Updated Salesforce Plat-Admn-301 Questions To Clear Plat-Admn-301 Exam

P.S. Free & New Plat-Admn-301 dumps are available on Google Drive shared by TorrentValid: https://drive.google.com/open?id=1-Z1yNg0dr8q1aubYXBj-vO2JyAHrpPwE

If you want to own a better and bright development in the IT your IT career, it is the only way for you to pass Plat-Admn-301 exam. Don't complain how difficult the Plat-Admn-301 exam is. Because our TorrentValid experienced technicians have provided efficient way for you to easily get Plat-Admn-301 Exam Certification. We constantly update test simulation software in order to help you who are preparing for Plat-Admn-301 exam by efforts to get the satisfactory results.

Salesforce Plat-Admn-301 Exam Syllabus Topics:

Topic	Details
Topic 1	• Data and Analytics Management: This section of the exam measures skills of Salesforce Data Analyst and covers data quality assessment, data enrichment, and duplicate management. It explains how to choose appropriate reporting and analytics tools for advanced requirements, including custom report types, snapshots, formulas, joined reports, and dashboard configurations. It also covers methods for connecting external data sources using big objects, external objects, data warehouses, data lakes, and Salesforce Connect. Finally, it describes the suitable tools and methods for importing data, including Data Loader, Data Import Wizard, and external IDs.
Topic 2	• Cloud Applications: This section of the exam measures skills of Salesforce Consultant and covers the standard Salesforce capabilities that support sales and service operations. It includes features such as products, price books, schedules, orders, quotes, and the tools that help with forecasting and territory management. The section also describes how to create Salesforce Knowledge articles, manage entitlements, support service workflows, and enable interactions through chat, case feed, Omni-Channel, console apps, and Experience Cloud sites. It also introduces the broader Salesforce suite that extends core platform functionality.

Topic 3	• Environment Management and Deployment: This section of the exam measures skills of Salesforce Administrator and covers moving metadata between environments using tools such as sandboxes, change sets, and managed or unmanaged AppExchange packages. It explains the capabilities and best practices related to deploying changes through change sets to ensure smooth and controlled migrations.

Top Features of TorrentValid Salesforce Plat-Admn-301 PDF Questions File and Practice Test Software

We promise that using Plat-Admn-301 certification training materials of TorrentValid, you will pass Plat-Admn-301 exam in your first try. If not or any problems in Plat-Admn-301 certification training materials, we will refund fully. What's more, after you purchase our Plat-Admn-301 Certification Training materials, TorrentValid will offer update service in one year.

Salesforce Certified Platform Administrator II Sample Questions (Q20-Q25):

NEW QUESTION # 20
Users report that the industry picklist field is no longer visible on account records. What test can an administrator use to troubleshoot the issue?

- A. Debug log
- B. Setup audit trail
- C. Field audit history
- D. Field history tracking

Answer: B

Explanation:
The setup audit trail tracks the recent setup changes that you and other administrators have made to your org.
It can help you troubleshoot issues by showing you what changes were made, who made them, and when. In this case, the setup audit trail can help the administrator identify if someone changed the field-level security, page layout, or profile settings for the industry picklist field. References: https://help.salesforce.com/s/articleView?id=sf.monitorsetup.htm&type=5

NEW QUESTION # 21
A user is getting an error when attempting to merge two accounts. The administrator checks the profile to see the user has Read/Write permission on Accounts and is the owner of both records.
What is preventing the user from completing the merge?

- A. The Account matching rules are not set.
- B. The user is assigned to the wrong territory.
- C. The Delete permission is missing on the user for Accounts.
- D. Only administrators have permission to merge records.

Answer: C

Explanation:
The Delete permission is missing on the user for Accounts is what is preventing the user from completing the merge. Merging accounts is a way to combine up to three duplicate accounts into one master record and update the related records accordingly. Merging accounts requires the Delete permission on accounts because merging accounts involves deleting the duplicate records and keeping only the master record.

NEW QUESTION # 22
The administrator at AW Computing has been asked to review whether any users are making configuration changes directly in production.

Which item should the administrator review to find these details?

- A. Field History Tracking
- B. Login History
- C. Setup Audit Trail
- D. Organization-Wide Defaults

Answer: C

Explanation:
The Setup Audit Trail is a tool that allows you to view and download a log of changes made in your org's Setup area. The log shows up to 20 fields of information for each change, such as who made it, when it was made, what type of change it was, and what values were changed. You can use the Setup Audit Trail to track configuration changes directly in production and identify any unauthorized or problematic changes.

NEW QUESTION # 23
Which three fields should be used as filter criteria? Choose 3 answers

- A. A formula field that calculates a price for the listing.
- B. A multi-select picklist field that designates features of the listing.
- C. A number field that designates the square footage of the listing.
- D. A phone field that provides the full phone number of the seller.
- E. A picklist field that designates the county of the listing.

Answer: C,D,E

Explanation:
A phone field that provides the full phone number of the seller, a number field that designates the square footage of the listing, and a picklist field that designates the county of the listing should be used as filter criteria because they are fields that can be used to narrow down the report results based on specific values or ranges. A multi-select picklist field that designates features of the listing and a formula field that calculates a price for the listing should not be used as filter criteria because they are fields that cannot be filtered on in reports. References: https://help.salesforce.com/s/articleView?id=sf.reports_filtering.htm&type=5 https://help.salesforce.com/s/articleView?id=sf.reports_fields_unavailable.htm&type=5

NEW QUESTION # 24
An administrator is planning he release process for the year. The team will be using change sets to process deployment to production.
Which three best practices should be considered?

- A. Be sure to test only after business hours the data after deployment.
- B. Use matching names for global publisher layouts and Outlook publisher layouts.
- C. Make sure change sets are limited to 10,000 files.
- D. Plan your deployments around the production and sandbox maintenance schedules.
- E. Make sure to deploy all dependent components.

Answer: C,D,E

Explanation:
Planning deployments around maintenance schedules ensures that there are no interruptions or delays in the deployment process. Deploying all dependent components ensures that there are no missing metadata or references that could cause errors or failures in the deployment. Limiting change sets to 10,000 files ensures that the deployment does not exceed the maximum size limit for change sets

NEW QUESTION # 25
......

The Salesforce wants to become the first choice for quick and complete Salesforce Plat-Admn-301 exam preparation. To achieve

this objective the Salesforce has hired a team of experienced and qualified Plat-Admn-301 Exam trainers. They have years of experience in verifying Salesforce Certified Platform Administrator II exam practice test questions.
