's job is to create information security plans, policies, protocols, and training to prepare InfoSec to respond to incidents effectively. Emma and Bob would be full-time employees of InfoSec, whereas Anna was contracted as an external consultant. Bob, a network expert, will deploy a screened subnet network architecture. This architecture will isolate the demilitarized zone (DMZ) to which hosted public services are attached and InfoSec's publicly accessible resources from their private network. Thus, InfoSec will be able to block potential attackers from causing unwanted events inside the company's network. Bob is also responsible for ensuring that a thorough evaluation of the nature of an unexpected event is conducted, including the details on how the event happened and what or whom it might affect.

Anna will create records of the data, reviews, analysis, and reports in order to keep evidence for the purpose of disciplinary and legal action, and use them to prevent future incidents. To do the work accordingly, she should be aware of the company's information security incident management policy beforehand. Among others, this policy specifies the type of records to be created, the place where they should be kept, and the format and content that specific record types should have.

Based on scenario 7, InfoSec contracted Anna as an external consultant. Based on her tasks, is this action compliant with ISO/IEC 27001°

- A. Yes, organizations must use external consultants for forensic investigation, as required by the standard
- **B. Yes, forensic investigation may be conducted internally or by using external consultants**
- C. No, the skills of incident response or forensic analysis shall be developed internally

**Answer: B**

Explanation:

According to ISO/IEC 27001:2022, clause 8.2.3, the organization shall establish and maintain an incident response process that includes the following activities:

a) planning and preparing for incident response, including defining roles and responsibilities, establishing communication channels, and providing training and awareness; b) detecting and reporting information security events and weaknesses; c) assessing and deciding on information security incidents; d) responding to information security incidents according to predefined procedures; e) learning from information security incidents, including identifying root causes, taking corrective actions, and improving the incident response process; f) collecting evidence, where applicable.

The standard does not specify whether the incident response process should be performed internally or externally, as long as the organization ensures that the process is effective and meets the information security objectives. Therefore, the organization may decide to use external consultants for forensic investigation, as long as they comply with the organization's policies and procedures, and protect the confidentiality, integrity, and availability of the information involved.

ISO/IEC 27001:2022, clause 8.2.3; PECB ISO/IEC 27001 Lead Implementer Study Guide, section 8.2.3.

### NEW QUESTION # 232

Based on scenario 9, OpenTech has taken all the actions needed, except \_\_\_\_\_.

- A. Corrective actions
- **B. Permanent corrections**
- C. Preventive actions

**Answer: B**

### NEW QUESTION # 233

Is Yefund's development of communication protocols acceptable?

- A. Yes, because external communications are not relevant to the ISMS
- B. Yes, because internal communications are the primary factor influencing information security
- **C. No, Yefund should have determined internal and external communications**

**Answer: C**

Explanation:

ISO/IEC 27001:2022 Clause 7.4 requires that organizations determine both internal and external communications relevant to the ISMS. This includes what to communicate, when, with whom, and how, to ensure stakeholders-including clients and regulators-are properly informed. Focusing only on internal communications is noncompliant.

"The organization shall determine the need for internal and external communications relevant to the information security management system, including on what to communicate, when, with whom, and how."

- ISO/IEC 27001:2022, Clause 7.4

### NEW QUESTION # 234

.....

It is known to us that the error correction is very important for these people who are preparing for the ISO-IEC-27001-Lead-Implementer exam in the review stage. It is very useful and helpful for a lot of people to learn from their mistakes, because many people will make mistakes in the same way, and it is very bad for these people to improve their accuracy. If you want to correct your mistakes when you are preparing for the ISO-IEC-27001-Lead-Implementer Exam, the study materials from our company will be the best choice for you. Because our ISO-IEC-27001-Lead-Implementer reference materials can help you correct your mistakes and keep after you to avoid the mistakes time and time again. We believe that if you buy the ISO-IEC-27001-Lead-Implementer exam prep from our company, you will pass your exam in a relaxed state.
