

# Newest Amazon AWS-Solutions-Architect-Professional Exam Pattern - AWS-Solutions-Architect-Professional Free Download

BONUS!!! Download part of VCEPrep AWS-Solutions-Architect-Professional dumps for free: [https://drive.google.com/open?id=1qFVfdhbQ\\_lRML\\_bFNDLPjL0F1wmq7Yt](https://drive.google.com/open?id=1qFVfdhbQ_lRML_bFNDLPjL0F1wmq7Yt)

The job with high pay requires they boost excellent working abilities and profound major knowledge. Passing the AWS-Solutions-Architect-Professional exam can help you find the job you dream about, and we will provide the best AWS-Solutions-Architect-Professional question torrent to the client. We are aimed that candidates can pass the AWS-Solutions-Architect-Professional exam easily. The AWS-Solutions-Architect-Professional Study Materials what we provide is to boost pass rate and hit rate, you only need little time to prepare and review, and then you can pass the AWS-Solutions-Architect-Professional exam. It costs you little time and energy, and you can download the software freely and try out the product before you buy it.

During review, you can contact with our after-sales if there are any problems with our AWS-Solutions-Architect-Professional exam torrent. They will help you 24/7 all the time. These services assure you avoid any loss. Besides, our passing rate of AWS-Solutions-Architect-Professional practice materials has reached up to 98 to 100 percent up to now, so you cannot miss this opportunity. Besides, free updates of AWS-Solutions-Architect-Professional Exam Torrent will be sent to your mailbox freely for one year, hope you can have a great experience during usage of our practice materials.

## **Free PDF Quiz 2026 Amazon Trustable AWS-Solutions-Architect-Professional: AWS Certified Solutions Architect - Professional Exam Pattern**

If you do not have access to internet most of the time, if you need to go somewhere is in an offline state, but you want to learn for your AWS-Solutions-Architect-Professional exam. Don not worry, our products will help you solve your problem. We deeply believe that our latest AWS-Solutions-Architect-Professional Exam Torrent will be very useful for you to strength your ability, pass your exam and get your certification. Our study materials with high quality and high pass rate in order to help you get out of your harassment.

## **Amazon AWS Certified Solutions Architect - Professional Sample Questions (Q157-Q162):**

### **NEW QUESTION # 157**

A company has built a high performance computing (HPC) cluster in AWS for a tightly coupled workload that generates a large number of shared files stored in Amazon EFS. The cluster was performing well when the number of Amazon EC2 instances in the cluster was 100. However, when the company increased the cluster size to 1,000 EC2 instances, overall performance was well below expectations. Which collection of design choices should a solutions architect make to achieve the maximum performance from

the HPC cluster? (Select THREE.)

- A. Ensure the cluster is launched across multiple Availability Zones.
- B. Replace Amazon EFS with multiple Amazon EBS volumes in a RAID array.
- C. Replace Amazon EFS with Amazon FSx for Lustre.
- D. Select EC2 instance types with an Elastic Fabric Adapter (EFA) enabled
- E. Ensure the HPC cluster is launched within a single Availability Zone.
- F. Launch the EC2 instances and attach elastic network interfaces in multiples of four.

**Answer: C,D,E**

Explanation:

Explanation

Cluster - packs instances close together inside an Availability Zone. This strategy enables workloads to achieve the low-latency network performance necessary for tightly-coupled node-to-node communication that is typical of HPC applications.

### NEW QUESTION # 158

A Solutions Architect must establish a patching plan for a large mixed fleet of Windows and Linux servers.

The patching plan must be implemented securely, be audit ready, and comply with the company's business requirements.

Which option will meet these requirements with MINIMAL effort?

- A. Migrate all applications to AWS OpsWorks and use OpsWorks automatic patching support to keep the OS up-to-date following the initial installation. Use AWS Config to provide audit and compliance reporting.
- B. Use AWS OpsWorks for Chef Automate to run a set of scripts that will iterate through all instances of a given type. Issue the appropriate OS command to get and install updates on each instance, including any required restarts during the maintenance window.
- C. Use AWS Systems Manager on all instances to manage patching. Test patches outside of production and then deploy during a maintenance window with the appropriate approval.
- D. Install and use an OS-native patching service to manage the update frequency and release approval for all instances. Use AWS Config to verify the OS state on each instance and report on any patch compliance issues.

**Answer: C**

### NEW QUESTION # 159

During an audit, a security team discovered that a development team was putting IAM user secret access keys in their code and then committing it to an AWS CodeCommit repository. The security team wants to automatically find and remediate instances of this security vulnerability. Which solution will ensure that the credentials are appropriately secured automatically?

- A. Run a script nightly using AWS Systems Manager Run Command to search for credentials on the development instances. If found use AWS Secrets Manager to rotate the credentials.
- B. Configure Amazon Macie to scan for credentials in CodeCommit repositories. If credentials are found, trigger an AWS Lambda function to disable the credentials and notify the user.
- C. Configure a CodeCommit trigger to invoke an AWS Lambda function to scan new code submissions for credentials. If credentials are found, disable them in AWS IAM and notify the user.
- D. Use a scheduled AWS Lambda function to download and scan the application code from CodeCommit. If credentials are found, generate new credentials and store them in AWS KMS.

**Answer: C**

Explanation:

Explanation

CodeCommit may use S3 on the back end (and it also uses DynamoDB on the back end) but I don't think they're stored in buckets that you can see or point Macie to. In fact, there are even solutions out there describing how to copy your repo from CodeCommit into S3 to back it up:

<https://docs.aws.amazon.com/prescriptive-guidance/latest/patterns/automate-event-driven-backups-from-codecom>

### NEW QUESTION # 160

A company needs to architect a hybrid DNS solution. This solution will use an Amazon Route 53 private hosted zone for the domain `cloud.example.com` for the resources stored within VPCs.

The company has the following DNS resolution requirements:

- \* On-premises systems should be able to resolve and connect to `cloud.example.com`.
- \* All VPCs should be able to resolve `cloud.example.com`.

There is already an AWS Direct Connect connection between the on-premises corporate network and AWS Transit Gateway. Which architecture should the company use to meet these requirements with the HIGHEST performance?

- A. Associate the private hosted zone to all the VPCs. Create a Route 53 inbound resolver in the shared services VPC. Attach all VPCs to the transit gateway and create forwarding rules in the on-premises DNS server for `cloud.example.com` that point to the inbound resolver.
- B. Associate the private hosted zone to all the VPCs. Deploy an Amazon EC2 conditional forwarder in the shared services VPC. Attach all VPCs to the transit gateway and create forwarding rules in the on-premises DNS server for `cloud.example.com` that point to the conditional forwarder.
- C. Associate the private hosted zone to the shared services VPC. Create a Route 53 inbound resolver in the shared services VPC. Attach the shared services VPC to the transit gateway and create forwarding rules in the on-premises DNS server for `cloud.example.com` that point to the inbound resolver.
- D. Associate the private hosted zone to the shared services VPC. Create a Route 53 outbound resolver in the shared services VPC. Attach all VPCs to the transit gateway and create forwarding rules in the on-premises DNS server for `cloud.example.com` that point to the outbound resolver.

**Answer: C**

#### **NEW QUESTION # 161**

A company is using AWS CloudFormation to deploy its infrastructure. The company is concerned that, if a production CloudFormation stack is deleted, important data stored in Amazon RDS databases or Amazon EBS volumes might also be deleted. How can the company prevent users from accidentally deleting data in this way?

- A. Modify IAM policies to deny deleting RDS and EBS resources that are tagged with an tag `"aws:cloudformation:stackname"`
- B. Configure a stack policy that disallows the deletion of RDS and EBS resources.
- C. Use AWS Config rules to prevent deleting RDS and EBS resources.
- D. Modify the CloudFormation templates to add a `DeletionPolicy` attribute to RDS and EBS resources.

**Answer: C**

#### **NEW QUESTION # 162**

.....

One of the key factors for passing the exam is practice. Candidates must use AWS-Solutions-Architect-Professional practice test material to be able to perform at their best on the real exam. This is why VCEPrep has developed three formats to assist candidates in their Amazon AWS-Solutions-Architect-Professional Preparation. These formats include desktop-based Amazon AWS-Solutions-Architect-Professional practice test software, web-based practice test, and a PDF format.

**New AWS-Solutions-Architect-Professional Exam Price:** <https://www.vceprep.com/AWS-Solutions-Architect-Professional-latest-vce-prep.html>

Both practice tests of VCEPrep New AWS-Solutions-Architect-Professional Exam Price i.e, Amazon AWS-Solutions-Architect-Professional Exam Pattern Gone the furthest person is who are willing to do it and willing to take risks, We have the special feature of practice AWS-Solutions-Architect-Professional test, There are some features of this version: first of all, PDF version of our AWS-Solutions-Architect-Professional prep guide can be printed into paper, though which you are able to do some note-writing and highlight the important exam points, What's more, we will always uphold these guiding principles to create more benefits for our customers, by which we extend great thanks to the support from our old and new clients, therefore,in many important festivals we will provide a discount for our customers, just stay tuned for our AWS-Solutions-Architect-Professional training materials.

The agile strategy is to fix resources and schedule, and AWS-Solutions-Architect-Professional then work to implement the highest value features as defined by the customer, What is meant by ownership?
