Unparalleled Exam 1z0-1080-25 Study Solutions & Leader in Qualification Exams & Perfect 1z0-1080-25: Oracle Planning 2025 Implementation Professional

What's more, part of that TestKingIT 1z0-1080-25 dumps now are free: https://drive.google.com/open?id=1fNn1UKmLN-wyLiURxiq4X8FJ3YCMdULK

TestKingIT beckons exam candidates around the world with our attractive characters. Our experts made significant contribution to their excellence. So we can say bluntly that our 1z0-1080-25 simulating exam is the best. Our effort in building the content of our 1z0-1080-25 study materials lead to the development of learning guide and strengthen their perfection. To add up your interests and simplify some difficult points, our experts try their best to design our 1z0-1080-25 Study Material and help you understand the 1z0-1080-25 learning guide better.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.
Topic 2	• Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.

Topic 3	• Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Topic 4	• Design business rules and rulesets":his section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Topic 5	• Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of an EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flows for a better user experience.
Topic 6	• Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Topic 7	• Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 8	• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 9	• Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.
Topic 10	• Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 11	• Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 12	• Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.
Topic 13	• Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 14	• Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.
Topic 15	• Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 16	• Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.
Topic 17	• Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.
Topic 18	• Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Topic 19	• Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.
Topic 20	• Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.

Topic 21	• Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.

Instant 1z0-1080-25 Access & Test 1z0-1080-25 Voucher

Love is precious and the price of freedom is higher. Do you think that learning day and night has deprived you of your freedom? Then let Our 1z0-1080-25 Guide tests free you from the depths of pain. Our study material is a high-quality product launched by the TestKingIT platform. And the purpose of our study material is to allow students to pass the professional qualification exams that they hope to see with the least amount of time and effort.

Oracle Planning 2025 Implementation Professional Sample Questions (Q36-Q41):

NEW QUESTION # 36
Which two are true regarding rent-free periods with IFRS 16 enabled?

- A. Lease payments are set to the index rate.
- B. Lease payments are set to zero.
- C. Calculations are based on periods and payment frequency.
- D. Calculations are based on a date range.

Answer: B,C

NEW QUESTION # 37
Your administrator creates a Pipeline definition to manage metadata, and data for your Planning application.
Which statement about pipelines is true?

- A. Use pipelines to coordinate the running of a series of jobs as a single process.
- B. Quickly drill into data slices that are important to you with pipelines.
- C. Develop pipelines to guide you through the Planning process.
- D. Use pipelines as a visible, automated, and repeatable system of record for running an application.

Answer: A

Explanation:
In Oracle Planning 2024, a Pipeline is a feature that allows administrators to define and automate a sequence of jobs (e.g., data imports, metadata updates, calculations) as a single, coordinated process. Pipelines streamline the management of metadata and data by executing multiple tasks in a specified order, ensuring dependencies are met, and providing a repeatable workflow for maintaining the Planning application.
* A. Develop pipelines to guide you through the Planning process: Incorrect. Pipelines are not a planning guide; they are an automation tool for executing jobs, not a process framework.
* B. Use pipelines as a visible, automated, and repeatable system of record for running an application:
Incorrect. While pipelines are automated and repeatable, they are not a "system of record" for running the entire application-they focus on specific job sequences.
* C. Use pipelines to coordinate the running of a series of jobs as a single process: Correct. This aligns with the Oracle definition of pipelines, which orchestrate multiple jobs (e.g., import data, refresh database) into one executable process.
* D. Quickly drill into data slices that are important to you with pipelines: Incorrect. Pipelines are not designed for data analysis or drilling into data slices; they are for job automation.
The Oracle documentation emphasizes that pipelines are used to manage and execute a series of jobs efficiently, making C the true statement.

30, updated for 2024).

NEW QUESTION # 38
Which two statements are true about approval units?

- A. Approval units are combinations of scenario, version, and entity or part of an entity.
- B. Approval units can also include secondary dimensions within any entity.
- C. You can have up to three scenario/version combinations per approval unit.
- D. You can set the option in Application Settings to include detailed annotations for approval units.

Answer: A,B

Explanation:
In Oracle Planning 2024, approval units manage the review process. The two true statements are:
* A. You can have up to three scenario/version combinations per approval unit: Incorrect. There's no strict limit of three scenario/version combinations per approval unit; multiple combinations are possible based on hierarchy design.
* B. Approval units are combinations of scenario, version, and entity or part of an entity: Correct.
Approval units are defined by Scenario (e.g., Budget), Version (e.g., Working), and Entity (e.g., Department) or entity hierarchies, forming the basis of the approval process.
* C. Approval units can also include secondary dimensions within any entity: Correct. Secondary dimensions (e.g., Product, Project) can be added to approval units within an entity to refine the scope of approval.
* D. You can set the option in Application Settings to include detailed annotations for approval units:
Incorrect. Annotations are cell-level notes, not an Application Settings option tied to approval units; they're managed separately.
The Oracle documentation confirms B and C as accurate descriptions of approval units, making them the correct answers.

NEW QUESTION # 39
Which three statements are true about importing metadata from a flat file into Planning?

- A. You can use the import file functionality to import more metadata or to perform incremental updates from the source system.
- B. Your import file must contain a list of metadata records. Each metadata record contains a delimited list of property values that matches the order designated in the header record.
- C. When selecting to clear members during import, any member not specified is deleted from the outline after importing the dimension unless it is an ancestor of a member that was specified, or is a base member of a shared member that was specified.
- D. You can rename or delete members of attribute dimensions during a metadata import.
- E. You can import data forms, dashboards, and infolets by loading a local import file or an import file from the Inbox server.

Answer: A,B,C

Explanation:
In Oracle Planning 2024, importing metadata from a flat file into Planning involves specific rules and capabilities. The three true statements are:
* A. You can rename or delete members of attribute dimensions during a metadata import: Incorrect.
Metadata imports update dimension members (e.g., adding, updating properties), but renaming or deleting attribute dimension members is not directly supported via flat file import-it requires manual action or a separate process.
* B. You can import data forms, dashboards, and infolets by loading a local import file or an import file from the Inbox server:
Incorrect. Flat file imports are for metadata (e.g., dimensions, members), not artifacts like forms, dashboards, or infolets, which are managed via Migration or Application tools.
* C. Your import file must contain a list of metadata records. Each metadata record contains a delimited list of property values that matches the order designated in the header record: Correct. The import file format requires a header defining properties (e.g., Name, Parent) and subsequent records with delimited values (e.g., CSV) matching that order, a standard requirement for metadata imports.
* D. When selecting to clear members during import, any member not specified is deleted from the outline after importing the dimension unless it is an ancestor of a member that was specified, or is a base member of a shared member that was specified:

Correct. When the "Clear Members" option is selected, unspecified members are removed, but ancestors of specified members and base members of shared members are retained to maintain hierarchy integrity.

* E. You can use the import file functionality to import more metadata or to perform incremental updates from the source system:
Correct. Metadata imports support both full loads and incremental updates, allowing administrators to add or modify members as needed from a source system.

The Oracle documentation verifies that C, D, and E accurately describe the metadata import process, making them the correct answers.

References:

NEW QUESTION # 40

Which set of steps do you perform to enable each Planning module?

- A. Run pre-configuration tasks, enable the module, and configure the module.
- B. Enable the module, configure the module, and run post-configuration tasks.
- C. Enable the module and refresh the database.
- D. Configure the module and refresh the database.

Answer: B

NEW QUESTION # 41

......

According to the needs of all people, the experts and professors in our company designed three different versions of the 1z0-1080-25 certification training materials for all customers. The three versions are very flexible for all customers to operate. According to your actual need, you can choose the version for yourself which is most suitable for you to preparing for the coming exam. All the 1z0-1080-25 Training Materials of our company can be found in the three versions. It is very flexible for you to use the three versions of the 1z0-1080-25 latest questions to preparing for your coming exam.
