Amazon AWS Certified Cloud Practitioner Sample Questions (Q217-Q222):

NEW QUESTION # 217

Which task is AWS responsible for in the shared responsibility model for security and compliance?

- A. Updating Amazon EC2 host firmware
- B. Granting access to individuals and services
- C. Encrypting data in transit
- D. Updating operating systems

Answer: A

Explanation:

AWS Compliance enables customers to establish and operate in an AWS security control environment

- * The shared responsibility model is part of AWS Compliance program
- * The Security of the cloud is managed by Amazon AWS provider
- * The Security in the cloud is responsibility of the customer
- * The customer is responsible for their information and data, their secure transmission, integrity, and encryption
- * Also, the customer is responsible for managing, support, patching and control of the guest operating system and AWS services provided like EC2
- * AWS customers retain control and ownership of their data
- * The AWS network provides significant protection against traditional network security issues and the customer can implement further protection Reference: <https://www.whizlabs.com/blog/aws-security-shared-responsibility/>

NEW QUESTION # 218

Under the AWS shared responsibility model, which of the following activities are the customer's responsibility? (Choose two.)
