

H12-891_V1.0 Valid Exam Blueprint - H12-891_V1.0 Reliable Test Topics

BTW, DOWNLOAD part of PDF4Test H12-891_V1.0 dumps from Cloud Storage: https://drive.google.com/open?id=1b6TD0j3DK9M0_i6IWYSvafatSkiSYJn3

Improving your efficiency and saving your time has always been the goal of our H12-891_V1.0 preparation exam. If you are willing to try our H12-891_V1.0 study materials, we believe you will not regret your choice. With our H12-891_V1.0 Practice Engine for 20 to 30 hours, we can claim that you will be quite confident to attend you exam and pass it for sure for we have high pass rate as 98% to 100% which is unmatched in the market.

The HCIE-Datacom V1.0 certification program is an advanced-level certification program that requires candidates to have extensive knowledge and experience in data communication technologies. HCIE-Datacom V1.0 certification program covers a wide range of topics including network design, network optimization, network security, and network troubleshooting.

Free PDF Quiz 2026 Huawei - H12-891_V1.0 - HCIE-Datacom V1.0 Valid Exam Blueprint

PDF4Test offers authentic and up-to-date H12-891_V1.0 study material that every candidate can rely on for good preparation. Our top priority is to help you pass the HCIE-Datacom V1.0 (H12-891_V1.0) exam on the first try. The cost of registering for a

certification HCIE-Datacom V1.0 (H12-891_V1.0) exam is quite expensive, ranging between \$100 and \$1000. After paying such an amount, the candidate is sure to be on a tight budget. PDF4Test provides HCIE-Datacom V1.0 (H12-891_V1.0) preparation material at very low prices compared to other platforms. We also assure you that the amount will not be wasted and you will not have to pay for the HCIE-Datacom V1.0 (H12-891_V1.0) certification test for a second time.

To prepare for the exam, candidates are encouraged to take training courses and practice exams that are specifically designed to help them prepare for the exam. There are many resources available to help candidates prepare for the exam, including online study guides, practice exams, and training courses. Candidates should also have hands-on experience working with data communication technologies in a professional setting.

Huawei HCIE-Datacom V1.0 Sample Questions (Q154-Q159):

NEW QUESTION # 154

Fill in Blank

The Ingress VTEP performs both Layer 2 and Layer 3 table lookup for packet forwarding. The forwarding mode is _____ IRB forwarding. (Capitalize the first letter.)

Answer:

Explanation:

IntegratedIn VXLAN routing

Explanation:

IntegratedIn VXLAN routing, there are two primary IRB forwarding modes: Integrated IRB forwarding: Both Layer 2 and Layer 3 lookups are performed at the Ingress VTEP for more efficient forwarding. Distributed IRB is another mode, but in this scenario, where both L2 and L3 lookups are needed at the Ingress VTEP, the correct mode is Integrated. Correct answer: Integrated

NEW QUESTION # 155

Which of the following roles is NOT a core role in Huawei's Free Mobility solution?

- A. iMaster NCE-Campus
- B. Policy enforcement device
- C. Policy control device
- **D. Authentication device**

Answer: D

Explanation:

Understanding Huawei's Free Mobility Solution

Huawei's Free Mobility solution is designed to ensure that users can seamlessly access the network regardless of their physical location while maintaining consistent policies.

#Key Components in Free Mobility Solution:

1##iMaster NCE-Campus (Answer A - Core Role)

Manages network policies & user access.

Implements centralized policy control & orchestration.

2##Policy Enforcement Device (Answer B - Core Role)

Ensures that user policies (such as QoS, security, VLANs) are applied dynamically.

Typically as switch or gateway enforcing access control.

3##Policy Control Device (Answer D - Core Role)

Stores and dynamically assigns policies based on user role & device type.

Works closely with iMaster NCE-Campus.

#Why is C (Authentication Device) NOT a Core Role?

#Authentication devices (such as a RADIUS or AAA server) are not a core component of Huawei's Free Mobility solution.

They are part of the broader network security framework but not mandatory for Free Mobility.

Real-World Application:

Used in enterprise & campus networks where employees, guests, and IoT devices need seamless access while maintaining security policies.

#Reference: Huawei HCIE-Datacom Guide - Free Mobility Architecture & Policy Management

NEW QUESTION # 156

The following is a description of how BFD sessions are established, which is the wrong one

- A. BFD sessions can only be established dynamically
- **B. Static configuration of BFD session refers to manual configuration of BFD session parameters through the command line, including local identifiers and remote identifiers**
- C. The system distinguishes between static BFD sessions and dynamic BFD sessions by dividing the identifier area
Dynamically assign this landmark identifier

Answer: B

NEW QUESTION # 157

Which of the following technologies can be used to isolate users in the same VLAN?

- **A. Port isolation**
- **B. Ethernet port security**
- **C. IPSG**
- D. Super VLAN

Answer: A,B,C

Explanation:

Understanding User Isolation in the Same VLAN

In a traditional VLAN, all devices within the same VLAN can communicate unless additional security policies are applied. To isolate users within the same VLAN, the following technologies can be used:

B. Port Isolation (Private VLAN or Layer 2 Isolation)

Prevents communication between ports within the same VLAN.

Common in enterprise and campus networks to improve security.

Example: Isolating guest users from employees within the same VLAN.

C. IPSG (IP Source Guard)

Blocks IP address spoofing within the same VLAN.

Uses DHCP snooping binding table to verify whether a device is using an authorized IP address.

D. Ethernet Port Security

Limits the number of MAC addresses allowed per port.

Prevents unauthorized devices from communicating within the VLAN.

A. Super VLAN (Incorrect Choice)

Super VLAN groups multiple VLANs under a single Layer 3 gateway, but it does not provide isolation within the same VLAN.

Real-World Application:

Public Wi-Fi Networks: Ensures that users within the same VLAN cannot communicate with each other.

Enterprise Security: Prevents unauthorized access or attacks within shared VLANs.

Reference: Huawei HCIE-Datacom Guide - VLAN Security and User Isolation Technologies

NEW QUESTION # 158

Refer to the following command output on the router R3. Which of the following statements are correct?

```
<R3> display interface Tunnel
```

```
Tunnel0/0/0 current state : UP
```

```
Line protocol current state : UP
```

```
Last line protocol up time : 15:21:26 UTC-08:00
```

```
Description: HUAWEI, AR Series, Tunnel0/0/0 Interface
```

```
Route Port, The Maximum Transmit Unit is 1500
```

```
Internet Address is 20.1.1.2/24
```

```
Encapsulation is TUNNEL, loopback not set
```

```
Tunnel source 10.0.3.3 (LoopBack0), destination 10.0.1.1
```

```
Tunnel protocol/transport GRE/IP, key disabled
```

```
keepalive disabled
```

```
Checksumming of packets disabled
```

- **A. The tunnel interface IP address is 20.1.1.2/24.**
- B. The tunnel source IP address is 10.0.1.1.

- C. The tunnel destination IP address is 10.0.1.1.
- D. The tunnel interface MTU is 1500 bytes.

Answer: A,C,D

Explanation:

From the output:

Tunnel destination IP address: Clearly shown as destination 10.0.1.1 → □ Tunnel interface MTU: Shown as The Maximum Transmit Unit is 1500 → □ Tunnel interface IP: Shown as Internet Address is 20.1.1.2/24 → □ Tunnel source: Tunnel source 10.0.3.3 (LoopBack0) → Not 10.0.1.1 → □ Therefore:

A - Correct

B - Correct

C - Correct

D - Incorrect (confuses destination as source)

Correct answers: A, B, C
