

Quiz 2026 OGEA-101: Marvelous Questions TOGAF Enterprise Architecture Part 1 Exam Pdf

2026 Latest LatestCram OGEA-101 PDF Dumps and OGEA-101 Exam Engine Free Share: https://drive.google.com/open?id=1wWjVGIwTsHTSCMwTwEpXkqvEn_qTvHkT

Our company has successfully created ourselves famous brands in the past years, and all of the OGEA-101 valid study guide materials from our company have been authenticated by the international authoritative institutes and cater for the demands of all customers at the same time. We are attested that the quality of the OGEA-101 Test Prep from our company have won great faith and favor of customers. We persist in keeping creating the best helpful and most suitable OGEA-101 study practice question for all customers.

The Open Group OGEA-101 exams play a significant role to verify skills, experience, and knowledge in a specific technology. Enrollment in the TOGAF Enterprise Architecture Part 1 Exam OGEA-101 is open to everyone. Upon completion of TOGAF Enterprise Architecture Part 1 Exam OGEA-101 Exam Questions' particular criteria. Participants in the OGEA-101 Dumps come from all over the world and receive the credentials for the TOGAF Enterprise Architecture Part 1 Exam OGEA-101 Questions. They can quickly advance their careers in the fiercely competitive market and benefit from certification after earning the OGEA-101 Questions badge.

OGEA-101 Test Price | Pdf OGEA-101 Braindumps

The versions of our OGEA-101 study guide includes the PDF version, PC version, APP online version. Each version's using method and functions are different and the client can choose the most convenient version to learn our OGEA-101 exam materials. For example, the PDF version is convenient for you to download and print our OGEA-101 Test Questions and is suitable for browsing learning. If you use the PDF version you can print our OGEA-101 test torrent on the papers and it is convenient for you to take notes. You can learn our OGEA-101 test questions at any time and place.

The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 exam.

Topic 2	<ul style="list-style-type: none"> Information Systems Architecture: Focusing on data and application architectures, this topic of the OGEA-101 exam assesses ability of TOGAF practitioners to define and manage information systems. It measures their skills in identifying data entities and application components.
Topic 3	<ul style="list-style-type: none"> Fundamental Concepts of Enterprise Architecture: This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.
Topic 4	<ul style="list-style-type: none"> Architecture Vision: Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 Exam and implementing enterprise architecture.
Topic 5	<ul style="list-style-type: none"> Architecture Content Framework: Candidates learn about the TOGAF content metamodel and architecture artifacts. This topic of the OGEA-101 exam measures their understanding of content organization and documentation.
Topic 6	<ul style="list-style-type: none"> ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.
Topic 7	<ul style="list-style-type: none"> Implementation Governance: This topic of The Open Group OGEA-101 exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q80-Q85):

NEW QUESTION # 80

What criteria for a good architecture principle indicates that it is sufficiently definitive and precise to support consistent decision-making in complex situations?

- A. Consistency
- B. Robustness
- C. Completeness
- D. Stability

Answer: B

Explanation:

In the TOGAF Standard, a well-defined architecture principle must meet several quality criteria, such as understandability, robustness, completeness, and consistency. The criterion most closely associated with a principle being definitive, precise, and reliable under complex decision-making conditions is Robustness.

TOGAF describes robustness as the characteristic that ensures the principle provides clear guidance even when applied across a variety of scenarios, stakeholder viewpoints, and architectural complexities. A robust principle remains valid and usable regardless of changes in context or external pressures.

Where other criteria focus on different aspects—such as Stability (long-term applicability), Completeness (covering all necessary aspects of the principle's intent), and Consistency (avoiding conflict with other principles)—it is Robustness that specifically ensures a principle is sufficiently strong and precise to support consistent decisions in complex environments. This means a robust principle minimizes ambiguity, avoids subjective interpretation, and provides architects with a dependable rule that can be repeatedly applied across multiple architecture domains and transformation projects. By being robust, a principle becomes a dependable instrument for governance and architectural alignment at the enterprise level.

NEW QUESTION # 81

Consider the following statements:

1. Each contracted party is required to act responsibly to the organization and its stakeholders.
2. All decisions taken, processes used, and their implementation will not be allowed to create unfair advantage to any one particular party.
3. Digital Transformation and operations will be more effective and efficient.
4. Strategic decision-making by C-Level executives and business leaders will be more effective.

Which statements highlight the value and necessity for Architecture Governance to be adopted within organizations?

- A. 2 & 3
- B. 1 & 4
- C. 3 & 4
- **D. 1 & 2**

Answer: D

Explanation:

Architecture governance is the practice of ensuring compliance with the enterprise architecture and its principles, standards, and goals. Architecture governance provides the means to establish, monitor, and control the architecture development and implementation processes, and to resolve any issues or conflicts that may arise. Architecture governance also ensures that all stakeholders are represented and involved in the decision-making process, and that their interests and concerns are balanced and aligned. Statements 1 and 2 highlight the value and necessity for architecture governance to be adopted within organizations, as they emphasize the importance of responsibility, accountability, fairness, and transparency in the architectural activities. Statements 3 and 4 are more related to the benefits and outcomes of having a good enterprise architecture, rather than the governance aspect.

NEW QUESTION # 82

Which of the following are interests important to the stakeholders in a system?

- A. Principles
- B. Architecture views
- C. Requirements
- **D. Concerns**

Answer: D

Explanation:

Concerns are interests important to the stakeholders in a system. They are used to identify and classify the system's stakeholders and to guide the selection of viewpoints for the architecture description. Reference: The TOGAF Standard | The Open Group Website, Section 3.2.1 Architecture Viewpoints

NEW QUESTION # 83

Exhibit

Consider the illustration showing an architecture development cycle Which description matches the phase of the ADM labeled as item 1?

- A. Establishes procedures for managing change to the new architecture
- B. Conducts implementation planning for the architecture defined in previous phases
- C. Provides architectural oversight for the implementation
- **D. Operates the process of managing architecture requirements**

Answer: D

Explanation:

* The illustration shows an architecture development cycle based on the TOGAF ADM (Architecture Development Method), which is a method for developing and managing an enterprise architecture.

* The ADM consists of nine phases, each with a specific purpose and output. The phases are:

* Preliminary Phase: To prepare and initiate the architecture development cycle, including defining the architecture framework, principles, and governance.

* Phase A: Architecture Vision: To define the scope, vision, and stakeholders of the architecture initiative, and to obtain approval to proceed.

* Phase B: Business Architecture: To describe the baseline and target business architecture, and to identify the gaps between them.

- * Phase C: Information Systems Architectures: To describe the baseline and target data and application architectures, and to identify the gaps between them.
- * Phase D: Technology Architecture: To describe the baseline and target technology architecture, and to identify the gaps between them.
- * Phase E: Opportunities and Solutions: To identify and evaluate the opportunities and solutions for implementing the target architecture, and to define the work packages and transition architectures.
- * Phase F: Migration Planning: To finalize the implementation and migration plan, and to ensure alignment with the enterprise portfolio and project management.
- * Phase G: Implementation Governance: To provide architecture oversight and guidance for the implementation projects, and to manage any architecture change requests.
- * Phase H: Architecture Change Management: To monitor the changes in the business and technology environment, and to assess the impact and performance of the architecture.
- * In addition to these phases, there is a central process called Requirements Management, which is labeled as item 1 in the illustration. This process operates throughout the ADM cycle, and its purpose is to manage the architecture requirements throughout the architecture development, ensuring that they are aligned with the business requirements and the stakeholder concerns².
- * Therefore, the description that matches the phase of the ADM labeled as item 1 is C. Operates the process of managing architecture requirements.

NEW QUESTION # 84

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

General rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission

The joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture.

A document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle

A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture.

Which deliverables match these descriptions?

- A. 1 Architecture Principles - 2 Architecture Contracts - 3 Request for Architecture Work - 4 Architecture Requirements Specification
- B. 1 Architecture Requirements Specification - 2 Architecture Principles - 3 Architecture Vision - 4 Architecture Contracts
- C. 1 Architecture Contracts - 2 Architecture Requirements Specification - 3 Architecture Vision - 4 Architecture Principles
- D. 1 Architecture Principles - 2 Architecture Contracts - 3 Architecture Requirements Specification - 4 Request for Architecture Work

Answer: A

Explanation:

According to the TOGAF standard, the deliverables that match the descriptions are as follows:

1 Architecture Principles: These are general rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission¹. They reflect a level of consensus among the various elements of the enterprise, and form the basis for making future IT decisions¹.

2 Architecture Contracts: These are the joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture². They are used to ensure that the architecture is implemented and governed according to the agreed-upon specifications and standards².

3 Request for Architecture Work: This is a document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle³. It defines the scope, schedule, budget, deliverables, and stakeholders of the architecture project³.

4 Architecture Requirements Specification: This is a set of quantitative statements that outline what an implementation project must do in order to comply with the architecture⁴. It defines the requirements for each architecture domain, as well as the relationships and dependencies among them⁴.

NEW QUESTION # 85

.....

You always need actual and updated OGEA-101 exam questions to prepare the test successfully in less time. If you don't study with real TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) questions, you will ultimately fail and waste your money and time. To save yourself from this loss, you just need to prepare with updated TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) exam questions of LatestCram.
