Valid D-PDM-DY-23 Test Duration & Sample D-PDM-DY-23 Exam

Take your exam preparation to the next level with FreeDumps EMC Practice Test engine. Our practice test engine is designed by experts and features real Dell PowerProtect Data Manager Deploy 2023 Exam (D-PDM-DY-23) practice questions, providing you with a simulated exam environment. By using the practice test engine, you can assess your progress, identify areas of weakness, and master the exam material. This interactive tool enhances your understanding of the actual D-PDM-DY-23 pattern, ensuring you feel fully prepared on exam day.

EMC Dell PowerProtect Data Manager Deploy 2023 Exam Sample Questions (Q31-Q36):

NEW QUESTION # 31

What is a major challenge in configuring PowerProtect Data Manager for Kubernetes environments?

Response:

- A. Integrating with Kubernetes API server
- B. Balancing the load across multiple nodes
- C. Ensuring consistent backup of persistent volumes
- D. Managing the backup of container images

Answer: C

NEW QUESTION # 32

For backing up a VM with PowerProtect Data Manager, what is essential?

- A. VM ' s network configuration
- **B. VM ' s storage configuration**
- C. VM ' s physical location
- D. VM ' s operating system

Answer: B

Explanation:

In a virtualized environment (specifically VMware), PowerProtect Data Manager relies on the VM Direct Engine (vProxy) to perform data movement. For a successful backup, the storage configuration is the most essential element among the choices provided.

* Storage Configuration: PPDM must be able to interact with the underlying Datastore where the VM disks reside. The backup process involves taking a VMware snapshot and then mounting those disks to the VM Direct Engine. If the storage configuration is incompatible—for example, if the disks are on a datastore not accessible by the proxy or use an unsupported transport mode—the backup will fail.

* Snapshot Technology: The backup is storage-centric. PPDM triggers a snapshot via the vCenter API.

The configuration of that storage (whether it is VSAN, VMFS, or NFS) dictates how the VM Direct Engine interacts with the data, specifically choosing between HotAdd, NBD, or SAN transport modes.

* Operating System and Network: While the OS and Network are relevant for "guest-level" interactions (like application-consistent backups or network throughput), the foundational ability to back up the VM as an image-level asset depends entirely on the storage accessibility and configuration.

NEW QUESTION # 33

Which feature of PowerProtect Data Manager aids in quickly finding specific backup files?

Response:

- A. SLA Compliance tool
- B. Reporting tool
- **C. Search Engine**
- D. Protection Policies

Answer: C

NEW QUESTION # 34

What is the correct sequence of steps to restore the most recent backup of the Microsoft Exchange Database using Exchange Management Shell?

- **A. 1. Import the backup configuration information.**
2. List the Microsoft Exchange mailbox database backups.
3. Find the latest Microsoft Exchange mailbox database backup.
4. Allow the database to be overwritten by a restore operation.
5. Run restore the Microsoft Exchange mailbox database command.
- B. 1. Import the backup configuration information.
2. Allow the database to be overwritten by a restore operation.
3. Find the latest Microsoft Exchange mailbox database backup.
4. Run restore the Microsoft Exchange mailbox database command.
5. List the Microsoft Exchange mailbox database backups.
- C. 1. Run restore the Microsoft Exchange mailbox database command.
2. Import the backup configuration information.
3. Find the latest Microsoft Exchange mailbox database backup.
4. Allow the database to be overwritten by a restore operation.
5. List the Microsoft Exchange mailbox database backups.
- D. 1. Find the latest Microsoft Exchange mailbox database backup.

2. List the Microsoft Exchange mailbox database backups.
3. Run restore the Microsoft Exchange mailbox database command.
4. Allow the database to be overwritten by a restore operation.
5. Import the backup configuration information.

Answer: A

NEW QUESTION # 35

What is the basic function of SLA Compliance in PowerProtect Data Manager?

Response:

- A. To encrypt backup data
- **B. To ensure backups meet set service level agreements**
- C. To manage user access
- D. To optimize network performance

Answer: B

NEW QUESTION # 36
