UiAAAv1 Valid Exam Bootcamp & UiAAAv1 Reliable Test Camp

UiPath UiAAAv1 practice exam support team cooperates with users to tie up any issues with the correct equipment. If UiPath UiAAAv1 certification exam material changes, Prep4away also issues updates free of charge for 1 year following the purchase of our UiAAAv1 Exam Questions.

UiPath Agentic Automation Associate Sample Questions (Q37-Q42):

NEW QUESTION # 37

Scenario: A Citrix Administrator previously configured a Citrix Virtual Desktops Site to use evaluation licenses. The administrator then installed valid advanced licenses on the Citrix License Server and confirmed that licenses show correctly in the licensing console. However, a user reports an issue about logging on to the published desktop. The user receives an error message stating that the evaluation license is about to expire. What should the administrator do to fix this issue?

- A. Restart the License service.
- B. Remove the evaluation license.
- C. Verify the host name entry in the license file.
- **D. Change the product edition in Citrix Studio.**

Answer: D

Explanation:

After installing valid licenses on the License Server, the Site must be configured in Citrix Studio to use the correct product edition

(for example, Advanced, Enterprise, or Premium). If it remains set to "evaluation," users will continue to see the expiration warning. Updating the product edition in Studio resolves the issue.

NEW QUESTION # 38

After creating a new machine catalog using the Machine Creation Services (MCS) wizard in Citrix Studio, a Citrix Administrator determines that Windows activation fails for all new machines in that catalog. Which two conditions can cause this to happen? (Choose two.)

- A. The base image rearm count has been exceeded.
- B. The version of Windows installed uses Multiple Activation Key (MAK) licensing.
- C. The Microsoft License Server is unreachable.
- D. The version of Windows installed is Windows Server 2012 R2.

Answer: A,B

Explanation:

Rearm count exceeded: If the base image has been sysprepped too many times, the rearm count may be exhausted, preventing Windows activation on cloned machines.

MAK licensing: MCS-provisioned machines are treated as newly deployed instances. MAK licensing is not suitable for this scenario because each clone would require its own activation, leading to failures.

NEW QUESTION # 39

Scenario: A Citrix Administrator is investigating an instability in the system that is causing the Print Spooler service to stop frequently on the Virtual Delivery Agent (VDA) machine. The administrator finds printer driver conflicts in the environment and needs to remove the problem drivers while still maintaining printing functionality. Which policy setting can the administrator use to resolve this issue on the VDA machine?

- A. Auto-create all client printers
- B. Automatic installation of in-box printer drivers
- C. Use universal printing only
- D. Use only printer model specific drivers

Answer: C

Explanation:

By enabling the "Use universal printing only" policy, the VDA will rely exclusively on the Citrix Universal Print Driver instead of loading multiple printer model-specific drivers. This resolves driver conflicts, stabilizes the Print Spooler service, and maintains printing functionality.

NEW QUESTION # 40

What is the minimum permission a Citrix Administrator can grant to an IT manager to access Citrix Studio?

- A. Read Only Administrator
- B. Machine Catalog Administrator
- C. Host Administrator
- D. Delivery Group Administrator

Answer: A

NEW QUESTION # 41

A user calls the help desk and states that launching a pooled random desktop takes as long as five minutes. Which Citrix Director report can a Citrix Administrator review to find out what might be causing the delay?

- A. Load Evaluators
- B. Logon Performance
- C. Connection Failures

- D. Resource Utilization

Answer: B

Explanation:

The Logon Performance report in Citrix Director breaks down the different phases of the logon process, such as authentication, profile loading, and group policy processing. Reviewing this report helps the administrator identify which phase is causing the long desktop launch times.

NEW QUESTION # 42

.....

If a person fails despite proper UiPath Agentic Automation Associate UiAAAv1 test preparation and using UiAAAv1 practice exam material, Prep4away provides a money-back guarantee. If a person fails despite proper UiPath Agentic Automation Associate UiAAAv1 test preparation and using UiAAAv1 practice exam material, Prep4away provides a money-back guarantee. Prep4away offers three months of free updates if the UiPath Agentic Automation Associate exam content changes after the purchase of UiPath Agentic Automation Associate valid dumps.
