

C-TS470-2412 Prüfungs - C-TS470-2412 Prüfung

Complete Guide to Preparing for the SAP C_TS470_2412 Exam

SAP C_TS470_2412 Exam Guide

www.ERPPrep.com
Prepare for the SAP C_TS470_2412 certification exam with this comprehensive guide. Gain in-depth knowledge of key topics, exam format, and best practices to enhance your understanding. Access expert strategies, sample questions, and study resources to boost your confidence and ensure success in the SAP S/4HANA Cloud Private Edition, Service certification exam.

2026 Die neuesten ExamFragen C-TS470-2412 PDF-Versionen Prüfungsfragen und C-TS470-2412 Fragen und Antworten sind kostenlos verfügbar: <https://drive.google.com/open?id=1p-aeiCua-81zGgmPr36wAXBHD-7TsKz>

Aufgrund der großen Übereinstimmung mit den echten Prüfungsfragen- und Antworten können wir Ihnen 100%-Pass-Garantie versprechen. Wir aktualisieren jeden Tag nach den Informationen von Prüfungsabsolventen oder Mitarbeitern von dem Testcenter unsere Prüfungsfragen und Antworten zu SAP C-TS470-2412 (SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service). Wir extrahieren jeden Tag die Informationen der tatsächlichen Prüfungen und integrieren in unsere Produkte.

Warum versprechen wir, dass wir Ihnen Geld zurückgeben, wenn Sie die SAP C-TS470-2412 Prüfung nicht bestehen? Denn zahllose Kunden, die unsere Prüfungssoftware benutzt haben, bestehen die SAP C-TS470-2412 Zertifizierungsprüfung, was uns die Konfidenz bringt. SAP C-TS470-2412 Prüfung ist eine sehr wichtige Beweis der IT-Fähigkeit für die Angestellte im IT-Gewerbe. Aber die Prüfung ist auch schwierig. Die Arbeiter von ExamFragen haben die SAP C-TS470-2412 Prüfungsunterlagen mit große Einsätze geforscht. Die Software ist das Geistesprodukt vieler IT-Spezialist.

C-TS470-2412 Unterlagen mit echte Prüfungsfragen der SAP Zertifizierung

Viel Zeit und Geld auszugeben ist nicht so gut als eine richtige Methode auszuwählen. Wenn Sie jetzt auf die SAP C-TS470-2412 Prüfung vorbereiten, dann ist die Software, die vom Team der ExamFragen hergestellt wird, ist Ihre beste Wahl. Unser Ziel ist sehr einfach, dass Sie die SAP C-TS470-2412 Prüfung bestehen. Wenn das Ziel nicht erreicht wird, bieten wir Ihnen volle Rückerstattung, um ein Teil Ihres Verlustes zu kompensieren. Bitte glauben Sie unsere Herzlichkeit! Wir wünschen Ihnen viel Glück beim Test der SAP C-TS470-2412!

SAP C-TS470-2412 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Organizational Data: This section of the exam measures the skills of Enterprise Data Managers and covers the structuring and management of organizational data within SAP systems. It focuses on defining key organizational elements, configuring data hierarchies, and ensuring proper integration across business units. Mastery of this domain is essential for maintaining accurate reporting structures, workflow efficiency, and compliance with enterprise-wide data governance policies.
Thema 2	Service Order Management: This section of the exam measures the skills of SAP Service Operations Consultants and covers the end-to-end management of service orders within SAP. It includes the creation, processing, tracking, and fulfillment of service requests, ensuring seamless coordination between departments. Proper service order management enables organizations to enhance customer satisfaction, streamline operations, and improve response times through integrated workflows.
Thema 3	Managing Clean Core: This section of the exam measures the skills of SAP Solution Architects and covers the principles of maintaining a clean core within SAP systems. It focuses on strategies for minimizing customizations, leveraging standard SAP functionalities, and ensuring system integrity while allowing for necessary extensions. The goal is to enhance system performance, ease upgrades, and maintain long-term sustainability.
Thema 4	Service Master Data: This section of the exam measures the skills of SAP Master Data Specialists and covers the management and configuration of service-related master data within SAP environments. It includes defining service objects, managing attributes, and ensuring accurate data flow across modules. Effective service master data management helps improve service delivery, optimize resource utilization, and maintain consistency across business processes.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service C-TS470-2412 Prüfungsfragen mit Lösungen (Q64-Q69):

64. Frage

To ship service parts to a customer in advance, which follow-up documents can be created automatically after the initial service order release? Note: There are 3 correct answers to this question.

- A. Purchase requisition
- B. Invoice
- C. Sales order
- D. Goods issue document
- E. Reservation

Antwort: C,D,E

Begründung:

In SAP S/4HANA Cloud Private Edition, Service, shipping service parts to a customer before service execution (e.g., for on-site repair) involves follow-up documents created automatically upon service order release. The correct answers are goods issue document (A), sales order (C), and reservation (E). Let's dive into each.

Scenario Context:

A service order might include spare parts to be sent to the customer in advance. Releasing the order triggers logistics and inventory processes.

* Goods issue document (A): This records the physical shipment of parts from the warehouse to the customer. Upon release, if the service order includes deliverable items (e.g., via item category with delivery relevance), the system posts a goods issue (e.g., via transaction MIGO or automatically). This updates inventory and triggers accounting postings.

* Sales order (C): For billable parts, a follow-up sales order can be created automatically to handle the commercial aspect (e.g., via a sales order type linked to the service order). This integrates with SD for pricing and delivery.

* Reservation (E): This reserves stock in the warehouse for the service order's parts requirements. Upon release, the system generates a reservation (e.g., movement type 261) to ensure availability before goods issue.

Why Not the Others?

* Invoice (B): Invoices are created later, typically after goods issue or service confirmation, not automatically upon release.

* Purchase requisition (D): This is for procuring parts from a vendor, not shipping to a customer.

Process Flow Example:

Service order released # Reservation created (stock reserved) # Sales order generated (if billable) # Goods issue posted (parts shipped).

"Upon service order release, follow-up documents such as goods issue documents, sales orders, and reservations can be created automatically to facilitate shipping service parts."

65. Frage

Which type of objects can you maintain in the object list assigned to a contract item? Note: There are 3 correct answers to this question.

- A. Document
- **B. Product**
- C. Equipment bill of material
- **D. Equipment**
- **E. Functional location**

Antwort: B,D,E

66. Frage

Which of the following are features of the clean core dashboard? Note: There are 2 correct answers to this question.

- **A. Customers can grant access to the dashboard to partners.**
- B. Customers can use the dashboard in the dev, test, and production tenants.
- C. It can be used in all SAP S/4HANA Cloud editions.
- **D. It can be accessed by using SAP For Me.**

Antwort: A,D

Begründung:

The Clean Core Dashboard is a tool provided by SAP to help customers monitor and maintain a clean core strategy in their SAP S/4HANA systems. A clean core approach ensures that the ERP system remains up-to-date, cloud-compliant, and free of unnecessary modifications, facilitating smooth upgrades and innovation adoption. This dashboard provides insights into system customizations, extensions, and compliance with clean core principles. Let's evaluate each option based on official SAP documentation and functionality as of March 2025:

* A. Customers can use the dashboard in the dev, test, and production tenants: The Clean Core Dashboard is primarily designed to monitor the clean core compliance of productive SAP S/4HANA systems, as its purpose is to provide actionable insights into the live environment where business processes are executed. While development (dev) and test tenants are critical for building and validating extensions, the dashboard's focus is on the production tenant to ensure operational stability and upgrade readiness. SAP documentation specifies that it targets productive systems (e.g., SAP S/4HANA Cloud Private Edition production tenants), and there's no explicit mention of it being available across all tenant types (dev, test, production) in a unified manner. Thus, this option is not a confirmed feature.

* B. It can be accessed by using SAP for Me: This is a key feature of the Clean Core Dashboard. SAP for Me is SAP's customer portal, providing a centralized interface for accessing various tools, services, and insights related to SAP solutions. The Clean Core Dashboard is integrated into SAP for Me, offering customers a user-friendly way to view tiles and reports on their system's clean core status (e.g., custom code usage, API compliance, and extension metrics). This accessibility aligns with SAP's strategy to consolidate customer-facing tools in a single portal, making it a verified feature.

* C. Customers can grant access to the dashboard to partners: This is another confirmed feature. SAP allows customers to share access to the Clean Core Dashboard with implementation partners or service providers via SAP for Me's authorization management. This capability supports collaboration, enabling partners to assist in analyzing and optimizing the system for clean core compliance (e.g., during RISE with SAP engagements). The dashboard's design facilitates transparency and joint efforts between customers and partners, making this a standard feature in the private cloud context.

* D. It can be used in all SAP S/4HANA Cloud editions: This is not entirely accurate. The Clean Core Dashboard is specifically tailored for SAP S/4HANA Cloud Private Edition and, to some extent, SAP S/4HANA on-premise systems, where customizations and extensions are more prevalent and need monitoring. In SAP S/4HANA Cloud Public Edition, the system is inherently clean by design (no source code modifications are allowed, only extensions via SAP BTP or in-app tools), reducing the need for such a dashboard. While clean core principles apply across all editions, the dashboard's functionality is most relevant to Private Edition and on-premise deployments, where customers have greater control over

customizations. SAP documentation highlights its use in Private Edition contexts (e.g., RISE with SAP), not universally across all editions.

The correct answers, B and C, reflect the dashboard's accessibility via SAP for Me and its collaborative feature with partners, as outlined in SAP's clean core strategy resources. These features enhance its utility in maintaining a modern, flexible, and cloud-compliant ERP system, particularly in SAP S/4HANA Cloud Private Edition.

Extract from SAP Documentation: "The Clean Core Dashboard, accessible via SAP for Me, provides transparency on system customizations and allows customers to collaborate with partners to ensure clean core compliance in productive SAP S/4HANA Cloud Private Edition systems." (SAP Community, 10 Steps to Clean Core for SAP S/4HANA Cloud Private Edition for Customers, 2024).

67. Frage

Which of the following objects are relevant to determine the correct plant and storage location in service order processing when reserving spare part items? Note: There are 3 correct answers to this question.

- A. Sales area
- **B. Service organization**
- C. Service team
- **D. Work center**
- **E. Service employee**

Antwort: B,D,E

Begründung:

In SAP S/4HANA Cloud Private Edition, Service, when reserving spare parts in service order processing (e.g., scope item 3D2: Service Order Management and Monitoring), the system determines the plant and storage location based on specific objects:

* Service organization: This defines the organizational unit responsible for the service, which is linked to a plant. The plant is a key attribute in logistics and inventory management, making it critical for spare part reservations.

* Work center: The work center specifies where the service is performed and is directly tied to a plant. It influences the storage location from which spare parts are drawn, especially in in-house or field service scenarios.

* Service employee: The employee assigned to the service order can influence the plant and storage location, particularly in field service scenarios where parts are reserved from a technician's stock (e.g., van stock linked to a specific storage location).

* Sales area: While relevant for sales processes, it does not directly determine plant or storage location for spare parts in service order processing.

* Service team: Teams are organizational groupings but do not have a direct system linkage to plant

/storage location determination for reservations. This logic is part of the integration between service management and logistics in SAP S/4HANA, ensuring accurate inventory allocation. "The plant and storage location for spare parts in a service order are derived from the service organization, work center, and assigned service employee." (SAP Help Portal, Service Order Processing).

68. Frage

Which of the following can be assigned to a serial number profile?

- A. Configuration profile
- B. Stock determination strategy
- **C. Equipment category**
- D. Equipment class

Antwort: C

Begründung:

A serial number profile in SAP S/4HANA defines how serial numbers are managed for materials or equipment. The correct answer is equipment category (C). Let's explore this deeply.

Serial Number Profile Purpose:

It controls serialization (e.g., mandatory entry, stock check) and links to objects like equipment or materials.

Why Equipment Category?

The equipment category (e.g., "M" for machines) determines the type of equipment created when a serialized material is installed or tracked. In customizing (SPRO # Plant Maintenance # Master Data # Technical Objects # Serial Number), the serial number profile is assigned to an equipment category to define how serial numbers generate equipment records (e.g., automatically upon goods receipt).
