

Hybrid-Cloud-Observability-Network-Monitoring Quiz Materials - Hybrid-Cloud-Observability-Network-Monitoring Exam Guide & Hybrid-Cloud-Observability-Network-Monitoring Exam Collection

ActualTestsQuiz provides accurate and up-to-date SolarWinds Hybrid-Cloud-Observability-Network-Monitoring Exam Questions that ensure exam success. With these SolarWinds Hybrid-Cloud-Observability-Network-Monitoring practice questions, you can pass the Hybrid-Cloud-Observability-Network-Monitoring exam on the first try. ActualTestsQuiz understands the stress and anxiety that exam candidates experience while studying. As a result, they provide personalized SolarWinds Hybrid-Cloud-Observability-Network-Monitoring Practice Exam material to assist you in efficiently preparing for the exam.

Our SolarWinds experts also guarantee that anyone who studies well enough from the prep material will pass the SolarWinds Exams on the first try. We have kept the price of our Hybrid Cloud Observability Network Monitoring Exam (Hybrid-Cloud-Observability-Network-Monitoring) exam prep material very reasonable compared to other platforms so as not to stretch your tight budget further. And we also offer up to 1 year of free updates. A demo version of the preparation material is available on the website so that you can verify the validity of the product before obtaining them.

Valid Hybrid-Cloud-Observability-Network-Monitoring Exam Format & Hybrid-Cloud-Observability-Network-Monitoring Actual Test Pdf

These are expertly designed SolarWinds Hybrid-Cloud-Observability-Network-Monitoring mock tests, under the supervision of thousands of professionals. A 24/7 customer service is available for assistance in case of any sort of pinch. It shows results at the end of every Hybrid-Cloud-Observability-Network-Monitoring mock test attempt so you don't repeat mistakes in the next try. To confirm the license of the product, you need an active internet connection. ActualTestsQuiz desktop Hybrid Cloud Observability Network Monitoring Exam (Hybrid-Cloud-Observability-Network-Monitoring) practice test is compatible with every Windows-based computer. You can use this software without an active internet connection.

SolarWinds Hybrid Cloud Observability Network Monitoring Exam Sample Questions (Q77-Q82):

NEW QUESTION # 77

Which SNMP version will support MD5, SHA1, SHA256, and SHA512 authentication in SolarWinds' platform?

- A. version 1

- B. version 3
- C. version 2c
- D. version 2

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Only SNMP version 3 supports advanced authentication methods such as MD5, SHA1, SHA256, and SHA512 in SolarWinds and other SNMP-compliant platforms.

The documentation specifies:

"SNMP v3 provides secure authentication and encryption options, including MD5, SHA1, SHA256, and SHA512. Versions 1 and 2c only support community string authentication." References:

NPM Administrator Guide: SNMP Security and Supported Authentication Methods

NEW QUESTION # 78

Which statement depicts the relationship between device studio pollers' supported technologies and universal device pollers' (UDPs) supported technologies?

- A. device studio pollers can poll for node details of SNMP enabled devices, UDPs cannot
- B. UDPs can poll for memory utilization of SNMP enabled devices, device studio pollers cannot
- C. device studio pollers can poll for CPU utilization of SNMP enabled devices, UDPs cannot
- D. UDPs can poll for hardware status of SNMP enabled devices, device studio pollers cannot

Answer: D

NEW QUESTION # 79

A device studio poller is being built for the node details widget. The plan is to add a field for serial numbers. How would this be accomplished?

- A. Default widgets are being used, fields cannot be added to the device studio
- B. Create a serial number universal device poller (UDP) and link to the node details widget.
- C. Add the object ID (OID) to an existing data source and edit the field name in the widget.
- D. Change one data source field to serial number and supply the OID for the data source.

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To display the serial number in the node details widget using Device Studio, you must add a new data source field, name it "Serial Number," and provide the correct OID that polls the serial number from the device. This field then appears in the node details widget for the custom poller. Editing an existing field's name is not best practice, and UDPs cannot be linked directly to Device Studio widgets.

Reference:

Device Studio Admin Guide, "Adding Serial Number Field to Node Details Widget,"

"Create a data source with the OID for serial number and label the field accordingly in Device Studio."

NEW QUESTION # 80

Which two of the following standards does hybrid cloud observability use to capture flow data and CBQoS data? (Choose two.)

- A. Net Flow
- B. IP Fix
- C. J-Flow
- D. SNMP

Answer: A,B

NEW QUESTION # 81

A network router node using ICMP polling has a green status icon and shows basic information (i.e., status) but is not showing more detailed statistics. What might resolve this issue?

- A. Edit the node properties to verify proper polling credentials.
- B. Run ping tests to verify communication.
- **C. Switch polling to SNMP to gather additional polling statistics.**
- D. Unmanage and re-manage the node.

Answer: C

NEW QUESTION # 82

.....

With limited time for your preparation, many exam candidates can speed up your pace of making progress. Our Hybrid-Cloud-Observability-Network-Monitoring study materials will remedy your faults of knowledge understanding. As we know, some people failed the exam before, and lost confidence in this agonizing exam before purchasing our Hybrid-Cloud-Observability-Network-Monitoring training guide. Also it is good for releasing pressure. Many customers get manifest improvement and lighten their load with our Hybrid-Cloud-Observability-Network-Monitoring exam braindumps. So just come and have a try!
