Oracle 1z0-1077-25 Test Dumps.zip | Reliable 1z0-1077-25 Real Exam

Starting from our 1z0-1077-25 practice materials will make a solid foundation for your exam definitively. Do not satisfied with using shortcuts during your process, regular practice with our 1z0-1077-25 exam prep will be easy. Tens of thousands of people has achieved success with our 1z0-1077-25study questions, you can absolutely do it. And you will find that passing the 1z0-1077-25 exam is as easy as pie.

Oracle Order Management Cloud Order to Cash 2025Implementation Professional Sample Questions (Q150-Q155):

NEW QUESTION # 150
Your client's implementation of Order Management Cloud requires multiple external systems to be integrated, including order capture systems and fulfillment systems. You can achieve much of this by utilizing web services.
Which attribute is NOT required when registering a web service on the Manage Web Service Details page?

- A. Connector description
- B. Connector URL
- C. Username and password
- D. Order Information Service
- E. Connector name

Answer: D

Explanation:
Order Information Service is not an attribute that is required when registering a web service on the Manage Web Service Details page.Order Information Service is a predefined web service that provides order information to external systems, such as order status, order details, and order changes1.To register a web service on the Manage Web Service Details page, you must provide the following attributes2:
* Connector name: A unique name that identifies the web service.

* Connector description: A brief description of the web service and its purpose.
* Connector URL: The endpoint URL of the web service that Order Management will invoke.
* Username and password: The credentials that Order Management will use to authenticate with the web service.
:
Order Information Service

NEW QUESTION # 151

Which Oracle Transactional Business Intelligence subject area should you use to build an online custom port that shows the number of orchestration orders for a selected orchestration process status?

- A. Distributed Order Orchestration - Fulfillment Lines Real Time
- B. Distributed Order Orchestration - Process Instances Real Time
- C. Distributed Order Orchestration - Process Instances
- D. Distributed Order Orchestration - Order Lines Real Time

Answer: B

NEW QUESTION # 152

Your procurement organization has a requirement to include order information from a sales order with their purchase order documents. Service mappings can be used to help meet their specific integration requirements for their supply chain tools.
If you need to integrate objects from a sales order with a purchase order, which three supply chain modules would be required?

- A. Procurement Cloud
- B. Supply Chain Orchestration Cloud
- C. Business Process Management Cloud
- D. Order Management Cloud
- E. Supply Planning Cloud

Answer: A,B,D

Explanation:
Service mappings are used to integrate Order Management with other Oracle applications by mapping attributes from a sales order to a purchase order. Service mappings enable you to pass order information from a sales order to a purchase order document, such as supplier, item, quantity, price, and so on. To use service mappings, you need three supply chain modules: Supply Chain Orchestration Cloud, Procurement Cloud, and Order Management Cloud. Supply Chain Orchestration Cloud is the module that creates and manages the purchase order document based on the sales order information. Procurement Cloud is the module that provides the functionality to manage suppliers, purchase agreements, and requisitions. Order Management Cloud is the module that captures and fulfills the sales order.

NEW QUESTION # 153

You are creating a sales order and would like to see the sales order as a document. From the actions drop down menu what should you select?

- A. Manage Attachments.
- B. Edit Additional Information.
- C. Create Document.
- D. Create PDF (Portable Document Format).
- E. Order documents are not supported.

Answer: C

NEW QUESTION # 154

You are implementing the entire suite of Supply Chain Management Cloud for an auto component manufacturing and distribution company. This company has a manufacturing facility where different auto electrical components are produced to fulfill the demand that originates from various customers. One of the components that the company sells to its customers requires specialized operations; therefore, the company outsources it to an external manufacturer instead of producing it in its own facility.

Which two steps are required to fulfill the demand for this component through outsourced manufacturing?

(Choose two.)

- A. Create a sourcing rule of the Buy type for this component in the selling inventory organization.
- B. Model the manufacturer to which the component production is outsourced as a Supplier in the enterprise.
- C. Create a sourcing rule of the Make type for this component in the selling inventory organization.
- D. Select the Customer Sales Order Fulfillment check box under the Procurement offering.
- E. Define this component as an Item with the "Contract Manufacturing" field enabled and the "Make or Buy" attribute set to "Buy."
- F. Define this component as an Item with the "Contract Manufacturing" field enabled and the "Make or Buy" attribute set to "Make."

Answer: B,F
