Free PDF Quiz 2026 Authoritative DP-700: Reliable Implementing Data Engineering Solutions Using Microsoft Fabric Exam Papers

We attach importance to candidates' needs and develop the DP-700 practice materials from the perspective of candidates, and we sincerely hope that you can succeed with the help of our practice materials. Our aim is to let customers spend less time to get the maximum return. By choosing our DP-700 practice materials, you only need to spend a total of 20-30 hours to deal with exams, because our DP-700 practice materials are highly targeted and compiled according to the syllabus to meet the requirements of the exam. As long as you follow the pace of our DP-700 practice materials, you will certainly have unexpected results.

Microsoft DP-700 Exam Syllabus Topics:

Topic	Details
Topic 1	• Implement and manage an analytics solution: This section of the exam measures the skills of Microsoft Data Analysts regarding configuring various workspace settings in Microsoft Fabric. It focuses on setting up Microsoft Fabric workspaces, including Spark and domain workspace configurations, as well as implementing lifecycle management and version control. One skill to be measured is creating deployment pipelines for analytics solutions.
Topic 2	• Monitor and optimize an analytics solution: This section of the exam measures the skills of Data Analysts in monitoring various components of analytics solutions in Microsoft Fabric. It focuses on tracking data ingestion, transformation processes, and semantic model refreshes while configuring alerts for error resolution. One skill to be measured is identifying performance bottlenecks in analytics workflows.
Topic 3	• Ingest and transform data: This section of the exam measures the skills of Data Engineers that cover designing and implementing data loading patterns. It emphasizes preparing data for loading into dimensional models, handling batch and streaming data ingestion, and transforming data using various methods. A skill to be measured is applying appropriate transformation techniques to ensure data quality.

We respect private information of our customers, and if you purchase DP-700 exam dumps from us, your personal information such as name and email address will be protected well. Once the order finishes, your information will be concealed. We won't send junk email to you. Besides, DP-700 exam braindumps of us offer you free update for you, and we recommend you to have a try before buying, therefore you can have a better understanding of what you are going to buy. We have online service stuff, and if you have any questions about DP-700 Exam Dumps, just contact us.

Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q77-Q82):

NEW QUESTION # 77
You need to ensure that the data analysts can access the gold layer lakehouse.
What should you do?

- A. Share the lakehouse with the DataAnalysts group and grant the Build reports on the default semantic model permission.
- B. Add the DataAnalyst group to the Viewer role for WorkspaceA.
- C. Share the lakehouse with the DataAnalysts group and grant the Read all Apache Spark permission.
- D. Share the lakehouse with the DataAnalysts group and grant the Read all SQL Endpoint data permission.

Answer: D

Explanation:
Data Analysts' Access Requirements must only have read access to the Delta tables in the gold layer and not have access to the bronze and silver layers.
The gold layer data is typically queried via SQL Endpoints. Granting the Read all SQL Endpoint data permission allows data analysts to query the data using familiar SQL-based tools while restricting access to the underlying files.

NEW QUESTION # 78
You are implementing the following data entities in a Fabric environment:
Entity1: Available in a lakehouse and contains data that will be used as a core organization entity Entity2: Available in a semantic model and contains data that meets organizational standards Entity3: Available in a Microsoft Power BI report and contains data that is ready for sharing and reuse Entity4: Available in a Power BI dashboard and contains approved data for executive-level decision making Your company requires that specific governance processes be implemented for the data.
You need to apply endorsement badges to the entities based on each entity's use case.
Which badge should you apply to each entity? To answer, drag the appropriate badges the correct entities. Each badge may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Badges		Answer Area	
⠿ Certified		Entity1:	⠿ Master data
⠿ Master data		Entity2:	⠿ Certified
⠿ Promoted		Entity3:	⠿ Promoted
⠿ Cannot be endorsed		Entity4:	⠿ Certified

NEW QUESTION # 79

You have a Google Cloud Storage (GCS) container named storage1 that contains the files shown in the following table.

Name	Size
ProductFile.parquet	8 MB
StoreFile.json	500 MB
TripsFile.csv	99 MB

You have a Fabric workspace named Workspace1 that has the cache for shortcuts enabled. Workspace1 contains a lakehouse named Lakehouse1. Lakehouse1 has the shortcuts shown in the following table.

Name	Source	Last accessed
Products	ProductFile	12 hours ago
Stores	StoreFile	4 hours ago
Trips	TripsFile	48 hours ago

You need to read data from all the shortcuts.
Which shortcuts will retrieve data from the cache?

- A. Trips only
- B. Products, Stores, and Trips
- C. Products and Trips only
- D. Stores and Products only
- E. Stores only
- F. Products only

Answer: D

Explanation:
When reading data from shortcuts in Fabric (in this case, from a lakehouse like Lakehouse1), the cache for shortcuts helps by storing the data locally for quick access. The last accessed timestamp and the cache expiration rules determine whether data is fetched from the cache or from the source (Google Cloud Storage, in this case).
Products: The ProductFile.parquet was last accessed 12 hours ago. Since the cache has data available for up to
12 hours, it is likely that this data will be retrieved from the cache, as it hasn't been too long since it was last accessed.
Stores: The StoreFile.json was last accessed 4 hours ago, which is within the cache retention period.
Therefore, this data will also be retrieved from the cache.
Trips: The TripsFile.csv was last accessed 48 hours ago. Given that it's outside the typical caching window (assuming the cache has a maximum retention period of around 24 hours), it would not be retrieved from the cache. Instead, it will likely require a fresh read from the source.

NEW QUESTION # 80

You need to develop an orchestration solution in fabric that will load each item one after the other. The solution must be scheduled to run every 15 minutes. Which type of item should you use?

- A. Dataflow Gen2 dataflow
- B. warehouse
- C. notebook
- D. data pipeline

Answer: D

NEW QUESTION # 81

HOTSPOT

You have a Fabric workspace that contains two lakehouses named Lakehouse1 and Lakehouse2. Lakehouse1 contains staging data in a Delta table named Orderlines. Lakehouse2 contains a Type 2 slowly changing dimension (SCD) dimension table named Dim_Customer.

You need to build a query that will combine data from Orderlines and Dim_Customer to create a new fact table named Fact_Orders. The new table must meet the following requirements:

Enable the analysis of customer orders based on historical attributes.

Enable the analysis of customer orders based on the current attributes.

How should you complete the statement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

```
SELECT
  OrderLineID order_line_id
  ,OrderDate order_date
  ,c.customer_key
  ,c.customer_id
  ,Quantity order_quantity
  ,UnitPrice unit_price
  ,TaxRate tax_rate
FROM
  Lakehouse1.orderlines o
INNER JOIN
  Lakehouse2.dim_customer c
    ON o.customerid = c.customer_id
```

AND [▼]
c.is_current = 1
o.OrderDate >= valid_to_datetime
o.OrderDate >= valid_from_datetime

AND [▼]
c.is_current = 1
o.OrderDate < valid_to_datetime
o.OrderDate <= valid_from_datetime

Explanation:

Answer Area

```
SELECT
  OrderLineID order_line_id
  ,OrderDate order_date
  ,c.customer_key
  ,c.customer_id
  ,Quantity order_quantity
  ,UnitPrice unit_price
  ,TaxRate tax_rate
FROM
  Lakehouse1.orderlines o
INNER JOIN
  Lakehouse2.dim_customer c
    ON o.customerid = c.customer_id
```

AND [▼]
c.is_current = 1
o.OrderDate > c.valid_to_datetime
o.OrderDate >= c.valid_from_datetime t

AND [▼]
c.is_current = 1
o.OrderDate < c.valid_to_datetime
o.OrderDate <= c.valid_from_datetime

NEW QUESTION # 82

......

The effect of the user using the latest DP-700 exam torrent is the only standard for proving the effectiveness and usefulness of our products. I believe that users have a certain understanding of the advantages of our DP-700 study guide, but now I want to show you the best of our DP-700 Training Materials - Amazing pass rate. Based on the statistics, prepare the exams under the guidance of our DP-700 practice materials, the user's pass rate is up to 98% to 100%, And they only need to practice latest DP-700 exam torrent to hours.
