

# Microsoft SC-100 Reliable Test Prep, Updated SC-100 Demo

P.S. Free 2026 Microsoft SC-100 dumps are available on Google Drive shared by DumpExam: <https://drive.google.com/open?id=1ko7-zlBj3d1xN34RgBAJ1X06fPKuvnSt>

The Microsoft SC-100 certification exam also enables you to stay updated and competitive in the market which will help you to gain more career opportunities. Do you want to gain all these Microsoft Cybersecurity Architect (SC-100) certification exam benefits? Looking for the quick and complete Microsoft SC-100 exam dumps preparation way that enables you to pass the SC-100 Certification Exam with good scores? If your answer is yes then you are at the right place and you do not need to go anywhere. Just download the DumpExam SC-100 Questions and start Microsoft Cybersecurity Architect (SC-100) exam preparation without wasting further time.

To help you get to know the exam questions and knowledge of the SC-100 practice exam successfully and smoothly, our experts just pick up the necessary and essential content in to our SC-100 test guide with unequivocal content rather than trivia knowledge that exam do not test at all. To make you understand the content more efficient, our experts add charts, diagrams and examples in to SC-100 Exam Questions to speed up you pace of gaining success. Up to now, more than 98 percent of buyers of our SC-100 latest dumps have passed it successfully. Up to now they can be classified into three versions: the PDF, the software and the app version. So we give emphasis on your goals, and higher quality of our SC-100 test guide.

## Updated SC-100 Demo | Reliable SC-100 Test Objectives

It is very important for us to keep pace with the changeable world and update our knowledge if we want to get a good job, a higher standard of life and so on. First, we need to get a good SC-100 quiz prep. Because we only pass SC-100 exam and get a certificate, we can have the chance to get a decent job and make more money. But there are question is that how you can pass the SC-100 Exam and get a certificate. The best answer is to download and learn our SC-100 quiz torrent. Our products will help you get what you want in a short time.

Earning the Microsoft Cybersecurity Architect certification demonstrates that a candidate has the knowledge and skills necessary to design and implement secure solutions that protect organizations against cyber threats. It is a valuable credential for professionals looking to advance their career in this field and can open up new opportunities for them in the cybersecurity industry.

## Microsoft Cybersecurity Architect Sample Questions (Q213-Q218):

### NEW QUESTION # 213

You have a hybrid Azure AD tenant that has pass-through authentication enabled.

You are designing an identity security strategy.

You need to minimize the impact of brute force password attacks and leaked credentials of hybrid identities.

What should you include in the design? To answer, drag the appropriate features to the correct requirements.

Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features	Answer Area
<input type="checkbox"/> Azure AD Password Protection	For brute force password attacks: <input type="text"/>
<input type="checkbox"/> Extranet Smart Lockout (ESL)	For leaked credentials: <input type="text"/>
<input type="checkbox"/> Password hash synchronization	

**Answer:**

**Explanation:**

**Features**

<input type="checkbox"/> Azure AD Password Protection
<input type="checkbox"/> Extranet Smart Lockout (ESL)
<input type="checkbox"/> Password hash synchronization

**Answer Area**

For brute force password attacks:

For leaked credentials:

**Explanation:**

**Features**

<input type="checkbox"/> Azure AD Password Protection
<input type="checkbox"/> Extranet Smart Lockout (ESL)
<input type="checkbox"/> Password hash synchronization

**Answer Area**

For brute force password attacks:

For leaked credentials:

### NEW QUESTION # 214

You have a Microsoft 365 subscription and an Azure subscription. Microsoft 365 Defender and Microsoft Defender for Cloud are enabled.

The Azure subscription contains 50 virtual machines. Each virtual machine runs different applications on Windows Server 2019.

You need to recommend a solution to ensure that only authorized applications can run on the virtual machines. If an unauthorized application attempts to run or be installed, the application must be blocked automatically until an administrator authorizes the application.

Which security control should you recommend?

- A. Azure Active Directory (Azure AD) Conditional Access App Control policies
- **B. application control policies in Microsoft Defender for Endpoint**
- C. app protection policies in Microsoft Endpoint Manager
- D. OAuth app policies in Microsoft Defender for Cloud Apps

**Answer: B**

**Explanation:**

Adaptive application controls are an intelligent and automated solution for defining allowlists of known-safe applications for your machines.

Often, organizations have collections of machines that routinely run the same processes.

Microsoft Defender for Cloud uses machine learning to analyze the applications running on your machines and create a list of the known-safe software. Allowlists are based on your specific Azure workloads, and you can further customize the recommendations using the instructions below.

When you've enabled and configured adaptive application controls, you'll get security alerts if any application runs other than the ones you've defined as safe.

Reference:

<https://docs.microsoft.com/en-us/azure/defender-for-cloud/adaptive-application-controls>

<https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policy>

<https://docs.microsoft.com/en-us/defender-cloud-apps/cloud-discovery-anomaly-detection-policy>

<https://docs.microsoft.com/en-us/security/benchmark/azure/overview>

### NEW QUESTION # 215

For a Microsoft cloud environment, you are designing a security architecture based on the Microsoft Cybersecurity Reference Architectures (MCRA). You need to protect against the following external threats of an attack chain:

- \* An attacker attempts to exfiltrate data to external websites.
- \* An attacker attempts lateral movement across domain-joined computers.

What should you include in the recommendation for each threat? To answer, select the appropriate options in the answer area.

Answer Area

An attacker attempts to exfiltrate data to external websites:

- Microsoft Defender for Identity
- Microsoft Defender for Cloud Apps
- Microsoft Defender for Identity
- Microsoft Defender for Office 365

An attacker attempts lateral movement across domain-joined computers:

- Microsoft Defender for Identity
- Microsoft Defender for Cloud Apps
- Microsoft Defender for Identity
- Microsoft Defender for Office 365

Answer:

Explanation:

Answer Area

An attacker attempts to exfiltrate data to external websites:

- Microsoft Defender for Identity
- Microsoft Defender for Cloud Apps
- Microsoft Defender for Identity
- Microsoft Defender for Office 365

An attacker attempts lateral movement across domain-joined computers:

- Microsoft Defender for Identity
- Microsoft Defender for Cloud Apps
- Microsoft Defender for Identity
- Microsoft Defender for Office 365

### NEW QUESTION # 216

You have legacy operational technology (OT) devices and IoT devices.

You need to recommend best practices for applying Zero Trust principles to the OT and IoT devices based on the Microsoft Cybersecurity Reference Architectures (MCRA). The solution must minimize the risk of disrupting business operations.

Which two security methodologies should you include in the recommendation? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. software patching
- B. active scanning
- C. passive traffic monitoring
- D. threat monitoring

Answer: C,D

Explanation:

Adapt processes to Operational Technology (OT) - Adjust your tools and processes to the constraints of OT environments as you integrate them. These environments prioritize safety and often have older systems which don't have patches available and may crash from an active scan.

Focusing on approaches like passive network detections for threats and isolation of systems is often the best approach.

### NEW QUESTION # 217

You have a Microsoft 365 E5 subscription that uses Microsoft Defender XDR and Microsoft Purview.

You need to recommend a data protection solution. The solution must ensure that you can identify users that download atypical amounts of data from Microsoft SharePoint Online.

Which service should you include in the recommendation, and which policy should be configured? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

**Explanation:**  
Answer Area

**Explanation:**

## NEW QUESTION # 218

.....

You might have seen lots of advertisements about SC-100 learning question, there are so many types of SC-100 exam material in the market, why you should choose us? Our reasons are as follow. Our SC-100 test guide is test-oriented, which makes the preparation become highly efficient. Once you purchase our SC-100 exam material, your time and energy will reach a maximum utilization. Thus at that time, you would not need to afraid of the cruel society and peer pressure with SC-100 Certification. In conclusion, a career enables you to live a fuller and safer life. So if you want to take an upper hand and get a well-pleasing career our SC-100 learning question would be your best friend.
