pdf real questions and answers will enable you to understand PassSureExam Axis ANVE. What's more, we provide you with study guide and exam simulations, which will help you to get more about Axis ANVE.

Axis Network Video Exam Sample Questions (Q215-Q220):

NEW QUESTION # 215

A network with a large bandwidth

- A. Can support unlimited devices on the network.
- B. Would experience congestion on the network.
- C. **Can support devices with higher bitrate.**
- D. Needs the camera's bitrate to be lowered.

Answer: C

Explanation:

"A network with large bandwidth is capable of supporting devices with higher bitrates, allowing for higher resolution, frame rates, or more cameras on the network without causing congestion."

- Axis Communications Academy, Network Video Fundamentals, 2022

"The greater the available bandwidth, the more data (higher bitrate) can be transmitted without causing network issues."

- Axis Web Article: Understanding Bandwidth

NEW QUESTION # 216

What is causing the issue in the image to the right?

- A. Wrong WDR settings
- B. Too short exposure time
- C. Too long exposure time
- D. **Stuck IR-cut filter**

Answer: D

Explanation:

"If the IR-cut filter is stuck or not functioning properly, it can cause a color cast or unnatural tint in the image during daylight, similar to what is shown in the right image."

- Axis Communications Academy, Network Video Fundamentals, 2022

"A stuck IR-cut filter often causes an unnatural magenta or pinkish hue in daylight scenes."

- Axis Technical Note: IR-cut Filter Issues

References:

Axis Communications Academy, Network Video Fundamentals, 2022 (p. 25)

Axis Technical Note: IR-cut Filter

NEW QUESTION # 217

Which of the following does AXIS Camera Application Platform (ACAP) enable?

- A. Capability to design custom camera accessories for 3D printing
- **B. Capability to develop edge applications for Axis devices**
- C. Capability to select Axis devices based on application requirements
- D. Capability to recommend third-party VMS applications

Answer: B

Explanation:

"The AXIS Camera Application Platform (ACAP) enables the development and deployment of edge applications directly on Axis devices, allowing for advanced analytics and custom functionality."

- Axis Camera Application Platform Overview

"ACAP is an open platform that allows partners and users to develop and run applications on Axis network devices."

- Axis Communications Academy, Network Video Fundamentals, 2022

References:

Axis Camera Application Platform (ACAP)

Axis Communications Academy, Network Video Fundamentals, 2022 (p. 97)

NEW QUESTION # 218

What system functions can an Axis recording appliance fulfill?

- **A. Server, client, and PoE source**
- B. Server only
- C. Server and PoE source
- D. Server and client

Answer: A

Explanation:

"Axis recording appliances can function as servers (handling video data and management), clients (providing user interfaces for playback and live viewing), and PoE sources (powering connected network cameras and devices)."

- Axis S Series Recording Solutions Overview

"Many Axis recording appliances integrate server, client, and PoE switch functions in one device."

- Axis Communications Academy, Network Video Fundamentals, 2022

References:

Axis Recording Solutions Overview

Axis Communications Academy, Network Video Fundamentals, 2022 (p. 108-109)

NEW QUESTION # 219

A Privacy mask added to Live View (Choose two)

- A. Can be removed from recorded video.
- B. Lowers the bandwidth usage.
- **C. Can be made into any shape.**
- **D. Hides parts of the scene.**
- E. Restricts access to the camera.

Answer: C,D

Explanation:

A privacy mask in Live View is used to hide parts of the scene from being viewed or recorded, ensuring privacy in specific areas of the surveillance footage. These masks can be configured in various shapes to cover the required sections effectively. Privacy masks are particularly useful in environments where certain areas need to be excluded from monitoring to comply with privacy laws and regulations.
