

# Seeing Dumps PL-400 Torrent - Say Goodbye to Microsoft Power Platform Developer

P.S. Free & New PL-400 dumps are available on Google Drive shared by TorrentVCE: <https://drive.google.com/open?id=19AEcghrzwW3gPd08rqD7ccfEZv46ewZu>

Our PL-400 study materials can satisfy the wishes of our customers for high-efficiency and client only needs to spare little time to prepare for the PL-400 test and focus their main attentions on their major things. As a leader in the career, we have been studying and doing researching on the PL-400 Practice Braindumps for over ten year. We have helped tens of thousands of the candidates successfully passed the exam and achieved their dreams.

In order to meet the needs of all customers that pass their exam and get related certification, the experts of our company have designed the updating system for all customers. Our PL-400 exam question will be constantly updated every day. Maybe most of people prefer to use the computer when they are study, but we have to admit that many people want to learn buy the paper, because they think that studying on the computer too much does harm to their eyes. PL-400 Test Questions have the function of supporting printing in order to meet the need of customers.

## PL-400 Latest Test Labs - PL-400 Latest Braindumps Pdf

The Microsoft PL-400 real exam simulation by the software helps you counter PL-400 exam anxiety. You need to install the desktop software on Windows to take the practice test. Our web-based PL-400 Practice Test has all specs of the desktop software. The only difference is that this Microsoft PL-400 practice test works online using any operating system and browsers.

## Microsoft Power Platform Developer Sample Questions (Q216-Q221):

### NEW QUESTION # 216

You need to assign the minimum environment security role to the appropriate users.

Which security roles should you use? To answer, drag the appropriate security roles to the correct users. Each security role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

### Security roles

- System Administrator
- System Customizer
- Common Data Service User
- Environment Maker

### Answer Area

User	Security role
UserA	Security role
UserB	Security role
UserC	Security role
All employees	Security role

Answer:

Explanation:

Security roles	Answer Area
System Administrator	UserA: Common Data Service User
System Customizer	UserB: Environment Maker
Common Data Service User	UserC: System Administrator
Environment Maker	All employees: System Customizer

### NEW QUESTION # 217

You create the following Fetch XML query to determine the number of interviews where there are no recommendations for an applicant.

```
<fetch aggregate='true'>
  <entity name='pro_interview'>
    <attribute name='pro_interviewid' alias='recommend_count' aggregate='count' />
    <filter>
      <condition attribute='pro_recommend' operator='eq' value='1' />
    </filter>
    <link-entity name='pro_application' from='pro_applicationid' to='pro_applicationid' link-type='inner' >
      <link-entity name='contact' from='contactid' to='pro_contactid' >
        <filter>
          <condition attribute='contactid' operator='eq' value='1b315d5d-b436-eb11-a813-000d3a8b6647' />
        </filter>
      </link-entity>
    </link-entity>
  </entity>
</fetch>
```

For each of the following statements, select yes if the statements is true, Otherwise select No.

NOTE: Each correct selectin is worth one pint.

Answer Area

Statements	Yes	No
The query meets the requirements for retrieving the count of interviews without recommendations.	<input type="radio"/>	<input type="radio"/>
You can modify the query to return counts of interviews with and without recommendations.	<input type="radio"/>	<input type="radio"/>
The query allows scheduled interviews for job applications when there are no recommendations for the job applicant.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
The query meets the requirements for retrieving the count of interviews without recommendations.	<input type="radio"/>	<input checked="" type="radio"/>
You can modify the query to return counts of interviews with and without recommendations.	<input type="radio"/>	<input checked="" type="radio"/>
The query allows scheduled interviews for job applications when there are no recommendations for the job applicant.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

Statements	Yes	No
The query meets the requirements for retrieving the count of interviews without recommendations.	<input type="radio"/>	<input checked="" type="radio"/>
You can modify the query to return counts of interviews with and without recommendations.	<input type="radio"/>	<input checked="" type="radio"/>
The query allows scheduled interviews for job applications when there are no recommendations for the job applicant.	<input type="radio"/>	<input checked="" type="radio"/>

Topic 5, Northwind Traders

Case study

Background

Northwind Traders uses Microsoft Dynamics 365 Sales to manage its sales process. To better understand its customers, Northwind Traders invests in a team of researchers who gather data from multiple sources. The company stores the data it collects in a Microsoft Azure SQL Database. The company plans to use the data to enrich account records and make the sales team more effective.

Environment

\* The company has three Microsoft Power Platform environments with Dynamics 365 Sales installed. The environments are named development, test, and production.

\* Each environment has an application user that can be used for integrations.

\* The company must use solutions to perform all customization and configuration deployment.

Data

\* Researchers are responsible for creating account records.

\* Researchers have permissions on the Account table to create records, read all records, and update records they own.

\* A synchronous plug-in runs when an account record is created and could reassign the record to a different user.

\* Users must access data as themselves to enforce security and audit changes.

\* A column named new\_dataid is added to the Account table. The column uniquely identifies which data it should receive.

\* Researchers have researched only the top 20 percent of account records.

Web API

\* The company creates an Azure Function to run a RESTful .NET Web API.

o Data can be retrieved by placing a GET request to the URL <https://dataservice-tENVIRONMENTNAME.azurewebsites.net/enrich/IDATAID>.

# [ENVIRONMENTNAME] is the name of the Microsoft Power Platform environment that requests the data.

# [DATAID] is the new.dataid column in the Account table.

o The Web API response will return a 200 response plus data if the Dataid is found. Otherwise, a 404 response is returned.

- \* Developers plan to create a custom connector from the Web API to make it accessible from Microsoft Power Platform Custom connector
- \* The Web API definition used to create The custom connector must be generated based on a low-code technology.
- \* The URL used by the custom connector must incorporate the current environment name without hardcoding values.
- \* Errors generated by the custom connector must not cause downstream processes to fail.
- \* Text descriptions and field placeholder text that describe the use of the custom connector must appear for non-developers.

Process

- \* All account records must be updated with data from the Web API once automatically.
- \* Only account records that contain a DataId should be updated by the Web API.
- \* Researchers must create Power Automate flows to specify data analysis priority.
- \* The researchers require a process that repurposes a set of identical steps of parameterized Microsoft Dataverse queries from a Power Automate flow for use in other flows that have different parameters. The researchers want to avoid recreating the steps manually each time they create a flow to save time and avoid errors.

Issues

- \* A tester attempts to connect to the production instance of the Web API with a DataId that should return data. The tester receives an error stating that the remote name could not be resolved.
- \* A missing component causes an error to occur when importing the solution that contains the Power Automate flow to update account records in a test environment.

**NEW QUESTION # 218**

You need to develop a set of Web API's for a company.

What should you implement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

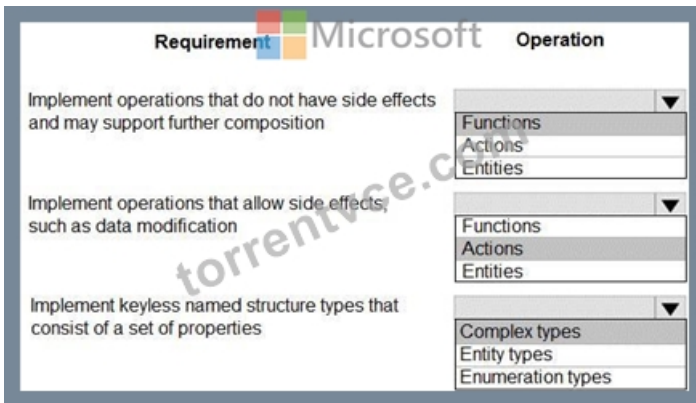

Requirement	Microsoft	Operation
Implement operations that do not have side effects and may support further composition		<input type="checkbox"/> Functions <input type="checkbox"/> Actions <input type="checkbox"/> Entities
Implement operations that allow side effects, such as data modification		<input type="checkbox"/> Functions <input type="checkbox"/> Actions <input type="checkbox"/> Entities
Implement keyless named structure types that consist of a set of properties		<input type="checkbox"/> Complex types <input type="checkbox"/> Entity types <input type="checkbox"/> Enumeration types

**Answer:**

Explanation:

Requirement	Operation
Implement operations that do not have side effects and may support further composition	<input checked="" type="checkbox"/> Functions <input type="checkbox"/> Actions <input type="checkbox"/> Entities
Implement operations that allow side effects, such as data modification	<input checked="" type="checkbox"/> Functions <input checked="" type="checkbox"/> Actions <input type="checkbox"/> Entities
Implement keyless named structure types that consist of a set of properties	<input checked="" type="checkbox"/> Complex types <input type="checkbox"/> Entity types <input type="checkbox"/> Enumeration types

Explanation:

Box 1: Functions

most functions and services that are stateless and do not have side effects.

Box 2: Actions

Actions can have side effects.

Box 3: Complex types

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/common-data-service/webapi/use-web-api-actions>

### NEW QUESTION # 219

You create solutions in a development environment and export the solution for testing by various departments in your organization.

Power users in each department control the testing environments.

You must display department-specific wording at the beginning of any custom notifications that are displayed in testing environments.

You need to package solutions to ensure that the power users can customize the notification content.

Which three actions should you perform in sequence inside a solution? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

#### Actions

Create an empty environment variable named **Custom Text Placeholder**.

Create a configuration page in the classic solution by using a text field named **Custom Text Placeholder** that uses the HTML file format.

Set the default value of the text field Custom Text Placeholder to **Enter custom text**.

Create a function to retrieve the value from the custom text placeholder and display the notification.

Export the solution.

Create a solution component configuration named **Custom Text Placeholder** that uses the JSON file format.

#### Answer area

**Answer:**

Explanation:

Actions	Answer area
Create an empty environment variable named <b>Custom Text Placeholder</b> .	Create an empty environment variable named <b>Custom Text Placeholder</b> .
Create a configuration page in the classic solution by using a text field named <b>Custom Text Placeholder</b> that uses the HTML file format.	
Set the default value of the text field Custom Text Placeholder to <b>Enter custom text</b> .	Create a function to retrieve the value from the custom text placeholder and display the notification.
Create a function to retrieve the value from the custom text placeholder and display the notification.	
Export the solution.	Export the solution.
Create a solution component configuration named <b>Custom Text Placeholder</b> that uses the JSON file format.	

Explanation:

Create an empty environment variable named **Custom Text Placeholder**.

Create a function to retrieve the value from the custom text placeholder and display the notification.

Export the solution.

Step 1: Create an empty environment variable named Custom Text Placeholder.

Applications often require different configuration settings or input parameters when deployed to different environments. Environment variables store the parameter keys and values, which then serve as input to various other application objects. Separating the parameters from the consuming objects allows you to change the values within the same environment or when you migrate solutions to other environments.

Step 2: Create a function to retrieve the value from the custom text placeholder and display the notification.

Step 3: Export the solution

You can manually export solutions. Microsoft recommends that you create an unmanaged solution to use for exporting your customizations, and then export your customizations periodically so that you have a backup in case anything happens.

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/environmentvariables>

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/export-solutions>

### NEW QUESTION # 220

A travel company plans to track the address of places their clients visit in an entity named Destination. Client information is captured as contact records. Client records include links to the places that clients visit.

The company must be able to link multiple rating records to the new address record.

You find a custom Rating entity that is incomplete.

You need to expand the Rating entity to include contact, address, and rating information in one place.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a mapping for the Destination - Rating relationship.
- B. Create a mapping for the Contact - Rating relationship.
- C. Create a 1:N relationship between the Contact system entity and the Address system entity named Destination.
- D. Create a 1:N relationship between the Address system entity and the Rating entity.
- E. Create a 1:N relationship between the Contact system entity and the Rating entity.
- F. Create a 1:N relationship between the Destination entity and the Rating entity.

**Answer: A,C,D**

Explanation:

ference:
