

4A0-D01 Latest Test Materials - 4A0-D01 Valid Test Sample

Clear the Nokia 4A0-D01 exam with ease by using our top-rated practice test material. With thousands of satisfied applicants in multiple countries, our product guarantees that you will pass the Nokia Data Center Fabric Fundamentals Exam (4A0-D01) exam as quickly as possible. And if you don't pass, we'll refund your money! Some terms and conditions apply, which are outlined on our guarantee page. Don't miss out on this incredible opportunity – purchase our 4A0-D01 Practice Test material today!

Nokia 4A0-D01 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Nokia DC Fabric Solution: This section of the exam measures skills of a Data Center Network Engineer and covers the architecture and benefits of modern Layer 3 data center networks. It includes an overview of BGP-based routing, VXLAN and EVPN overlays for multi-tenant environments, and key features of the SR Linux operating system. The section also explains how APIs are used for external configuration and introduces the Fabric Services System's management capabilities.
Topic 2	<ul style="list-style-type: none">SR Linux User and System Management: This section of the exam measures skills of a Network Automation Specialist and includes managing user roles, TLS configurations for secure communication, and automation features like Zero-Touch Provisioning (ZTP). It covers ZTP setup, configuration processes, and common issues that may arise during deployment.
Topic 3	<ul style="list-style-type: none">This section of the exam measures skills of a Network Automation Specialist and introduces the principles of Event Driven Automation in SR Linux environments. It covers integration with Kubernetes and explores core use cases such as intent-based automation for fabrics and services, as well as enhanced network observability.

2026 4A0-D01 Latest Test Materials 100% Pass | Professional 4A0-D01 Valid Test Sample: Nokia Data Center Fabric Fundamentals Exam

Our 4A0-D01 exam reference materials allow free trial downloads. You can get the information you want to know through the trial version. After downloading our 4A0-D01 study materials trial version, you can also easily select the version you like, as well as your favorite 4A0-D01 exam prep, based on which you can make targeted choices. Our 4A0-D01 Study Materials want every user to understand the product and be able to really get what they need. Our 4A0-D01 study materials are so easy to understand that no matter who you are, you can find what you want here.

Nokia Data Center Fabric Fundamentals Exam Sample Questions (Q29-Q34):

NEW QUESTION # 29

Examine the exhibit. Which of the following statements is TRUE?

IPv4 Unicast route table of network instance default								
Prefix	ID	Active	Owner	Metric	Pref	Next-hop (Type)		Next-hop Interface
192.168.20.0/30	0	true	static	1	5	10.1.1.0 (indirect)		None
						10.2.1.0 (indirect)		None

- A. The next-hop selected for this route will be based on the preference value configured for each next-hop.
- B. A recursive lookup is performed to resolve 10.1.1.0 to use 10.2.1.0.
- C. A recursive lookup is performed to resolve 10.2.1.0 to use 10.1.1.0.
- D. The next-hop group for this static route is configured with two next-hops.

Answer: D

Explanation:

The static route shows two next-hop IP addresses (10.1.1.0 and 10.2.1.0) listed, indicating that a next-hop group with multiple next-hops is configured for load balancing or redundancy.

NEW QUESTION # 30

Which of the following statements about the data center's leaf-spine topology (clos network) is FALSE?

- A. It uses ECMP to distribute traffic across duplicate links.
- B. Each leaf router is connected to all the spine routers in the cluster.
- C. It uses the spanning tree protocol to avoid forwarding loops.
- D. It provides a consistent path for east-west traffic.

Answer: C

Explanation:

The leaf-spine (Clos) topology does not use the spanning tree protocol because it relies on equal-cost multipath (ECMP) routing to prevent loops and efficiently utilize all available paths. Spanning tree is typically avoided in modern data center fabrics to enable full bandwidth utilization.

NEW QUESTION # 31

Which of the following Nokia's SR Linux ACLs is instantiated on all line cards to copy incoming packets to the CPM?

- A. CPM-filter ACL
- B. Egress ACL
- C. Capture-filter ACL
- D. Ingress ACL

Answer: A

Explanation:

The CPM-filter ACL is instantiated on all line cards in Nokia's SR Linux to copy incoming packets to the Control Plane Manager (CPM) for processing.

NEW QUESTION # 32

Which of the following is NOT a function of Nokia's SR Linux application manager?

- A. It reads the application's configuration information and starts each application.
- B. It translates the application's YANG model into protobufs for the IDB.
- C. It monitors the health of all applications.
- D. It manages the SR Linux and customer-defined applications.

Answer: B

Explanation:

The SR Linux application manager does not perform the function of translating an application's YANG model into protobufs for the Interface DataBase (IDB). Its primary roles are managing applications, reading their configuration, and monitoring their health.

NEW QUESTION # 33

Based on the exhibit output, which of the following is NOT the reason the user runs the "baseline diff" command?

user admin

```
A:dc-leaf-1# enter candidate private
--( + candidate private private-admin )--[ ]--
A:dc-leaf-1# interface lol subinterface 0 ipv4 address 200.1.1.1/32
--( +* candidate private private-admin )--[ interface lol subinterface 0 ipv4 address
200.1.1.1/32 ]--
A:dc-leaf-1#
--( +! candidate private private-admin )--[ ]--
A:dc-leaf-1# baseline diff
      interface ethernet-1/1 {
-         admin-state disable
      }
```

- A. User admin notices that "!" appears in the CLI prompt.
- B. Another user has committed changes.
- C. User admin is not able to commit their changes.
- D. User admin wants to check if there are differences between the current running config and their baseline datastore.

Answer: C

Explanation:

The "baseline diff" command is used to compare the candidate configuration against the baseline datastore to see changes or conflicts, especially when multiple users are involved or to verify differences. It does not indicate that the user is unable to commit changes.

NEW QUESTION # 34

.....

Do you have the plan to accept this challenge? Looking for a proven and quick method to pass this challenge Nokia 4A0-D01 exam? If your answer is yes then you do not need to go anywhere. Just visit the ActualTestsIT and explore the top features of valid, updated, and real Nokia 4A0-D01 Dumps.
