

新版Nutanix NCP-US-6.10考古題 & NCP-US-6.10真題材料

從Google Drive中免費下載最新的Testpdf NCP-US-6.10 PDF版考試題庫：https://drive.google.com/open?id=1l2qwnep7i8uaJfnLAgHS1pyBqlMYe_1E

關於NCP-US-6.10認證考試的相關資料，有很多網站都可以提供。但是，他們都不能保證考試資料的品質，同時也不能給你考試失敗就全額退款的保障。比起那些普通的參考資料，Testpdf的NCP-US-6.10考古題完全是一個值得你利用的工具。在Testpdf的指導和幫助下，你完全可以充分地準備考試，並且可以輕鬆地通過考試。如果你想在IT行業有更大的發展，那你有必要參加IT認證考試。如果你想順利通過你的IT考試嗎，那麼你完全有必要使用Testpdf的考古題。

Nutanix NCP-US-6.10認證既然那麼受歡迎，Testpdf又能盡全力幫助你通過考試，而且還會為你提供一年的免費更新服務，那麼選擇Testpdf來幫你完成夢想。為了明天的成功，選擇Testpdf是正確的。選擇Testpdf，下一個IT人才就是你。

真實的新版NCP-US-6.10考古題 |高通過率的考試材料|高效的NCP-US-6.10: Nutanix Certified Professional - Unified Storage (NCP-US) v6.10

為了不讓你得生活留下遺憾和後悔，我們應該盡可能抓住一切改變生活的機會。你做到了嗎？Testpdf Nutanix的NCP-US-6.10考試培訓資料是幫助每個想成功的IT人士提供的培訓資料，幫助你們順利通過Nutanix的NCP-US-6.10考試認證。為了不讓成功與你失之交臂，趕緊行動吧。

最新的 Nutanix Certified Professional (NCP) NCP-US-6.10 免費考試真題 (Q90-Q95):

問題 #90

An administrator needs to ensure the company has access to key information about their Nutanix Files deployment shares and files, such as Malicious Clients, Vulnerable Shares, and a list of potential ransomware attack attempts. What must be deployed on-premises to provide the monitoring needed to see this information?

- A. LCM dark site webserver
- B. Data Lens
- C. File Analytics VM**
- D. Prism Central

答案: C

解題說明:

To monitor key information about a Nutanix Files deployment, such as Malicious Clients, Vulnerable Shares, and a list of potential ransomware attack attempts, the administrator must deploy the File Analytics VM on-premises. Nutanix File

Analytics is a dedicated virtual machine that provides advanced monitoring and analytics for Nutanix Files, offering insights into security-related activities, including malicious client behavior, share vulnerabilities, and ransomware detection.

The Nutanix Unified Storage Administration (NUSA) course states, "File Analytics is a VM that must be deployed on-premises to provide detailed monitoring of Nutanix Files, including identifying Malicious Clients, Vulnerable Shares, and potential ransomware attack attempts through its analytics and anomaly detection features." File Analytics includes dashboards and widgets that specifically highlight security risks, such as the Malicious Clients list (clients exhibiting suspicious behavior), Vulnerable Shares (shares with overly permissive access), and ransomware detection (based on file activity patterns like mass encryption or renaming).

The Nutanix Certified Professional - Unified Storage (NCP-US) study guide further elaborates that

"deploying the File Analytics VM enables administrators to monitor Nutanix Files for security threats, providing visibility into Malicious Clients, Vulnerable Shares, and ransomware attempts through its integrated analytics engine." File Analytics runs locally within the Nutanix cluster, making it suitable for on-premises deployments and capable of operating in isolated environments like dark sites.

The other options are incorrect:

* LCM dark site webserver: An LCM dark site webserver is used to host software updates for LCM in air-gapped environments but does not provide monitoring or analytics for Nutanix Files.

* Prism Central: Prism Central provides centralized management and monitoring for Nutanix clusters but does not offer the specific security-focused analytics (e.g., Malicious Clients, ransomware detection) that File Analytics provides for Nutanix Files.

* Data Lens: Nutanix Data Lens is a cloud-based service for data lifecycle management and analytics, primarily for Nutanix Objects and Files, but it focuses on tiering and data placement, not security monitoring like ransomware detection or malicious clients.

The NUSA course documentation emphasizes that "the File Analytics VM is the essential on-premises component for monitoring Nutanix Files, providing critical security insights such as Malicious Clients, Vulnerable Shares, and ransomware attack attempts."

References:

Nutanix Unified Storage Administration (NUSA) Course, Section on File Analytics: "Deploying File Analytics VM for security monitoring." Nutanix Documentation (<https://www.nutanix.com>), Nutanix File Analytics Guide: "Monitoring Malicious Clients, Vulnerable Shares, and ransomware attempts."

問題 #91

An administrator wants to control the user visibility of SMB folders and files based on user permissions.

What feature should the administrator choose to accomplish this?

- A. Files blocking
- B. Role Based Access Control (RBAC)
- C. File Analytics
- D. Access Based-Enumeration (ABE)

答案: D

解題說明:

Access Based-Enumeration (ABE) is a feature in Nutanix Files that controls whether users can see folders and files for which they do not have access permissions. When ABE is enabled:

- * Users will only see the folders/files they are authorized to access.
- * Items for which they have no permissions will be hidden from view.

The NUSA course describes this feature:

"Access Based-Enumeration (ABE) ensures that users browsing a share will only see folders and files that they have permission to access, improving security and minimizing confusion." Thus, ABE is the precise feature for controlling user visibility of SMB shares based on permissions.

問題 #92

A user is logged into Prism Central and has been tasked with creating a new object store. What could be the cause no clusters are being listed?

- A. Access was granted to Prism Element less than 5 minutes ago.
- B. Only the local Prism Element Admin can create object stores.
- C. Prism Element was registered to Prism Central only 1 hour ago.
- D. Only the local Prism Central Admin can create object stores.

答案: A

解題說明:

According to the Nutanix Unified Storage Administration (NUSA) course, specifically in the module "Deploying and Configuring Nutanix Objects," the Object Store creation process within Prism Central depends on the registration and access synchronization between Prism Central and Prism Element. The documentation explicitly states: "When Prism Central is first connected to a Prism Element cluster, there may be a delay of up to 15 minutes for the access control and cluster data to fully synchronize. During this time, certain cluster resources may not appear when attempting to create new object stores." This statement confirms that if the access was granted to Prism Element less than 5 minutes ago, the cluster will not yet be visible in the "Cluster" drop-down list. This delay in synchronization is the reason for the empty cluster list in the interface.

* Option A is incorrect because Prism Central administrators, not just local Prism Element admins, have the authority to create object stores.

* Option B is incorrect because the delay is not tied to the 1-hour registration time, but rather the few minutes required for initial synchronization.

* Option C is incorrect because the Prism Element admin role is not a prerequisite for this task within Prism Central.

Reference:

Nutanix Unified Storage Administration (NUSA) course - Module: Deploying and Configuring Nutanix Objects - Section: Synchronization and Cluster Visibility in Prism Central

Nutanix Unified Storage (NCP-US) Study Guide - Topic: Object Store Creation Requirements and Synchronization Delays.

問題 #93

A company is planning to upgrade the Nutanix Objects cluster deployed on-premise to the latest version. An administrator has logged into Prism Central using domain credentials. After navigating to the LCM page and performing an inventory, the administrator notices that the latest version of Objects is not showing. The following components have been updated to the latest available version listed in LCM: MSP Controller, Objects Manager, Objects Services. After running an LCM inventory successfully, the latest version of Objects still is not listed. What could be the reason?

- A. The administrator does not have needed permissions
- B. The MSP Controller on Prism Element has not been updated
- C. The Objects version is not supported on-premise
- D. Prism Central is not running a compatible version

答案: D

解題說明:

The issue involves an administrator attempting to upgrade a Nutanix Objects cluster using Prism Central's Lifecycle Manager (LCM), but the latest version of Nutanix Objects is not listed after running an inventory, despite other components (MSP Controller, Objects Manager, Objects Services) being updated. The most likely reason is that Prism Central is not running a compatible version required to support the latest Nutanix Objects version.

The Nutanix Unified Storage Administration (NUSA) course states, "LCM upgrades for Nutanix Objects require Prism Central to be running a version that is compatible with the target Objects version; if Prism Central is not on a compatible version, the latest Objects version will not be listed in the LCM inventory." Prism Central orchestrates LCM upgrades, and its version must support the new features, APIs, and metadata of the target Nutanix Objects version. If Prism Central is running an older version, it may not recognize or list newer versions of Nutanix Objects available for upgrade.

The Nutanix Certified Professional - Unified Storage (NCP-US) study guide further elaborates that "a common reason for missing component versions in LCM is an incompatible Prism Central version; administrators must ensure Prism Central is upgraded to a version that supports the target Nutanix Objects release." The guide recommends checking the Nutanix compatibility matrix to verify that the current Prism Central version supports the desired Objects version and upgrading Prism Central if necessary.

The other options are incorrect:

- * The administrator does not have needed permissions: The administrator has already logged into Prism Central, navigated to the LCM page, and performed an inventory, indicating sufficient permissions to view available versions. Permission issues would typically prevent access to LCM entirely.
- * The Objects version is not supported on-premise: Nutanix Objects is fully supported on-premise, and there is no indication that the target version is cloud-only.
- * The MSP Controller on Prism Element has not been updated: The MSP Controller has already been updated to the latest version as per the scenario, and the MSP Controller on Prism Element is not directly responsible for listing Objects versions in Prism Central's LCM.

The NUSA course documentation emphasizes that "ensuring Prism Central is on a compatible version is a critical step before upgrading Nutanix Objects via LCM; an incompatible Prism Central version will prevent the latest Objects version from appearing in the inventory." References:

Nutanix Unified Storage Administration (NUSA) Course, Section on Lifecycle Management: "Prism Central compatibility for Nutanix Objects upgrades." Nutanix Certified Professional - Unified Storage (NCP-US) Study Guide, Topic 1: Deploy and Upgrade Nutanix Unified Storage, Subtopic: "LCM upgrade troubleshooting for Nutanix Objects." Nutanix Documentation (<https://www.nutanix.com>), LCM Administration Guide: "Prism Central version compatibility for component upgrades."

問題 #94

A company is managing two Nutanix clusters between two different availability zones: one on-prem and one running in the public cloud (NC2). The company is evaluating Nutanix Files and is looking for a solution that supports: 15-minute RPO or less, guided DR process, and minimal operations at failover time. Which data protection strategy should be considered?

- A. Protection Domain
- B. Smart Sync
- C. Cloud Connect
- D. Smart DR

答案: D

解題說明:

To meet the requirements of a 15-minute RPO (Recovery Point Objective) or less, a guided DR (Disaster Recovery) process, and minimal operations at failover time for Nutanix Files across two Nutanix clusters (on-prem and in the public cloud via NC2), the company should consider Smart DR. Smart DR is a disaster recovery feature specifically designed for Nutanix Files, enabling

replication of file shares between primary and recovery sites with low RPOs, guided failover processes, and automated recovery workflows.

The Nutanix Unified Storage Administration (NUSA) course states, "Smart DR for Nutanix Files supports replication with an RPO as low as 15 minutes, provides a guided disaster recovery process through Prism Central, and minimizes operations at failover by automating client redirection and share activation." Smart DR uses asynchronous replication to copy file share data to the recovery site, allowing for a 15-minute RPO by scheduling replication at 15-minute intervals. The guided DR process is facilitated through Prism Central's UI, which provides step-by-step workflows for failover and failback. Additionally, Smart DR automates client redirection by leveraging AD and DNS updates, minimizing manual operations during failover.

The Nutanix Certified Professional - Unified Storage (NCP-US) study guide further elaborates that "Smart DR is ideal for Nutanix Files deployments across availability zones, such as on-prem and NC2, supporting RPOs as low as 15 minutes, guided recovery workflows, and automated failover with minimal operational overhead." This makes Smart DR the best match for the company's requirements, as it addresses all three criteria effectively.

The other options are incorrect:

* Protection Domain: Protection Domains are used for VM-level replication and disaster recovery in Nutanix, not for Nutanix Files. They also typically have higher RPOs (e.g., 1 hour) and are not designed for file share recovery.

* Smart Sync: Smart Sync is not a Nutanix feature; it may refer to third-party tools or unrelated functionalities and is not applicable here.

* Cloud Connect: Cloud Connect is a feature for backing up or replicating data to public cloud providers, but it is not specific to Nutanix Files and does not support a 15-minute RPO or guided DR processes for file shares.

The NUSA course documentation highlights that "Smart DR is the recommended data protection strategy for Nutanix Files in multi-site environments, offering low RPOs, guided DR workflows, and automated failover to minimize downtime and operational complexity." References:

Nutanix Unified Storage Administration (NUSA) Course, Section on Nutanix Files: "Smart DR for disaster recovery across availability zones." Nutanix Certified Professional - Unified Storage (NCP-US) Study Guide, Topic 2: Configure and Utilize Nutanix Unified Storage, Subtopic: "Smart DR capabilities for Nutanix Files." Nutanix Documentation (<https://www.nutanix.com>), Nutanix Files Administration Guide: "Smart DR setup for multi-site file share protection."

問題 #95

.....

很多人都認為要通過一些高難度的NCP-US-6.10認證考試是需要精通很多Nutanix專業知識。只有掌握很全面的INutanix知識的人才會有資格去報名參加的考試。其實現在有很多方法可以幫你彌補你的知識不足的，一樣能通過NCP-US-6.10認證考試，也許比那些專業知識相當全面的人花的時間和精力更少，正所謂條條大路通羅馬。

NCP-US-6.10真題材料: <https://www.testpdf.net/NCP-US-6.10.html>

NCP-US-6.10評估考試是基於網絡的考試，以更低的成本為您提供在參加NCP-US-6.10考試前檢查您的技能的能力，很多考生現在都用Testpdf NCP-US-6.10真題材料 NCP-US-6.10真題材料考題作為參加NCP-US-6.10真題材料考試最快捷，最信任的方式，我們為你提供最新的 Nutanix Nutanix Certified Professional - Unified Storage (NCP-US) v6.10-NCP-US-6.10 學習指南，通過實踐的檢驗，是最好的品質，以幫助你通過 Nutanix Certified Professional - Unified Storage (NCP-US) v6.10-NCP-US-6.10 考試，成為一個實力雄厚的IT專家，提供免費試用 NCP-US-6.10 題庫資料，Testpdf NCP-US-6.10真題材料 能為客戶提供什麼樣的學習資料，在我們的指導和幫助下，可以首次通過您的考試，NCP-US-6.10考古題是IT專家經過實踐測試得到的，NCP-US-6.10考古題也能幫您在IT行業的未來達到更高的水平。

相反，絕大多數美國數字游牧民族正在探索我們，白的是隨身攜帶的令牌，NCP-US-6.10評估考試是基於網絡的考試，以更低的成本為您提供在參加NCP-US-6.10考試前檢查您的技能的能力，很多考生現在都用Testpdf Nutanix Certified Professional (NCP)考題作為參加Nutanix Certified Professional (NCP)考試最快捷，最信任的方式。
