What is more, you can get the most authoritative Media-Cloud-Consultant certification, which will make you stand out a crowd of nomal people.

Salesforce Media Cloud Consultant Exam Sample Questions (Q86-Q91):

NEW QUESTION # 86
In advertising sales management, what is the correct order to execution of the pre-built industries order management orchestration plan components?

- A. create line items, create order, add creative, approve order, activate order
- B. create order, create line items, approve order, activate order, add creative
- C. create line items, create order, approve order, activate order, add creative
- D. create order, create line items, add creative, approve order, activate order

Answer: B

Explanation:
In Advertising Sales Management, the correct order of execution for the pre-built Industries Order Management orchestration plan components is: Create Order, Create Line Items, Add Creative, Approve Order, Activate Order (B). This sequence ensures that

the foundational elements of an order are established first (the order itself and its line items),followed by the association of creative materials, and finally, the approval and activation of the order for execution.References:

NEW QUESTION # 87

During proposal line item creation, a consultant needs to able to select a value for a picklist type attribute.
Which non-overridable behaviour must the consultant select during the assignment to the parent object type?

- A. is Not Translable
- B. Run-time Configurable
- C. is Encrypted
- D. is not Assetizable

Answer: B

Explanation:
When creating a proposal line item that includes a picklist type attribute, the consultant must ensure the attribute is "Run-time Configurable" (B) during its assignment to the parent object type. This non-overridable behavior allows the attribute's value to be selected dynamically at the time of proposal line item creation, providing the necessary flexibility to adapt to varying proposal requirements.References:

NEW QUESTION # 88

A publisher wants to share the omniscript with a subset of partners through the experience cloud. An administrator has created a page variation and added the omniscript to the page, but the subgroup of partner users are reporting they not seeing any changes in the experience site page. Which three actions should the administrator take to help troubleshoot this issue?

- A. validate flexcards are being activated with the community page and community default as targets
- B. validate that the audience for the page variation is correctly defined as assigned
- C. validate that the page variation is published
- D. validate that the latest version of the omniscript is enabled
- E. validate that the user has the mediacloudCCRuntime permission set license assigned

Answer: B,C,D

Explanation:
When partners report not seeing changes in the Experience Cloud site, the administrator should consider several factors to troubleshoot the issue. Firstly, ensure that the page variation containing the OmniScript is published (B). An unpublished page variation will not be visible to users. Secondly, check if the latest version of the OmniScript is enabled(C), as older versions may not reflect recent changes or functionalities. Lastly, verify that the audience for the page variation is correctly defined and assigned (E). The audience settings determine which subset of users can view the page variation. Incorrect audience assignment can lead to visibility issues for intended users.References:

NEW QUESTION # 89

A publishing company has been using Media Cloud for the last six months and now wants to send order data over to the Google Ad Management platform. The company has the client and secret from Google.
Which element should a Consultant create within Salesforce to be able to enter these details?

- A. Auth. Provider
- B. Custom Metadata
- C. Connected App
- D. Named Credentials

Answer: D

Explanation:
Named Credentials in Salesforce are used to securely store external service endpoints and authentication details such as client ID and client secret. When integrating with Google Ad Manager, the client and secret are used for OAuth authentication. Named Credentials simplify authentication handling for callouts by managing tokens automatically and securely. Connected Apps are typically for OAuth client registration but not storing credentials in this use case.

NEW QUESTION # 90
Which two solutions should a consultant recommend to a client who wants to integrate with an ad server other than google ad manager (GAM) to create an ad campaign?

- A. use the out of the box ad server integration
- B. create a custom integration procedure to integrate with the ad server
- C. create a custom solution using apex code
- D. use the out of the box marketing cloud intelligence connector

Answer: B,C

Explanation:
For integrating with an ad server other than Google Ad Manager (GAM) to create an ad campaign, the consultant should recommend:
Creating a custom integration procedure to integrate with the ad server: This involves developing a tailored integration solution that communicates directly with the ad server's APIs, ensuring seamless data exchange and functionality specific to the client's needs.
Creating a custom solution using Apex code: Leveraging Salesforce's powerful programming language, Apex, to build custom logic and integrations that cater specifically to the functionality and workflows required for the ad server integration.
These approaches provide the flexibility and specificity needed to integrate with various ad servers, offering tailored solutions that meet the client's unique requirements.
