On the one hand, by the free trial services you can get close contact with our products, learn about the detailed information of our FCP_FCT_AD-7.4 Study Materials, and know how to choose the right version of our FCP_FCT_AD-7.4 exam questions.

Fortinet FCP - FortiClient EMS 7.4 Administrator Sample Questions (Q61-Q66):

NEW QUESTION # 61

Refer to the exhibits.

Which show the Zero Trust Tag Monitor and the FortiClient GUI status.
 Remote-Client is tagged as Remote-Users on the FortiClient EMS Zero Trust Tag Monitor.
 What must an administrator do to show the tag on the FortiClient GUI?

- A. Update tagging rule logic to enable tag visibility
- B. B. Change the FortiClient system settings to enable tag visibility
- C. Change the endpoint control setting to enable tag visibility
- D. Change the user identity settings to enable tag visibility

Answer: B

Explanation:

Based on the exhibits provided:

- * The "Remote-Client" is tagged as "Remote-Users" in the FortiClient EMS Zero Trust Tag Monitor.
 - * To ensure that the tag "Remote-Users" is visible in the FortiClient GUI, the system settings within FortiClient need to be updated to enable tag visibility.
 - * The tag visibility feature is controlled by FortiClient system settings which manage how tags are displayed in the GUI.
- Therefore, the administrator needs to change the FortiClient system settings to enable tag visibility.

NEW QUESTION # 62

Exhibit.

Based on the logs shown in the exhibit, why did FortiClient EMS fail to install FortiClient on the endpoint?

- A. The remote registry service is not running.
- **B. The task scheduler service is not running.**
- C. The Windows installer service is not running.
- D. The FortiClient antivirus service is not running.

Answer: B

Explanation:

<https://community.fortinet.com/t5/FortiClient/Technical-Note-FortiClient-fails-to-install-from-FortiClient-EMS/ta-p/193680> The deployment service error message may be caused by any of the following. Try eliminating them all, one at a time.

1. Wrong username or password in the EMS profile
2. Endpoint is unreachable over the network
3. Task Scheduler service is not running
4. Remote Registry service is not running
5. Windows firewall is blocking connection

NEW QUESTION # 63

Refer to the exhibit.

Based on the settings shown in the exhibit what action will FortiClient take when it detects that a user is trying to download an infected file?

- A. Quarantines the infected files and logs all access attempts
- **B. Allows the infected file to download without scan**
- C. Blocks the infected files as it is downloading
- D. Sends the infected file to FortiGuard for analysis

Answer: B

Explanation:

Block Malicious Website has nothing to do with infected files. Since Realtime Protection is OFF, it will be allowed without being

scanned.

Based on the settings shown in the exhibit:

- * Realtime Protection:OFF
- * Dynamic Threat Detection:OFF
- * Block malicious websites:ON
- * Threats Detected:75

The "Realtime Protection" setting is crucial for preventing infected files from being downloaded and executed. Since "Realtime Protection" is OFF, FortiClient will not actively scan files being downloaded. The setting "Block malicious websites" is intended to prevent access to known malicious websites but does not scan files for infections.

Therefore, when a user tries to download an infected file, FortiClient will allow the file to download without scanning it due to the Realtime Protection being OFF.

NEW QUESTION # 64

Refer to the exhibit, which shows the output of the ZTNA traffic log on FortiGate.

```
eventtime=1633064101662546935 l1=10700 logid="0000000013" type="traffic"
subtype="forward" level="notice" vd="root" srcip=100.64.3.100 srcport=58664 srcintf="port1"
srcintfrole="wan" dstip=100.64.1.10 dstport=9443 dstintf="root" dstintfrole="undefined"
srccountry="Reserved" dstcountry="Reserved" sessionid=215 proto=6 action="deny" policyid=0
policytype="proxy-policy" service="tcp/9443" transmit="noop" duration=0 sentbyte=0 rcvbyte=0 sentpkt=0
rcvpkt=0 appcat="unscanned" utmaction="block" countztna=1 msg="Denied: failed to match a proxy-policy"
utmref=65462-14
```

What can you conclude from the log message?

- A. The remote user connection does not match the local-in policy.
- B. The remote user connection does not match the ZTNA server configuration.
- **C. The remote user connection does not match the ZTNA rule configuration.**
- D. The remote user connection does not match the ZTNA firewall policy.

Answer: C

Explanation:

* Observation of ZTNA Traffic Log:

* The log message indicates that the remote user connection was denied due to failure to match a proxy policy.

* Evaluating Log Message:

* The message suggests that the connection does not match the existing ZTNA rule configuration, leading to the denial.

* Conclusion:

* The correct conclusion from the log message is that the remote user connection does not match the ZTNA rule configuration (B).

NEW QUESTION # 65

When multitenancy is enabled on FortiClient EMS, which administrator role can provide access to the global site only? (Choose one answer)

- **A. Settings administrator**
- B. Tenant administrator
- C. Standard administrator
- D. Global administrator

Answer: A

Explanation:

According to the FortiClient EMS Administration Guide (specifically the sections on Multitenancy), when multitenancy is enabled, the system introduces specific administrator roles to manage the separation between global settings and individual sites.

1. The Settings Administrator Role (Answer B)

* Specific Scope: The Settings administrator is a specialized role designed to have access to the global site only.

* Permissions: This role can access all configuration options on the global site, with the notable exception of administrator configuration (they cannot create or manage other admin accounts).

* Use Case: This is typically used for auditors or system managers who need to oversee global-level configurations without needing access to specific endpoint data within individual sites or the power to modify administrative users.

2. Comparison with Other Multitenancy Roles

* Super administrator: This role has unlimited access to the global site and all other sites within the EMS instance.

* Site administrator: This role is restricted to specified sites only and has no access to the global site.

* Standard administrator (Answer C): This is a generic role level within a site or a single-tenant environment but is not the role that defines "global-only" access in a multitenant setup.

* Tenant administrator / Global administrator: While these terms are common in general IT, FortiClient EMS documentation specifically uses the titles Super, Settings, and Site administrators for multitenancy management.

3. Curriculum References

* FortiClient EMS 7.2/7.4 Study Guide (Multitenancy Chapter): Explicitly lists "Settings administrator" as the role providing access to the global site only.

* Admin Roles Table: The documentation provides a comparison table where the Settings Administrator's scope is strictly defined as "Global site only".

NEW QUESTION # 66

.....

Getting tired of humdrum life, you may want to get some successful feeling or try something different instead. We all know that is of important to pass the FCP_FCT_AD-7.4 exam and get the FCP_FCT_AD-7.4 certification for someone who wants to find a good job in internet area, and it is not a simple thing to prepare for exam. So you are in the right place now. The FCP_FCT_AD-7.4 practice materials are a great beginning to prepare your exam. Actually, just think of our Fortinet practice materials as the best way to pass the exam is myopic. They can not only achieve this, but ingeniously help you remember more content at the same time.
