1z0-1057-25 Valid Exam Vce Free & Passing 1z0-1057-25 Score

The content and design of our 1z0-1057-25 learning quiz are all perfect and scientific, and you will know it when you use this. Of course, we don't need you to spend a lot of time on our 1z0-1057-25 exam questions. As long as you make full use of your own piecemeal time after 20 to 30 hours of study, you can go to the exam. The users of our 1z0-1057-25 Study Materials have been satisfied with their results. I believe you are the next person to pass the exam!

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q123-Q128):

NEW QUESTION # 123

Which two statements describe how the Resource Qualification Score is calculated?

- A. An individual's score is 100% if the resource request has a qualification with a specified proficiency and the resource has the qualification that meets the specified proficiency.
- B. An individual's score is 100% if the resource request has a qualification, but no proficiency is specified, and the resource has the qualification.
- C. An individual's score is 100% if the resource request has a qualification with a specified proficiency and the resource does not have the qualification.
- D. An individual's score is 100% if the resource request has a qualification with a specified proficiency and the resource has the qualification with a proficiency that is lower or higher than specified.

Answer: A,B

Explanation:

The Resource Qualification Score is a percentage that indicates how well an individual matches the qualifications required for a resource request. An individual's score is 100% if either of the following conditions are met:

- * The resource request has a qualification, but no proficiency is specified, and the resource has the qualification. This means that any level of proficiency is acceptable for the qualification.
- * The resource request has a qualification with a specified proficiency and the resource has the qualification that meets the specified proficiency. This means that the resource has the exact level of proficiency required for the qualification. An individual's score is not 100% if the resource request has a qualification with a specified proficiency and the resource does not have the qualification or has a different level of proficiency than required. In this case, the score is calculated based on how close the resource's proficiency is to the required proficiency. NEW QUESTION # 124

Which four standard objects can you configure to include business specific attributes by using Application Composer for Project Execution Management? (Choose four.)

- A. Project Deliverables
- B. Project Issues
- C. Project Gates
- D. Project Milestones
- E. Project Resource Request
- F. Project Resource Assignment

Answer: A,B,C,D

Explanation:

Application Composer is a tool that allows you to configure standard objects or create custom objects to include business specific attributes for Project Execution Management. Four of the standard objects that you can configure using Application Composer are:

- * Project Gates: These are checkpoints that mark the completion of a phase or stage in a project lifecycle.
- * Project Issues: These are problems or risks that affect the progress or outcome of a project.
- * Project Milestones: These are significant events or achievements that indicate the status or completion of a project or task.
- * Project Deliverables: These are products or services that are produced or provided as part of a project or task. Project Resource Request and Project Resource Assignment are not standard objects that you can configure using Application Composer. These are features that allow you to request and assign resources for projects and tasks based on various criteria such as availability, qualifications, preferences, etc. Reference: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/manage-project-execution.html#OAPFM2356201>

NEW QUESTION # 125

Green House Corporation has decided to enable the budgetary control feature for their projects. At which two levels will they be able to enter the amounts in the budget versions for these projects?
(Choose two.)

- A. Task
- B. Expenditure Type
- C. Top resource
- D. Project
- E. Expenditure Category

Answer: A,D

Explanation:

Budgetary control is a feature that allows you to monitor and control project costs against approved budgets.

You can enter the amounts in the budget versions for these projects at two levels: Task and Project. These levels correspond to the budgetary control levels that are defined for the project type. You can also view and compare the budget amounts and actual costs at these levels using reports and dashboards. Expenditure Type, Top Resource, and Expenditure Category are not levels at which you can enter the amounts in the budget versions for these projects. These are attributes that can be used to group and filter the budget and actual amounts for reporting purposes. NEW QUESTION # 126

Stigma Consulting wants to implement the program management capability to coordinate and track their strategic programs. Which three components are required to configure the program options as part of implementing the program management capability?
(Choose three.)

- A. Calendar
- B. Currencies
- C. Derivation Methods
- D. Accounting Methods
- E. Calculation Methods

Answer: A,C,E

Explanation:

Program management is a capability that allows you to coordinate and track multiple related projects and tasks as part of a strategic program. To configure the program options as part of implementing the program management capability, you need to define three components:

* Calendar: This component allows you to specify the calendar that is used to calculate the dates and durations for the program and its projects and tasks.

* Calculation Methods: This component allows you to specify the methods that are used to calculate the progress, performance, and variance measures for the program and its projects and tasks based on various sources and formulas.

* Derivation Methods: This component allows you to specify the methods that are used to derive the attributes and values for the program and its projects and tasks based on various rules and conditions.

Currencies and Accounting Methods are not components that are required to configure the program options. Currencies are used to define the currency conversion rates and rules for the program and its projects and tasks. Accounting Methods are used to define the subledger accounting rules and options for the program and its projects and tasks. Reference:

<https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/manage-project-programs.html#OAPFM2356261>

NEW QUESTION # 127

Which two attributes are available while enabling a task as a business object for social networking?

- A. Task
- B. Creation Date
- C. Task Number
- D. Project
- E. Project Number

Answer: A,D

Explanation:

To enable a task as a business object for social networking, you need to select the task and the project attributes. These attributes allow you to identify the task and the project it belongs to, and to view the social conversations related to them. Task number and creation date are not available as attributes for social networking. Project number is available, but it is not required to enable a task as a business object. Reference:
